

ILLINOIS JOURNAL OF MATHEMATICS

Volume 56, Number 3

Fall 2012

Ri-Xiang Chen , Some special cases of the Eisenbud–Green–Harris conjecture	661
Richard C. Bradley , On the behavior of the covariance matrices in a multivariate central limit theorem under some mixing conditions	677
Patrick W. Keef and Peter V. Danchev , Generalizations of primary Abelian C_α groups	705
Jingwei Guo , Lattice points in large convex planar domains of finite type	731
Laurent Moonens and Joseph M. Rosenblatt , Moving averages in the plane	759
Sönmez Şahutoğlu , Localization of compactness of Hankel operators on pseudoconvex domains	795
Amy T. DeCelles , An exact formula relating lattice points in symmetric spaces to the automorphic spectrum	805
Kwok-Kwong Stephen Choi and Charles L. Samuels , Two inequalities on the areal Mahler measure	825
Naoya Hiramatsu , Remarks on subcategories of Artinian modules	835
Qingying Bu , Applications of semi-embeddings to the study of the projective tensor product of Banach spaces	849
Anna Pelczar-Barwacz , Strictly singular operators in asymptotic ℓ_p Banach spaces	861
Dumitru Popa , Mixing multilinear operators	885
Petteri Harjulehto, Ritva Hurri-Syrjänen and Antti V. Vähäkangas , On the $(1, p)$ -Poincaré inequality	905
Stanislav Hencl and Luděk Kleprlík , Composition of q -quasiconformal mappings and functions in Orlicz–Sobolev spaces	931
Tadahito Harima and Junzo Watanabe , The weak Lefschetz property for \mathfrak{m} -full ideals and componentwise linear ideals	957
Zhi-Wei Sun , A refinement of a congruence result by van Hamme and Mortenson	967
Claus Michael Ringel , Morphisms determined by objects: The case of modules over artin algebras	981
