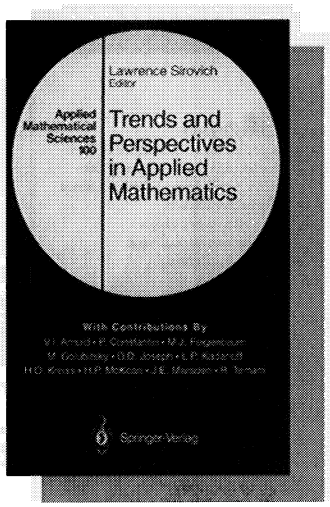
The successful series for practitioners



L. Sirovich (Ed.)

Trends and Perspectives in Applied Mathematics

1994. 358 pp. 77 figs.
(Applied Mathematical Sciences, Vol. 100)
Hardcover DM 98,- ISBN 3-540-94201-7

This is the *100th volume* of the **Applied Mathematical Sciences** series. In order to mark the occasion, this special volume has been created and will have an impact on the community that practices and is served by applied mathematics.

Ten leading figures in the field present their own perspective of applied mathematics. The articles that are collected in this volume bear testimony to both the vitality and diversity of the subject. The articles cover such topics as: mathematical problems in classical physics; geometric and analytic studies in turbulence; viscous and viscoelastic potential flow; difference methods for time dependent partial differential equations; and geometric mechanics, stability and control.

A. Chorin

Vorticity and Turbulence

1994. Approx. 190 pp. 33 figs.
(Applied Mathematical Sciences, Vol. 103)
Hardcover DM 68,- ISBN 3-540-94197-5

This book provides an introduction to turbulence in vortex systems, and to turbulence theory for incompressible flow described in terms of the vorticity field. It is the author's hope that by the end of the book the reader will believe that these subjects are identical, and constitute a special case of fairly standard statistical mechanics, with both equilibrium and non-equilibrium aspects. The author's main goal is to relate turbulence to statistical mechanics.

The book is organized as follows: the first three chapters constitute a fairly standard introduction to homogeneous turbulence in incompressible flow; a quick review of fluid mechanics; a summary of the appropriate Fourier theory; and a summary of Kolmogorov's theory of the inertial range. The next four chapters present the statistical theory of vortex notion, and the vortex dynamics of turbulence. The book ends with the major conclusion that turbulence can no longer be viewed as incomprehensible.
