CONTENTS

Charles A. Akemann, *Approximate units and maximal Abelian C*-subalgebras* 543
Mir M. Ali, *On some extremal simplexes* 1
G. H. Atneosen, *Wild points of cellular arcs in 2-complexes in E^3 and cellular hulls* 551
Silvio Aurora, *On normed rings with monotone multiplication* . . 15
Silvio Aurora, *Normed fields which extend normed rings of integers* 21
Raymond Balbes and Alfred Horn, *Projective distributive lattices* . 273
John K. Beem, *Indefinite Minkowski spaces* 29
John F. Berglund, *On extending almost periodic functions* . . . 281
T. F. Bridgland, Jr., *Trajectory integrals of set valued functions* 43
J. L. Bryant and D. W. Sumners, *On embeddings of 1-dimensional compacta in a hyperplane in E^4* 555
Robert J. Buck, *A generalized Hausdorff dimension for functions and sets* 69
H. P. Dikshit, *On a class of Nörlund means and Fourier series* . 559
Vlastimil Dlab, *A characterization of perfect rings* 79
Nancy Dykes, *Generalizations of realcompact spaces* 571
E. Fadell, *Some examples in fixed point theory* 89
H. O. Fattorini, *Extension and behavior at infinity of solutions of certain linear operational differential equations* 583
Michael Freeman, *Tangential Cauchy-Riemann equations and uniform approximation* 101
B. J. Gardner, *Torsion classes and pure subgroups* 109
N. D. Glassman, *Cohomology of nonassociative algebras* 617
Vinod B. Goyal, *Bounds for the solutions of a certain class of nonlinear partial differential equations* 117
Neal Hart, *Ulm's theorem for Abelian groups modulo bounded groups* 635
Don Hinton, *Continuous spectra of second-order differential operators* 641
Alfred Horn, See Raymond Balbes and Alfred Horn
Fu Cheng Hsiang, *On $|C, 1|$ summability factors of Fourier series at a given point* 139
L. S. Husch, *Homotopy groups of PL-embedding spaces* 149
D. G. James, *On Witt's theorem for unimodular quadratic forms, II* 645
M. F. Janowitz, *Principal multiplicative lattices* 653
J. E. Keesling, *On the equivalence of normality and compactness in hyperspaces* 657

Adalbert Kerber, *Zu einer Arbeit von J. L. Berggren über Ambivalente Gruppen* 669
Keizō Kikuchi, *Various m-representative domains in several complex variables* 677
Guenter R. Krause, *Admissible modules and a characterization of reduced left Artinian rings* 291
E. M. Landesman and A. C. Lazer, *Linear eigenvalues and a nonlinear boundary value problem* 311
Anthony To-Ming Lau, *Extremely amenable algebras* 329
Aldo J. Lazar, *Sections and subsets of simplexes* 337
A. C. Lazer, See E. M. Landesman and A. C. Lazer
D. R. Lewis, *Integration with respect to vector measures* 157
M. J. S. Lim, $\mathscr{L} - 2$ *subspaces of Grassmann product spaces* . . 167
J. W. Macki and J. S. Muldowney, *The asymptotic behaviour of solutions to linear systems of ordinary differential equations* 693
A. R. Magid, *Locally Galois algebras* 707
V. J. Mancuso, *Mesocompactness and related properties* 345
E. L. Marsden, Jr., *The commutator and solvability in a generalized orthomodular lattice* 357
Shozo Matsuura, *Bergman kernel functions and the three types of canonical domains* 363
S. Mukhoti, *Theorems on Cesàro summability of series* 385
James S. Muldowney, See Jack W. Macki and James S. Muldowney
Stephen Pierce, *Orthogonal groups of positive definite multilinear functionals* 183
W. J. Pugh and S. M. Shah, *On the growth of entire functions of bounded index* 191
Ngô van Quê, *Classes de Chern et theoreme de Gauss-Bonnet* . . 393
A. Ramachandra Rao, See S. B. Rao and A. Ramachandra Rao
S. B. Rao and A. Ramachandra Rao, *Existence of triconnected graphs with prescribed degrees* 203
T. S. Ravisankar, *On differentiably simple algebras* 725
R. T. Rockafellar, *On the maximal monotonicity of subdifferential mappings* 209
R. Tyrrell Rockafellar, *Generalized Hamiltonian equations for convex problems of Lagrange* 411
Ken-iti Sato, *On dispersive operators in Banach lattices* 429
S. M. Shah, See W. J. Pugh and S. M. Shah
R. Shantaram, *Convergence of a sequence of transformations of distribution functions-II* 217
Julianne Souchek, *Rings of analytic functions* 233
J. G. Stampfli, *The norm of a derivation* 737
T. J. Suffridge, *The principle of subordination applied to func-*

tions of several variables 241
D. W. Sumners, See J. L. Bryant and D. W. Sumners
C. A. Swanson, *Comparison theorems for elliptic differential systems* 445
C. Y. Tang, *On uniqueness of central decompositions of groups* . 749
John G. Thompson, *Nonsolvable finite groups all of whose local subgroups are solvable, II* 451
R. C. Thompson, *Some matrix factorization theorems* 763
R. C. Thompson, *Some matrix factorization theorems, II* 811
Wei-Lung Ting, *On secondary characteristic classes in cobordism theory* 249
David J. Winter, *Cartan subalgebras of a lie algebra and its ideals* 537
Pak-Ken Wong, *Continuous complementors on B^*-algebras* 255
Miyuki Yamada, *On a regular semigroups in which the idempotents form a band* 261

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. **36**, 1539-1546. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is $8.00; single issues, $3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues $1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), 7-17, Fujimi 2-chome, Chiyoda-ku, Tokyo, Japan.

* Acting Managing Editor.
