INDEX TO VOLUME 24

January–April 1991

RESEARCH-EXPOSITORY PAPERS

Bridges, Douglas and Demuth, Osvald. *On the Lebesgue measurability of continuous functions in constructive analysis*, 259

Coquand, Thierry and Stolzenberg, Gabriel. *The Wiener lemma and certain of its generalizations*, 1

Demuth, Osvald. *See* Bridges, Douglas

Gross, Benedict H. *Some applications of Gelfand pairs to number theory*, 277

Ornstein, D. S. and Weiss, B. *Statistical properties of chaotic systems*, 11

Simon, Barry. *Fifty years of eigenvalue perturbation theory*, 303

Stolzenberg, Gabriel. *See* Coquand, Thierry

Weiss, B. *See* Ornstein, D. S.

RESEARCH ANNOUNCEMENTS

Bishop, Christopher and Steger, Tim. *Three rigidity criteria for* PSL(2,**R**), 117

Cai, Mingliang. *Ends of Riemannian manifolds with nonnegative Ricci curvature outside a compact set*, 371

Costa, Douglas and Keller, Gordon. *Normal subgroups of* SL(2, A), 131

Curto, Raúl E. and Yan, Keren. *Spectral theory of Reinhardt measures*, 379

Effinger, Gove W. and Hayes, David R. *A complete solution to the polynomial* 3*-primes problem*, 363

Efrat, Isaac. *On the discrete spectrum of certain discrete groups*, 125

Garvan, Frank G. and Gonnet, Gaston. *Macdonald's constant term conjectures for exceptional root systems*, 343

Goncharov, A. B. *The classical trilogarithm, algebraic K-theory of fields, and Dedekind zeta functions*, 155

Gonnet, Gaston. *See* Garvan, Frank G.

Gross, Kenneth I. and Richards, Donald St. P. *Hypergeometric functions on complex matrix space*, 349

Hayes, David R. *See* Effinger, Gove W.

Hochster, Melvin and Huneke, Craig. *Absolute integral closures are big Cohen–Macaulay algebras in characteristic P*, 137

Huneke, Craig. *See* Hochster, Melvin

Keller, Gordon. *See* Costa, Douglas

Meeks, William H., III and White, Brian. *Minimal surfaces bounded by a pair of convex planar curves*, 179

Milne, J. S. *The conjecture of Langlands and Rapoport for Siegel modular varieties*, 335

Nikolaev, I. G. *Bounded curvature closure of the set of compact Riemannian manifolds*, 171

Perry, Peter A. *The Selberg zeta function and scattering poles for Kleinian groups*, 327

Ratner, Marina. *Distribution rigidity for unipotent actions on homogeneous spaces*, 321

Richards, Donald St. P. *See* Gross, Kenneth I.

Sadun, Lorenzo and Segert, Jan. *Non-self-dual Yang-Mills connections with nonzero Chern number*, 163

Segert, Jan. *See* Sadun, Lorenzo

Steger, Tim. *See* Bishop, Christopher

Strade, Helmut and Wilson, Robert Lee. *Classification of simple Lie algebras over algebraically closed fields of prime characteristic*, 357
Völklein, Helmut. PSL $_2(q)$ *and extensions of* $\mathbf{Q}(x)$, 145
White, Brian. *See* Meeks, William H., III
Wilson, Robert Lee. *See* Strade, Helmut
Woźniakowski, H. *Average case complexity of multivariate integration*, 185
Yan, Keren. *See* Curto, Raúl E.

BOOK REVIEWS

Bonet, J. *See* Carreras, P. Pérez
Brouwer, A. E., Cohen, A. M., and Neumaier, A. *Distance-regular graphs*, reviewed by J. J. Seidel, 415
Carreras, P. Pérez and Bonet, J. *Barrelled locally convex spaces*, reviewed by Stephen A. Saxon, 424
Cegrell, Urban. *Capacities in complex analysis*, reviewed by B. A. Taylor, 213
Chang, Tung and Hsiao, Ling. *The Riemann problem and interaction of waves in gas dynamics*, reviewed by J. A. Smoller, 228
Cohen, A. M. *See* Brouwer, A. E.
Conway, J. H. and Sloane, N.J.A. *Erratum*, 479
Cusick, Thomas W. and Flahive, Mary E. *The Markoff and Lagrange spectra*, reviewed by Jeffrey D. Vaaler, 419
Dellacherie, Claude and Meyer, Paul-André. *Probabilités et potentiel* (*Chapters* XII–XVI), reviewed by Joanna Mitro, 471
Deuschel, Jean-Dominique and Stroock, Daniel W. *Large deviations*, reviewed by S.R.S. Varadhan, 448
Dzhuraev, A. *Systems of equations of composite type*, reviewed by Martin Schechter, 257
Emery, Michel. *Stochastic calculus in manifolds*, reviewed by Laurent Schwartz, 451
Fatunla, S. O. *Numerical methods for initial value problems in ordinary differential equations*, reviewed by Ian Gladwell, 389
Flahive, Mary E. *See* Cusick, Thomas W.
Hillman, Jonathan. 2-*Knots and their groups*, reviewed by Michel Kervaire, 211
Hiss, G. and Lux, K. *Brauer trees of sporadic groups*, reviewed by Walter Feit, 195
Holt, Derek F. and Plesken, W. *Perfect groups*, reviewed by Ron Solomon, 402
Hsiao, Ling. *See* Chang, Tung
James, I. M. *Fiberwise topology*, reviewed by Albrecht Dold, 246
Kirby, Robion C. *The topology of* 4-*manifolds*, reviewed by Laurence R. Taylor, 466
Koosis, Paul. *The logarithmic integral* I, reviewed by James E. Brennan, 248
Lück, Wolfgang. *Transformation groups and algebraic K-theory*, reviewed by Erik Kjær Pedersen, 405
Lux, K. *See* Hiss, G.

Meyer, Paul-André. *See* Dellacherie, Claude
Miyake, T. *Modular forms*, reviewed by Paul B. Garrett, 234
Neumaier, A. *See* Brouwer, A. E.
Passman, D. S. *Infinite crossed products*, reviewed by Susan Montgomery, 391
Plesken, W. *See* Holt, Derek F.
Pour-El, M. B. and Richards, J. I. *Computability in analysis and physics*, reviewed by Douglas S. Bridges, 216
Putinar, M. *See* Martin, M.
Reshetnyak, Yu. G. *Space mappings with bounded distortion*, reviewed by Matti Vuorinen, 408
Richards, J. I. *See* Pour-El, M. B.

Ruelle, David. *Elements of differentiable dynamics and bifurcation theory*, reviewed by Michael Shub, 199
Satake, I. *Algebraic structures of bounded symmetric domains*, reviewed by Adam Koranyi, 387
Sloane, N.J.A. *See* Conway, J. H.
Stroock, Daniel W. *See* Deuschel, Jean-Dominique
Vitushkin, A. G. (ed.). *Several complex variables* I, reviewed by Edgar Lee Stout, 435

JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

TRANSLATION JOURNALS

Soviet Mathematics–Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences in the USSR. DOKLADY publishes 500 articles a year, each about four pages long.

Mathematics of the USSR–Izvestiya, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA, published by the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Mathematics of the USSR–Sbornik is a bimonthly journal and is a cover-to-cover translation of MATEMATICHESKIĬ SBORNIK (NOVAYA SERIYA), published by the Moscow Mathematical Society and the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA published by Kiev University, beginning with the 1970 Soviet publication.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA which contains the results of original research in pure mathematics.

Proceedings of the Steklov Institute of Mathematics is a translation of the AKADEMIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTITUTA IMENI V. A. STEKLOVA. Issues contain book-length articles or collections of articles pertaining to the same topic.

Leningrad Mathematical Journal is a translation of ALGEBRA I ANALIZ.

CONTENT AND SUBMISSION INFORMATION FOR RESEARCH JOURNALS

Bulletin (New Series) of the American Mathematical Society contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics. See inside front cover for submission information.

Journal of the American Mathematical Society is devoted to research articles of the highest quality in all areas of pure and applied mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, WALTER GAUTSCHI, Computer Sciences Department, Purdue University, West Lafayette, Indiana 47907.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS is made up of one or more numbers; a number contains either a single monograph or a group of cognate papers. Copy is supplied by the author; information on preparation of camera copy may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

Logic and foundations (03 04) to ANDREAS R. BLASS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

Combinatorics, computer science, and information theory (05 15 68 94) to JEFFRY N. KAHN, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903

Commutative algebra (06 12 13 14 15 18) to LOUIS J. RATLIFF, JR., Department of Mathematics, University of California, Riverside, California 92502

Number theory (11) to WILLIAM ADAMS, Department of Mathematics, University of Maryland, College Park, Maryland 20742

General algebra (16 17 18 08) to MAURICE AUSLANDER, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

Group theory (20) to WARREN J. WONG, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

Real variables (26 28 40) to ANDREW M. BRUCKNER, Department of Mathematics, University of California, Santa Barbara, California 93106

Complex variables (30 31 32) to CLIFFORD J. EARLE JR., Cornell University, White Hall, Ithaca, New York 14853

Ordinary differential equations and dynamical systems (33 34 39 49 58) to CHARLES PUGH, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

Partial differential equations (35 49 53) to BARBARA L. KEYFITZ, Department of Mathematics, University of Houston, Houston, Texas 77204-3476

General analysis (31 41 42 43 44 45) to J. MARSHALL ASH, Department of Mathematics, DePaul University, Chicago, Illinois 60614

Functional analysis and operator theory (46 47) to PALLE E. T. JORGENSEN, University of Iowa, Iowa City, Iowa 52242

Functional analysis and convexity (46 52) to WILLIAM J. DAVIS, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

Complex variables, functional analysis, and operator theory (30 46 47) to THEODORE W. GAMELIN, Department of Mathematics, University of California at Los Angeles, Los Angeles, California 90024

Lie groups and geometry (22 51 53) to JONATHAN M. ROSENBERG, Department of Mathematics, University of Maryland, College Park, Maryland 20742

Global analysis and partial differential equations on manifolds (53 58) to PETER LI, Department of Mathematics, University of Arizona, Tucson, Arizona 85721

Set theoretic topology (54) to FRANKLIN D. TALL, Department of Mathematics, University of Toronto, Ontario M5S 1A1, Canada

Metric and geometric topology (54 57) to JAMES E. WEST, Department of Mathematics, Cornell University, Ithaca, New York 14853

Algebraic and differential topology (55 58) to FREDERICK R. COHEN, Department of Mathematics, University of Rochester, Rochester, New York 14627

Probability and certain other fields (60–94 inclusive) to LAWRENCE F. GRAY, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455, or GEORGE C. PAPANICOLAOU, Applied Mathematics Division, Courant Institute, New York University, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, IRWIN KRA, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Two copies of the manuscript should be submitted to one of the following editors.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Classical analysis (including complex, real, and harmonic) to DAVID JERISON, Department of Mathematics, MIT, Rm. 2-180, Cambridge, MA 02139

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 37550

Algebraic number theory, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

OTHER JOURNALS

Abstracts of Papers Presented to the American Mathematical Society contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society "by title".

Current Mathematical Publications, issued triweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Abstracts and reviews are grouped according to the 1980 Mathematics Subject Classification scheme (1985 Revision). The subscription includes an annual author and subject index.

Notices of the American Mathematical Society, published ten times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

MANUSCRIPT, PROOF, AND COPYING INFORMATION

MANUSCRIPT

Articles submitted for publication should be typewritten and double-spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand-drawn symbols are satisfactory if clearly done; special instructions for the typesetter, when necessary, should be included on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification (1985 Revision) can be found in the annual subject index volumes of Mathematical Reviews.

To encourage the submission of manuscripts in electronic form using TEXand the $\mathcal{AMS}$-TEXmacro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248,

Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

OFFPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the author upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, a copy is sent to each author. Authors are urged to return the form immediately to prevent delays in processing and publishing the manuscript. The 1984 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

There are no page charges assessed on papers published in the BULLETIN.

REMARKS ON RESEARCH ANNOUNCEMENTS

The BULLETIN of the American Mathematical Society is the only research mathematical journal received as a privilege of membership in the Society. Its circulation is larger, by an order of magnitude, than that of most journals, in particular specialized journals. Thus, a BULLETIN Research Announcement should contain results of sufficient depth and import to be of interest to a wide mathematical audience. And, consequently, beyond basic mathematical standards, Research Announcements should meet high standards for style.

Beyond general exhortations to write clearly and precisely, the following more specific suggestions are offered.

1. Keep in mind that you are writing for as wide an audience as possible. Avoid the shorthand and jargon of your area as much as you can. Carefully introduce the terminology needed to understand the main results. If space considerations prevent a full development of the concepts, delineate clearly what you are not explaining and provide references to it in the literature. Consider an Announcement an opportunity to explain your area of research to the world at large.

2. Do not confuse a graceful style with a sloppy style. Although a light touch or a colorful phrase can relieve the tedium of definitions, excessive breeziness and imprecision confuse readers who have only a casual knowledge of the subject. We say this not to encourage pedantic writing but to discourage obscure writing. Your results should be stated precisely with all important concepts and notations made clear.

3. Ask a colleague to review your manuscript before you submit it. Even better, ask two colleagues, one whose work is very close to yours, one whose work is farther away. (If you can't get two people you know to read your work before it is published, how many will want to read it after?) Ask for suggestions on how to improve the readability.

CONTENTS JANUARY 1991

Research-Expository Papers

The Wiener lemma and certain of its generalizations *by Thierry Coquand and Gabriel Stolzenberg* 1
Statistical properties of chaotic systems *by D. S. Ornstein and B. Weiss* 11

Research Announcements

Three rigidity criteria for PSL(2,R) *by Christopher Bishop and Tim Steger* 117
On the discrete spectrum of certain discrete groups *by Isaac Efrat* 125
Normal subgroups of SL(2, A) *by Douglas Costa and Gordon Keller*.... 131
Absolute integral closures are big Cohen–Macaulay algebras in characteristic P *by Melvin Hochster and Craig Huneke* 137
PSL $_2(q)$ **and extensions of** $Q(x)$ *by Helmut Völklein* 145
The classical trilogarithm, algebraic K**-theory of fields, and Dedekind zeta functions** *by A. B. Goncharov* 155
Non-self-dual Yang-Mills connections with nonzero Chern number *by Lorenzo Sadun and Jan Segert*..... 163
Bounded curvature closure of the set of compact Riemannian manifolds *by I. G. Nikolaev*..... 171
Minimal surfaces bounded by a pair of convex planar curves *by William H. Meeks* III *and Brian White* 179
Average case complexity of multivariate integration *by H. Woźniakowski* 185

Book Reviews

Brauer trees of sporadic groups *by G. Hiss and K. Lux*—**Reviewed by** *Walter Feit* 195
Elements of differentiable dynamics and bifurcation theory *by David Ruelle*—**Reviewed by** *Michael Shub* 199
2-Knots and their groups *by Jonathan Hillman*—**Reviewed by** *Michel Kervaire* 211
Capacities in complex analysis *by Urban Cegrell*—**Reviewed by** *B. A. Taylor*..... 213
Computability in analysis and physics *by M. B. Pour-El and J. I. Richards*—**Reviewed by** *Douglas S. Bridges*..... 216
The Riemann problem and interaction of waves in gas dynamics *by Tung Chang and Ling Hsiao*—**Reviewed by** *J. A. Smoller* 228
Modular forms *by T. Miyake*—**Reviewed by** *Paul B. Garrett*..... 234
Fiberwise topology *by I. M. James*—**Reviewed by** *Albrecht Dold* 246

The logarithmic integral I *by Paul Koosis*—**Reviewed by** *James E. Brennan* 248
Systems of equations of composite type *by A. Dzhuraev*—**Reviewed by** *Martin Schechter* 257

CONTENTS APRIL 1991

Research-Expository Papers

On the Lebesgue measurability of continuous functions in constructive analysis *by Douglas Bridges and Osvald Demuth* 259
Some applications of Gelfand pairs to number theory *by Benedict H. Gross* 277
Fifty years of eigenvalue perturbation theory *by Barry Simon* 303

Research Announcements

Distribution rigidity for unipotent actions on homogeneous spaces *by Marina Ratner* 321
The Selberg zeta function and scattering poles for Kleinian groups *by Peter A. Perry* 327
The conjecture of Langlands and Rapoport for Siegel modular varieties *by J. S. Milne* 335
Macdonald's constant term conjectures for exceptional root systems *by Frank G. Garvan and Gaston Gonnet* 343
Hypergeometric functions on complex matrix space *by Kenneth I. Gross and Donald St. P. Richards* 349
Classification of simple Lie algebras over algebraically closed fields of prime characteristic *by Helmut Strade and Robert Lee Wilson* 357
A complete solution to the polynomial 3-primes problem *by Gove W. Effinger and David R. Hayes* 363
Ends of Riemannian manifolds with nonnegative Ricci curvature outside a compact set *by Mingliang Cai* 371
Spectral theory of Reinhardt measures *by Raúl E. Curto and Keren Yan* 379

Book Reviews

Algebraic structures of bounded symmetric domains *by I. Satake*—**Reviewed by** *Adam Koranyi* 387
Numerical methods for initial value problems in ordinary differential equations *by S. O. Fatunla*—**Reviewed by** *Ian Gladwell* 389
Infinite crossed products *by D. S. Passman*—**Reviewed by** *Susan Montgomery* 391

Perfect groups *by Derek F. Holt and W. Plesken*—**Reviewed by** *Ron Solomon* 402
Transformation groups and algebraic K-theory *by Wolfgang Lück*—**Reviewed by** *Erik Kjær Pedersen* 405
Space mappings with bounded distortion *by Yu. G. Reshetnyak*—**Reviewed by** *Matti Vuorinen* 408
Distance-regular graphs *by A. E. Brouwer, A. M. Cohen, and A. Neumaier*—**Reviewed by** *J. J. Seidel* 415
The Markoff and Lagrange spectra *by Thomas W. Cusick and Mary E. Flahive*—**Reviewed by** *Jeffrey D. Vaaler* 419
Barrelled locally convex spaces *by P. Pérez Carreras and J. Bonet*—**Reviewed by** *Stephen A. Saxon* 424
Several complex variables I *edited by A. G. Vitushkin*—**Reviewed by** *Edgar Lee Stout* 435
Lectures on hyponormal operators *by M. Martin and M. Putinar*—**Reviewed by** *John B. Conway* 441
Large deviations *by Jean-Dominique Deuschel and Daniel W. Stroock*—**Reviewed by** *S.R.S. Varadhan* 448
Stochastic calculus in manifolds *by Michel Emery*—**Reviewed by** *Laurent Schwartz* 451
The topology of 4-manifolds *by Robion C. Kirby*—**Reviewed by** *Laurence R. Taylor* 466
Probabilités et potentiel (Chapters XII–XVI) *by Claude Dellacherie and Paul-André Meyer*—**Reviewed by** *Joanna Mitro* 471
Erratum *by J. H. Conway and N.J.A. Sloane* 479

(*Continued from back cover*)

Macdonald's constant term conjectures for exceptional root systems *by Frank G. Garvan and Gaston Gonnet* 343
Hypergeometric functions on complex matrix space *by Kenneth I. Gross and Donald St. P. Richards* 349
Classification of simple Lie algebras over algebraically closed fields of prime characteristic *by Helmut Strade and Robert Lee Wilson* .. 357
A complete solution to the polynomial 3-primes problem *by Gove W. Effinger and David R. Hayes* 363
Ends of Riemannian manifolds with nonnegative Ricci curvature outside a compact set *by Mingliang Cai* 371
Spectral theory of Reinhardt measures *by Raúl E. Curto and Keren Yan* 379

Book Reviews

Algebraic structures of bounded symmetric domains *by I. Satake*—**Reviewed by** *Adam Koranyi* 387
Numerical methods for initial value problems in ordinary differential equations *by S. O. Fatunla*—**Reviewed by** *Ian Gladwell* 389
Infinite crossed products *by D. S. Passman*—**Reviewed by** *Susan Montgomery* 391
Perfect groups *by Derek F. Holt and W. Plesken*—**Reviewed by** *Ron Solomon* 402
Transformation groups and algebraic K-theory *by Wolfgang Lück*—**Reviewed by** *Erik Kjær Pedersen* 405
Space mappings with bounded distortion *by Yu. G. Reshetnyak*—**Reviewed by** *Matti Vuorinen* 408
