

CONTENTS

J. SAAL , Maximal regularity for the Stokes system on noncylindrical space-time domains	617
A. KODAMA and S. SHIMIZU , A group-theoretic characterization of the space obtained by omitting the coordinate hyperplanes from the complex Euclidean space, II	643
R. KLOOSTERMAN , Classification of all Jacobian elliptic fibrations on certain K3 surfaces	665
T. ITO , On an integral representation of special values of the zeta function at odd integers	681
K. CHINEN and L. MURATA , On a distribution property of the residual order of $a \pmod{p}$ — III	693
T. YAMAMOTO , Classification of singular fibres of stable maps of 4-manifolds into 3-manifolds and its applications	721
T. HISHIDA , L^q estimates of weak solutions to the stationary Stokes equations around a rotating body	743
T. SUZUKI , Lou's fixed point theorem in a space of continuous mappings	769
Ei. BANNAI and Etsu. BANNAI , On Euclidean tight 4-designs	775
K. NISHIHARA , Global asymptotics for the damped wave equation with absorption in higher dimensional space	805
D. FUJIWARA and N. KUMANO-GO , The second term of the semi-classical asymptotic expansion for Feynman path integrals with integrand of polynomial growth	837
M. KATOU , New affine minimal ruled hypersurfaces	869
H. ICHIMURA and H. SUMIDA-TAKAHASHI , Stickelberger ideals of conductor p and their application	885
Q.-M. CHENG and S. SHU , A Möbius characterization of submanifolds	903
