

Pacific Journal of Mathematics

IN THIS ISSUE—

Brownell, F. H., <i>Flows and noncommuting projections on Hilbert space</i>	1
Chrestenson, H. E., <i>A class of generalized Walsh functions</i>	17
Crockett, Jean Bronfenbrenner and Chernoff, Herman, <i>Gradient methods of maximization</i>	33
Fine, N. J., <i>On groups of orthonormal functions (I)</i>	51
Fine, N. J., <i>On groups of orthonormal functions (II)</i>	61
Gehring, F. W., <i>A note on a paper by L. C. Young</i>	67
Lambek, J. and Moser, L., <i>On the distribution of Pythagorean triangles</i>	73
Wild, Roy E., <i>On the number of primitive Pythagorean triangles with area less than n</i>	85
Lehman, R. Sherman, <i>Approximation of improper integrals by sums over multiples of irrational numbers</i>	93
Lehmer, Emma, <i>On the number of solutions of $u^k + D \equiv w^2 \pmod{p}$</i>	103
Stalley, Robert, <i>A modified Schnirelmann density</i>	119
Moore, Richard A., <i>The behavior of solutions of a linear differential equation of second order</i>	125
Whyburn, William M., <i>A nonlinear boundary value problem for second order differential systems</i>	147

Vol. 5, No. 1

March, 1955
