### Articles

<b>N. Cónsul, S. M. Oliva, M. Pellicer</b> , A PDE approach of inflammatory phase dynamics in diabetic wounds .....	265–293
<b>L. Szpiro, M. Tepper, P. Williams</b> , Resultant and conductor of geometrically semi-stable self maps of the projective line over a number field or function field .....	295–329
<b>M. De Falco, F. de Giovanni, C. Musella</b> , Groups with normality conditions for subgroups of infinite rank .....	331–340
<b>B. Matei, Y. Meyer, J. Ortega-Cerdà</b> , Stable sampling and Fourier multipliers .....	341–351
<b>Z. Chen, W. Ouyang</b> , Atomic decomposition of real-variable type for Bergman spaces in the unit ball of $\mathbb{C}^n$ .....	353–377
<b>T. Heikkinen, H. Tuominen</b> , Smoothing properties of the discrete fractional maximal operator on Besov and Triebel–Lizorkin spaces .....	379–399
<b>E. Amar</b> , On separated Carleson sequences in the unit disc .....	401–414
<b>A. Osękowski</b> , On restricted weak-type constants of Fourier multipliers .....	415–443
<b>A. J. Yucra Hanco, G. A. Lobos, V. Ramos Batista</b> , Explicit minimal Scherk saddle towers of arbitrary even genera in $\mathbb{R}^3$ .....	445–468
<b>J. A. Cuenca Mira</b> , Third-power associative absolute valued algebras with a nonzero idempotent commuting with all idempotents .....	469–484
<b>A. Greco</b> , Comparison principle and constrained radial symmetry for the subdiffusive $p$ -Laplacian .....	485–498
<b>D. Skodlerack</b> , Embeddings of local fields in simple algebras and simplicial structures .....	499–516
<b>F. Nazarov, X. Tolsa, A. Volberg</b> , The Riesz transform, rectifiability, and removability for Lipschitz harmonic functions .....	517–532
