

VOLUME 27 NO. 2 2001–2002

REAL ANALYSIS EXCHANGE

CONTENTS

EDITORIAL MESSAGES	401
CONTRIBUTIONS	403
CONFERENCE ANNOUNCEMENTS	
Summer Symposium 2003 – the Forest Symposium	
June 23–29, 2003	405
Sixteenth Spring Auburn Miniconference on Real Analysis	
Friday-Saturday, March 28-29, 2003	406
RESEARCH ARTICLES	
Judit Kardos	
Hausdorff Dimension of Centered Sets	407
Ilona Ćwiek, Ryszard J. Pawlak and Bożena Świątek	
On Some Subclasses of Baire 1 Functions	415
Francis Jordan	
Generalizing the Blumberg Theorem	423
Jozef Bobok and Milan Kuchta	
Irrational Twist Systems for Interval Maps	441
Harvey Rosen	
Porosity of the Extendable Connectivity Function Space	457
M. H. Hooshmand Estahbanti	
Limit Summability of Real Functions	463
A. Boccutto and D. Candeloro	
Dieudonné-Type Theorems for Set Functions with Values	
in (l) -Groups	473
Attila Gilányi and Zsolt Páles	
On Dinghas-Type Derivatives and Convex Functions	
of Higher Order	485
Chew Tuan-Seng, Tay Jing-Yi and Toh Tin-Lam	
The Non-Uniform Riemann Approach to Itô's Integral	495
Davide La Torre and Matteo Rocca	
A Characterization of $C^{k,1}$ Functions	515
Richard Delaware	
Sets Whose Hausdorff Measure Equals Method I Outer Measure	535
Themis Mitsis	
Norm Estimates for the Kakeya Maximal Function	
with Respect to General Measures	563
Udayan B. Darji and Michael J. Evans	
A First Return Examination of the Lebesgue Integral	573
Petteri Harjulehto	
Sobolev Extension Domains on Metric Spaces of Homogeneous Type	583

Ewa Strońska	
Maximal Families for the Class of Upper and Lower Semi-Quasicontinuous Functions	599
Zuzana Bukovská and Lev Bukovský	
Comparing Families of Thin Sets	609
Emmanuel Cabral and Lee Peng-Yee	
The Primitive of a Kurzweil-Henstock Integrable Function in Multidimensional Space	627

INROADS

Paolo Roselli	
The Riesz Approach to the Lebesgue Integral and Complete Function Spaces	635
Zbigniew Grande	
On Functions of Two Variables Whose Vertical Sections Have Closed Graphs	661
Lu Jitan, Lee Peng-Yee and Lee Tuo-Yeong	
A Theorem of Nakanishi for the General Denjoy Integral	669
Lu Shi-Pan and Lin Ying-Jian	
Decomposition of Variational Measure and the Arc-Length of a Curve in \mathbb{R}^n	673
Jean-Christophe Feauveau	
A Characterization of Compact Parts of L^p Spaces Application to Sobolev Embeddings	683
Andrzej Nowik	
On Some Properties of the Class of Real Functions with λ and λ' Graphs	711
Sebastian Lindner	
Generalization of the Banach Indicatrix Theorem	721
Chew Tuan Seng	
On Henstock's Inner Variation and Strong Derivatives	725
Marianna Csörnyei	
Lipschitz Image of Lipschitz Functions	735
Alan Macdonald	
Stokes' Theorem	739
Artur Bartoszewicz and Krzysztof Ciesielski	
MB-Representations and Topological Algebras	749
Boaz Tsaban	
A Diagonalization Property between Hurewicz and Menger	757
Szymon Głąb	
Local and Global Monotonicity	765
Marcin Grande	
On The Sets of Discontinuity Points of Functions Satisfying Some Approximate Quasi-Continuity Conditions	773
Krzysztof Ciesielski, Hajrudin Fejzić and Chris Freiling	
Measure Zero Sets with Non-Measurable Sum	783

Juris Steprāns	
The Almost Disjointness Cardinal Invariant in the Quotient Algebra of the Rationals Modulo the Nowhere Dense Subsets	. 795
Marek Lampart	
.	801
