

CALL FOR PAPERS

Eight Annual IEEE Symposium on

LOGIC IN COMPUTER SCIENCE

June 20-23, 1993, Montreal, Quebec (Canada)

Program Chair:

Moshe Y. Vardi
Attn: LICS
IBM Research
Almaden Research Center, K53-802
650 Harry Rd.
San Jose, CA 95120-6099, USA
vardi@almaden.ibm.com,
vardi@almaden.bitnet
Phone: (408) 927-1784
Fax: (408) 927-2100

Program Committee:

M. Abadi, *DEC SRC*
S. Abramsky, *Imperial Coll.*
B. Bloom, *Cornell*
P. Clote, *Boston Coll.*
P.J. Freyd, *Univ. of Pennsylvania*
D. Harel, *Weizmann Inst.*
K.G. Larsen, *Aalborg Univ.*
P. Lescanne, *CRIN*
D. McAllester, *MIT*
J. Meseguer, *SRI*
D. Miller, *Univ. of Pennsylvania*
Y. Moschovakis, *UCLA*
N. Shankar, *SRI*
C. Talcott, *Stanfrod*
M.Y. Vardi (Chair), *IBM Almaden*
P. Wolper, *Univ. of Liège*

Conference Co-Chairs:

Mitsu Okada
Department of Computer Science
Concordia University
Montreal
H3G 1M8 Quebec, Canada
okada@concour.cs.concordia.ca

Prakash Panangaden
School of Computer Science
McGill University
Montreal
H3A 2A7 Quebec, Canada
prakash@cs.mcgill.ca

General Chair:

Robert L. Constable
Department of Computer Science
Upson Hall
Cornell University
Ithaca, NY 14853, USA
rc@cs.cornell.edu

The LICS Symposium aims to attract high quality original papers covering theoretical and practical issues in computer science that relate to logic in a broad sense, including algebraic, categorical and topological approaches.

Suggested, but not exclusive, topics of interest include: *abstract data types, automated deduction, concurrency, constructive mathematics, data base theory, finite model theory, knowledge representation, lambda and combinatory calculi, logical aspects of computational complexity, logics in artificial intelligence, logic programming, modal and temporal logics, program logic and semantics, rewrite rules, logical aspects of symbolic computing, problem solving environments, software specification, type systems, verification.*

Paper submission: 10 hard copies of a detailed abstract (not a full paper) and 20 additional copies of the cover page should be received by December 8, 1992 by the program chair. Authors without access to duplication facilities may submit a single copy of each. Authors will be notified of acceptance by February 14, 1992. Accepted papers (in a specified proceedings format) will be due April 6, 1993.

The cover page of the submission should include the title, authors, a brief synopsis, and the corresponding author's name, address, phone number, fax number, and e-mail address, when available. Abstracts must be in English, clearly written, and provide sufficient detail to allow the program committee to assess the merits of the paper. References and comparisons with related work should be included. It is recommended that each submission begin with a succinct statement of the issues, a summary of the main results, and a brief explanation of their significance and relevance to the conference, all phrased for the non-specialist. Technical development of the work, directed to the specialist, should follow. While abstracts of fewer than 1500 words are rarely adequate, the entire abstract should not exceed 10 typed pages, with roughly 35 lines per page. If the authors believe that more details are essential to substantiate their main results, they may place additional details in a clearly marked appendix. Late submissions, and those departing significantly from these guidelines, run a high risk of rejection.

The results in the abstract must be unpublished, and not submitted for publication elsewhere, including proceedings of other symposia or workshops. All authors of accepted papers will be expected to sign copyright release forms, and one author of each accepted paper will be expected to present the paper at the conference.

The symposium is sponsored by the IEEE Technical Committee on Mathematical Foundations of Computing, in cooperation with the Association for Symbolic Logic and the European Association for Theoretical Computer Science. The cooperation of the ACM is anticipated.

Organizing Committee: M. Abadi, S. Abramsky, S. Artemov, J. Barwise, M. Blum, A. Bundy, S. Buss, E. Clarke, R. Constable (Chair), E. Engeler, J. Gallier, U. Goltz, Y. Gurevich, S. Hayashi, G. Huet, G. Kahn, D. Kapur, C. Kirchner, R. Kosaraju, J.W. Klop, P. Kolaitis, D. Leivant, A.R. Meyer, G. Mints, J. Mitchell, Y. Moschovakis, A. Pitts, G. Plotkin, S. Ronchi della Rocca, G. Rozenberg, A. Sedrov, D. Scott, J. Tiuryn, M.Y. Vardi, R. de Vrijer.

Entailment

The Logic of Relevance and Necessity
Volume II

Alan Ross Anderson, Nuel D. Belnap, Jr., and J. Michael Dunn

In spite of a powerful tradition, more than two thousand years old, that in a valid argument the premises must be relevant to the conclusion, twentieth-century logicians neglected the concept of relevance until the publication of Volume I of this monumental work. Since that time relevance logic has achieved an important place in the field of philosophy. Volume II of *Entailment* brings to a conclusion a powerful and authoritative presentation of the subject by some of the foremost scholars working in the area.

Cloth: \$95.00 ISBN 0-691-07339-2

GUIDE TO AUTHORS

The *Journal* aims to provide a common ground where both philosophers and mathematicians can read and publish original and significant work in all areas of philosophical and mathematical logic, as well as the philosophy of language, and the philosophy, history, and foundations of mathematics.

Manuscripts should be sent in triplicate to **Editors, P.O. Box 5, Notre Dame, Indiana 46556, U.S.A.** Manuscripts are accepted for review with the understanding that the same work has not been and will not be published elsewhere, nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further that any person cited as a source of personal communications has approved such citation. Authors will be requested to sign a transfer of copyright to the *Notre Dame Journal of Formal Logic* so that the authors and publishers may be protected from misuse of copyrighted material even during the review process.

Form of Manuscript. All manuscripts must be typewritten in English, **double-spaced** (including notes and references) on one side of $8\frac{1}{2} \times 11$ inch or A4 white paper with 1 inch margins on all sides. To facilitate blind review by one or more readers, all indications of authorship should appear on a detachable cover page only. Handwritten symbols, non-Roman characters, and ambiguous symbols (1 vs. l, o vs. O and 0) should be identified in the margin.
