

# ILLINOIS JOURNAL OF MATHEMATICS

Volume 59, Number 3

Fall 2015

---

<b>Dylan Airey and Bill Mance</b> , Normality preserving operations for Cantor series expansions and associated fractals, I.....	531
<b>M. J. Alves, R. B. Assunção and O. H. Miyagaki</b> , Existence result for a class of quasilinear elliptic equations with $(p-q)$ -Laplacian and vanishing potentials.....	545
<b>M. Anoussis, V. Felouzis and I. G. Todorov</b> , Tensor products of measurable operators.....	577
<b>Tullio Ceccherini-Silberstein and Michel Coornaert</b> , Expansive actions of countable amenable groups, homoclinic pairs, and the Myhill property.....	597
<b>Kohei Tanaka</b> , Lusternik–Schnirelmann category for cell complexes and posets	623
<b>Hop D. Nguyen</b> , Notes on the linearity defect and applications.....	637
<b>Ben Krause and Pavel Zorin-Kranich</b> , A random pointwise ergodic theorem with Hardy field weights.....	663
<b>Ashley K. Wheeler</b> , Ideals generated by principal minors.....	675
<b>Stefan Friedl and Matthias Nagel</b> , Twisted Reidemeister torsion and the Thurston norm: Graph manifolds and finite representations.....	691
<b>Matthew M. Jones</b> , Compact composition operators with symbol a universal covering map onto a multiply connected domain.....	707
<b>Daehong Kim, Mila Kurniawaty and Kazuhiro Kuwae</b> , A refinement of analytic characterizations of gaugeability for generalized Feynman–Kac functionals.....	717
<b>Braxton Osting, Jeremy Marzuola and Elena Cherkhev</b> , An isoperimetric inequality for an integral operator on flat tori.....	773
<b>Isaac Goldbring</b> , Model theory and the QWEP conjecture.....	795
<b>Jonas Wahl</b> , A note on reduced and von Neumann algebraic free wreath products.....	801
<b>K. Dykema, F. Sukochev and D. Zanin</b> , Holomorphic functional calculus on upper triangular forms in finite von Neumann algebras.....	819
