Superconvergent product integration method for Hammerstein
integral equations
By C. ALLOUCH, D. SBIBIH AND M. TAHRICHI 1

Extrapolation methods for the numerical solution
of nonlinear Fredholm integral equations
By CLAUDE BREZINSKI AND MICHELA REDIVO-ZAGLIA 29

Smooth solutions to mixed-order fractional differential systems
with applications to stability analysis
By JAVIER A. GALLEGOS, NORELYS AGUILA-CAMACHO
MANUEL A. DUARTE-MERMOUD 59

On some classes of elliptic systems with fractional boundary relaxation
By JAN PRÜSS 85

A hybrid collocation method for fractional initial value problems
By LINJUN WANG, FANG WANG, AND YANZHAO CAO 105

Essential norm of generalized weighted composition operators
from H^∞ to the logarithmic Bloch space
By YANHUA ZHANG 131
