

DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 27, Numbers 9-10

September/October 2014

Noboru Chikami, The blow-up criterion for the compressible Navier-Stokes system with a Yukawa-potential in the critical Besov space	801
Haining Fan, Multiple solutions for a singular elliptic problem involving Hardy terms on unbounded domains	821
John Helms and Jason Metcalfe, Almost global existence for 4-dimensional quasilinear wave equations in exterior domains	837
Mikhail M. Lavrentiev, Jr., Renato Spigler, and Atusi Tani, Existence, uniqueness, and regularity for the Kuramoto–Sakaguchi equation with unboundedly supported frequency distribution	879
Matthew Paddick, Stability and instability of Navier boundary layers	893
M.A. Jorge Silva and V. Narciso, Long-time behavior for a plate equation with nonlocal weak damping ...	931
Ida de Bonis and Linda Maria De Cave, Degenerate parabolic equations with singular lower order terms	949
Nguyen Quang Huy, Non-uniformly elliptic equations with non-uniformly p -superlinear nonlinearities	977
