

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 23, Numbers 9-10

September/October 2010

Haim Brezis and Jean Mawhin , Periodic solutions of the forced relativistic pendulum	801
Bui The Anh , Weighted norm inequalities for Riesz transforms of magnetic Schrödinger operators	811
Futoshi Takahashi , An eigenvalue problem related to the critical Sobolev exponent: variable coefficient case	827
Michela Guida and Sergio Rolando , Symmetric κ -loops	861
Boris Haspot , Existence of global weak solutions for compressible fluid models with a capillary tensor for discontinuous interfaces	899
Dimitri Breda , Nonautonomous delay differential equations in Hilbert spaces and Lyapunov exponents	935
Roland Schnaubelt and Mark Veraar , Structurally damped plate and wave equations with random point force in arbitrary space dimensions	957
Teresa Radice , Regularity result for nondivergence equations with unbounded coefficients	989
