J. D. Arrison and M. Rich, <i>On nearly commutative degree one algebras</i>	533
B. A. Barnes, <i>Algebras with minimal left ideals which are Hilbert spaces</i>	537
R. F. Brown, <i>An elementary proof of the uniqueness of the fixed point index</i>	549
R. L. Carpenter, <i>Principal ideals in F-algebras</i>	559
C. C. Chang and Y. N. Moschovakis, <i>The Suslin-Kleene theorem for V_κ with cofinality $(\kappa) = \omega$</i>	565
T. S. Chihara, <i>The derived set of the spectrum of a distribution function</i>	571
T-G. Cho, <i>On the Choquet boundary for a nonclosed subspace of $C(S)$</i>	575
R. B. Darst, <i>The Lebesgue decomposition, Radon-Nikodym derivative, conditional expectation, and Martingale convergence for lattices of sets</i>	581
D. E. Fields, <i>Dimension theory in power series rings</i>	601
M. L. Fredman, <i>Congruence formulas obtained by counting irreducibles</i>	613
J. E. Gilbert, <i>On the ideal structure of some algebras of analytic functions</i>	625
G. Goss and G. Viglino, <i>Some topological properties weaker than compactness</i>	635
G. Grätzer and J. Sichler, <i>On the endomorphism semigroup (and category) of bounded lattices</i>	639
R. C. Lacher, <i>Cell-like mappings, II</i>	649
S. N. Lal, <i>On a theorem of M. Izumi and S. Izumi</i>	661
H. B. Lambert, <i>Differential mappings on a vector space</i>	669
R. G. Levin and T. Tamura, <i>Notes on commutative power joined semigroups</i>	673
R. E. Lewand and K. McCrimmon, <i>MacDonald's theorem for quadratic Jordan algebras</i>	681
J. A. Marti, <i>On some types of completeness in topological vector spaces</i>	707
W. J. Meyer, <i>Characterization of the Steiner point</i>	717
S. Mohamed, <i>Rings whose homomorphic images are q-rings</i>	727
T. O'Brien and W. Reddy, <i>Each compact orientable surface of positive genus admits an expansive homeomorphism</i>	737
R. J. Plemmons and M. T. West, <i>On the semigroup of binary relations</i>	743
C. R. Putnam, <i>Unbounded inverses of hyponormal operators</i>	755
W. T. Reid, <i>Some remarks on special disconjugacy criteria for differential systems</i>	763
C. A. Rogers, <i>The convex generation of convex Borel sets in Euclidean space</i>	773
S. Saran, <i>A general theorem for bilinear generating functions</i>	783
S. W. Smith, <i>Cone relationships of biorthogonal systems</i>	787
W. V. Vasconcelos, <i>On commutative endomorphism rings</i>	795
Vernon Zander, <i>Products of finitely additive set functions from Orlicz spaces</i>	799
ERRATA,	805

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. 39. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
