

CONTENTS

G. E. Andrews and W. H. Burge, Determinant identities	1
E. Boasso and A. Larotonda, A spectral theory for solvable Lie algebras of operators	15
S. A. Broughton, Simple group actions on hyperbolic Riemann surfaces of least area	23
M. Choda, Duality for finite bipartite graphs (with an application to II_1 factors)	49
M. G. Davidson and R. J. Stanke, Szegő maps and highest weight representations	67
Z. Ditzian and X. Zhou, Optimal approximation class for multivariate Bernstein operators	93
R. W. Fitzgerald, Witt rings under odd degree extensions	121
A. D. Forbes, Congruence properties of functions related to the partition function	145
C. C. Graham and A. T. M. Lau, Bilinear operators on $L^\infty(G)$ of locally compact groups	157
G. K. Martin and G. Thompson, Non-uniqueness of the metric in Lorentzian manifolds	177
E. Park, Index theory and Toeplitz algebras on one-parameter subgroups of Lie groups	189
