

CONTENTS

Muneo CHŌ , Joint spectra of strongly hyponormal operators on Banach spaces	185
Minoru YOSHIDA , On Nelson processes with boundary condition	193
Koji FUJIWARA , Metric deformation of non-positively curved manifolds	213
Hiroshi YAMASHITA , Remarks on connections between the Leopoldt conjecture, p -class groups and unit groups of algebraic number fields	221
Yosio MUTŌ , Extension of minimal immersions of spheres into spheres	239
Yo MATSUBARA , Consistency of Menas' conjecture	259
Satoshi KOIKE , Notes on C^0 sufficiency of quasijets	265
Alain HARAUX and Mitsuharu ÔTANI , Quasi-periodicity of bounded solutions to some periodic evolution equations	277
Heihachiro HARA and Hisao MIZUMOTO , Determination of the modulus of quadrilaterals by finite element methods	295
Hiroshi AKIYAMA , Backward Itô's formula for sections of a fibered manifold	327
Masahito DATEYAMA , The almost weak specification property for ergodic group automorphisms of abelian groups	341
