CONTENTS

A. A. Albert, *Generalized twisted fields* 1
Tsuyoshi Andô, *Convergent sequences of finitely additive measures* 395
Richard Arens, *Operational calculus of linear relations* 9
Richard Arens, *The analytic-functional calculus in commutative topological algebras* 405
A. V. Balakrishnan, *Prediction theory for Markoff Processes* . . 1171
M. L. Balinski, *On the graph structure of convex polyhedra in n-space* 431
Dallas Banks, *Upper bounds for the eigenvalues of some vibrating systems* 1183
Richard E. Barlow, See Samuel Karlin, Frank Proschan and Richard E. Barlow
John E. Barrett, *Disconjugacy of a self-adjoint differential equation of the fourth order* 25
Paul R. Beesack, *Hardy's inequality and its extensions* 39
R. H. Bing, *Tame cantor sets in* E^3 435
A. Bialynicki-Birula, *On the field of rational functions of algebraic groups* 1205
Errett Bishop, *A Generalization of the Stone-Weierstrass theorem* 777
J. R. Blum and D. L. Hanson, *On invariant probability measures II* 63
Robert A. Bonic, *Symmetry in group algebras of discrete groups* 73
Thomas A. Brown, *Simple paths on convex polyhedra* 1211
H. D. Brunk, *Best fit to a random variable by a random variable measurable with respect to a 6-lattice* 785
R. C. Buck, *Multiplication operators* 95
C. E. Burgess, *Collections and sequences of continua in the plane. II* 447
L. Carlitz, *Some congruences of the bell polynomials* 1215
D. S. Carter, *Existence of a class of steady plane gravity flows* . 803
James H. Case, *Another 1-dimensional homogeneous continuum which contains an arc* 455
S. Cater, *On the theory of spatial invariants* 821
Jack G. Ceder, *Some generalizations of metric spaces* 105
S. Chowla, M. Dunton and D. J. Lewis, *Linear recurrences of order two* 833
Paul Civin and Bertram Yood, *The second conjugate space of a Banach algebra as an algebra* 847
Paul Civin, *Extensions of homomorphisms* 1223
Paul J. Cohen and Milton Lees, *Asymptotic decay of solutions of differential inequalities* 1235

W. J. Coles, *Wirtinger-type integral inequalities* 871
Lester E. Dubins, *On plane curves with curvature* 471
A. M. Duguid, *Feasible flows and possible connections* 483
M. Dunton, See S. Chowla, M. Dunton and D. J. Lewis
L. K. Durst, *Exceptional real Lucas sequences* 489
Meyer Dwass, *Random crossings of cummulative distribution functions* 127
Albert Edrei, Wolfgang H. J. Fuchs and Simon Hellerstein, *Radical distribution and deficiencies of the values of a meromorphic function* 135
I. Fáry, *Self-intersection of a sphere on a complex quadric* . . . 1251
Walter Feit and John G. Thompson, *Groups which have a faithful representation of degree less than* $(p - 1/2)$ 1257
William J. Firey, *Mean cross-section measures of harmonic means of convex bodies* 1263
S. R. Foguel, *Strongly continuous Markov processes* 879
D. J. Foulis, *Conditions for the modularity of an orthomodular lattice* 889
William C. Fox, *Harmonic functions with arbitrary local singularities* 153
Theodore Frankel, *Manifolds with positive curvature* 165
Avner Friedman, *A strong maximum principle for weakly subparabolic functions* 175
Avner Friedman, *The wave equation for differential forms* . . . 1267
Wolfgang H. J. Fuchs, See Albert Edrei, Wolfgang H. J. Fuchs and Simon Hellerstein
W. Fulks and J. O. Sather, *Asymptotics II: Laplace's method for multiple integrals* 185
A. M. Garsia and E. Rodemich, *An embedding of Riemann surfaces of genus one* 193
B. R. Gelbaum and J. Gil de Lamadrid, *Bases of tensor products of Banach spaces* 1281
R. K. Getoor, *Infinitely divisible probabilities on the hyperbolic plane* 1287
Irving Glicksberg, *Weak compactness and separate continuity* . . 205
Basil Gordon, *Sequences in groups with partial products* 1309
Jerzy Gorski, *The Sochocki-Plemelj formula for the functions of two complex variables* 897
John W. Gray, *Extensions of sheaves of associative algebras by nontrivial kernels* 909
Branko Grünbaum, *On a conjecture of H. Hadwiger* 215
F. J. Hahn, *On the action of a locally compact group on* E_n . . . 221
Maurice Hanan, *Oscillation criteria for third-order linear differential equations* 919

H. Hanani and M. Reichbach, *Some characterizations of a class of unavoidable compact sets in the game of Banach and Mazur* 945
D. L. Hanson, See J. R. Blum and D. L. Hanson
John Harvey, *Complete holomorphs* 961
Gertrude I. Heller, *On certain non-linear operators and partial differential equations* 495
Simon Hellerstein, See Albert Edrei, Wolfgang H. J. Fuchs and Simon Hellerstein
Joseph Hersch, *Physical interpretation and strengthening of M. H. Protter's methods for vibrating nonhomogeneous membranes; its analogue for Schrödinger's equation* 971
Magnus R. Hestenes, *Relative Hermitian matrices* 225
Magnus R. Hestenes, *Relative self-adjoint operators in Hilbert space* 1315
C. V. Holmes, *Automorphisms of monomial groups* 531
J. G. Horne, Jr., *Real commutative semigroups on the plane* . . 981
Wu-chung Hsing and Wu-yi Hsiang, *Those abelian groups characterized by their completely decomposable subgroups of finite rank* 547
Fu Cheng Hsiang, *On a theorem of Fejér* 1359
Wu-yi Hsiang, See Wu-chung Hsiang and Wu-yi Hsiang
Nai-chao Hsu, *The group of automorphisms of the holomorph of a group* 999
Bert Hubbard, *Bounds for eigenvalues of the free and fixed membrane by finite difference methods* 559
D. H. Hyers, *Transformations with bounded mth differences* . . 591
John M. Irwin and Elbert A. Walker, *On N-high subgroups of Abelian groups* 1363
John M. Irwin, *High subgroups of Abelian torsion groups* 1375
Richard Isaac, *Some generalizations of Doeblin's decomposition* . . 603
J. R. Isbell, *Uniform neighborhood retracts* 609
R. E. Johnson, *Quotient rings of rings with zero singular ideal* . 1385
H. H. Johnson, Correction to *"On terminating prolongation Procedures"* 1571
F. Burton Jones, *The cyclic connectivity of plane continua* . . . 1013
G. K. Kalisch, *On similarity invariants of certain operators in* L_p 247
J. A. Kalman, *Continuity and convexity of projections and barycentric coordinates in convex polyhedra* 1017
Samuel Karlin, Frank Proschan and Richard E. Barlow, *Moment inequalities of Pólya frequency functions* 1023
Yitzhak Katznelson and Walter Rudin, *The Stone-Weierstrass property in Banach algebras* 253

David G. Kendall and J. L. Mott, *The asymptotic distribution of the time-to-escape for comets strongly bound to the solar system* 1393
J. Kiefer, *On large derivations of the empiric D.F. of vector chance variables and a law of the iterated logarithm* 649
Samir A. Khabbaz, *The subgroups of a divisible group G which can be represented as intersections of divisible subgroups of G* . 267
Tilla Klotz, *Imbedding compact Riemann surfaces in 3-space* . . . 1035
Kurt Kreith, *The spectrum of singular self-adjoint elliptic operators* 1401
Marvin Isadore Knopp, *Construction of a class of modular functions and forms* 275
Marvin Isadore Knopp, *Construction of a class of modular functions and forms II* 661
J. Gil de Lamadrid, See B. R. Gelbaum and J. Gil de Lamadrid
Milton Lees, See Paul J. Cohen and Milton Lees
A. Lévy and R. Vaught, *Principles of partial reflection in the set theories of Zermelo and Ackermann* 1045
D. J. Lewis, *Two classes of diophantine equations* 1063

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced), and the author should keep a complete copy. Manuscripts may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, L. J. Paige at the University of California, Los Angeles 24, California.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. The price per volume (4 numbers) is $12.00; single issues, $3.50. Back numbers are available. Special price to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues, $1.25.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 2120 Oxford Street, Berkeley 4, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 6, 2-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.
