

Note to the author

All manuscripts should be double-spaced, and the author should keep a complete copy. Footnotes should be double-spaced, on a separate page. Figures should be drawn separately in black ink on white paper suitable for being photographed. Explain unusual symbols and handwritten symbols, and identify special typefaces such as bold, Gothic (German), script. Include a hard copy even if your manuscript has been electronically prepared in AMS-TEX or AMS-LATEX . In the latter case please submit your style files and font files with the AMS-TEX or AMS-LATEX diskette of your paper.

Include the primary and secondary subject classification numbers. The 1991 Mathematics Subject Classification can be found in the annual subject index volume of Mathematical Reviews.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for \$40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

	Page
Uniformly sweeping out does not imply mixing By TERRENCE ADAMS	525
Deformations and the rational homotopy of the monoid of fiber homotopy equivalences By VOLKER HAUSCHILD	537
The Hilbert transform along curves that are analytic at infinity By LINDA SAAL and MARTA URCIUOLO	561
\mathcal{A} -subspace of X_λ By HONG OH KIM and ERN GUN KWON	575
Relation of the Van Est spectral sequence to K -theory and cyclic homology By ULRIKE TILLMANN	589
Foliations invariant under the mean curvature flow By PAWEL G. WALCZAK	609
Convergence of ergodic averages on lattice random walks By J. BOURGAIN	624
On a theorem of Burkholder By YORAM SAGHER and KECHENG ZHOU	637
Deformations and diffeomorphism types of Hopf manifolds By KEIZO HASEGAWA	643
Arithmetically long orbits of solvable linear groups By OLAF MANZ and THOMAS R. WOLF	652
Almost everywhere convergence of convolution powers in $L^1(X)$ By KARIN REINHOLD-LARSSON	666
The Stone-Weierstrass property in quotient algebras, and sets of spectral resolution By MASAKO TAKAGI	680
