NOTRE DAME JOURNAL OF FORMAL LOGIC

Volume VI 1965

CONTENTS

Some thomistic reflections on the foundations of formal logic. By *Joseph J. Sikora S. J.* 1

The logic of either - or. By *Milton Fisk* 39

What is a science? By *Rolf Schock* 51

The Post - Lineal theorems for arbitrary recursively enumerable degrees of unsolvability. By *Ann H. Ihring* . . . 54

On the connections of the first - order functional calculus with $\aleph_0$ propositional calculus. By *Juliusz Reichbach* 73

An augmented modal logic. By *Leonard Goddard* 81

Modal logic with functorial variables and a contingent constant. By *C. A. Meredith and A. N. Prior* 99

Remarks on the linguistics foundations of physics. By *George L. Farre* 110

A set of axioms for the propositional calculus with implication and converse non - implication. By *Anjan Shukla* 123

On probability logics. By *Rolf Schock* 129

On logic and existence. By *Karel Lambert* 135

A modal extension of intuitionist logic. By *R. A. Bull* 142

Church's theorem on the decision problem. By *Thomas E. Patton* 147

An intuitive interpretation of systems of four - valued logic. By *Nicholas Rescher* 154

A note on a certain set theoretical formulas. By *Bolesław Sobociński* 157

Sur un théorème equivalent a l'axiome du choix. By *Wacław Sierpiński* 161

A generalization of Sierpiński's theorem on Steiner triples and the axiom of choice. By *William J. Frascella* 163

Note on a theorem of W. Sierpiński. By *Vladeta Vučković* . . . 180

A note on continuous games, the notion of strategy and Zermelo's axiom. By *Celso de Renna e Souza* 183

A note on the axiomatization of Rubin's System (S). By *John Thomas Canty* 190

The substitution schema in recursive arithmetic. By *R. D. Lee* 193

The written liar and Thomas Oliver. By *Ivo Thomas* 201

Axiomatization of propositional calculus with Sheffer functors. By *Thomas W. Scharle* 209

Mathematico - philosophical remarks on new theorems analogous to the fundamental theorem of arithmetic. By *Albert A. Mullin* 218

The arithmetic of the term - relational number theory. By *F. G. Asenjo* 223

Strong reducibility on hypersymple sets. By *T. G. McLaughlin* 229

On induction. By *Rolf Schock* 235

A quaternary relation as the primative notion in several geometries. By *Shirley Dowdy* 241

On predicate letter formulas which have no substitution instances provable in a first order language. By *Kenneth Weston* 296

Some results on finite axiomatizability on modal logic. By *E. J. Lemmon* 301

Systems classically axiomatized and properly contained in Lewis's S3. By *John Thomas Canty* 309

Leibniz's misunderstanding of Nisolius notion of 'multitudo'. By *Ignacio Angelelli* 319

Corrigendum and addendum to my paper "A generalization of Sierpiński's theorem on Steiner triples and the axiom of Choice". By *William J. Frascella* 323

The relation of weakly discrete to set and equinumerosity in mereology. By *Robert E. Clay* 325
