

CONTENTS

Soji KANEYUKI , On the subalgebras $\mathfrak{g}_0$ and $\mathfrak{g}_{ev}$ of semisimple graded Lie algebras	1
Plácido ANDRADE , The set of vector fields with transverse foliations	21
Takaaki NOMURA , Manifold of primitive idempotents in a Jordan-Hilbert algebra	37
Yukitaka ABE , Sur les fonctions périodiques de plusieurs variables II (réduction au cas défini positif)	59
Ken'ichi KUGA , Certain polynomials for knots with integral representations	67
Hiroyuki TASAKI , Mass minimizing submanifolds with respect to some Riemannian metrics	77
Nobuhiro INNAMI , The class of second order equations which Riemannian geometry can be applied to	89
Hiroyasu IZEKI , On the decomposition of conformally flat manifolds	105
Hideaki KAZAMA and Takashi UMENO , Dolbeault isomorphisms for holomorphic vector bundles over holomorphic fiber spaces and applications	121
Masami OHTA , On cohomology groups attached to towers of algebraic curves	131
