

# DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 33, Numbers 3-4

March/April 2020

---

<b>Antonio Ambrosetti and David Arcoya,</b> On the relativistic pendulum-type equation .....	91
<b>Jeff Morgan and Vandana Sharma,</b> Global existence of solutions to volume-surface reaction diffusion systems with dynamic boundary conditions .....	113
<b>Rosanna Manzo,</b> On Tikhonov regularization of optimal Neumann boundary control problem for an ill-posed strongly nonlinear elliptic equation with an exponential type of non-linearity .....	139
<b>Ahmed Salem, Faris Alzahrani, and Balqees Alghamdi,</b> Langevin equation involving two fractional orders with three-point boundary conditions .....	163
<b>Bashir Ahmad, Ymnah Alruwaily, Ahmed Alsaedi, and Juan J. Nieto,</b> Fractional integro-differential equations with dual anti-periodic boundary conditions .....	181
