

VOLUME 26 NO. 1 2000-2001

REAL ANALYSIS EXCHANGE

CONTENTS

1 Editorial Message

3 CONFERENCE ANNOUNCEMENTS

Summer Symposium in Real Analysis XXV

May 22–26, 2001 in Ogden Utah

RESEARCH ARTICLES

- 5 Chris Freiling
The Equivalence of Universal and Ordinary First-Return Differentiation
- 17 Peter Wingren
Dimensions of Graphs of Functions and Lacunary Decompositions of Spline Approximations
- 27 K. E. Hallowell, S. Manickam and J. M. Dolan
On the Fractional Parts of the Sequence $\{\xi\beta_n - a\}$
- 35 V. Ene
Thomson's Variational Measure and Nonabsolutely Convergent Integrals
- 51 Vasile Ene
A Study of Some General Integrals that Contains the Wide Denjoy Integral
- 101 M. Eugenia Mera and Manuel Morán
Attainable Values for Upper Porosities of Measures
- 117 P. Muldowney
The Henstock Integral and the Black-Scholes Theory of Derivative Asset Pricing
- 133 Zoltán Buczolic and Judit Nagy
Hölder Spectrum of Typical Monotone Continuous Functions
- 157 Bruno Giroto and Silvano Holzer
Weak Convergence of Bounded, Monotone Set Functions in an Abstract Setting
- 177 J. Ewert and S. P. Ponomarev
On the Generalized Lindeöf Property
- 195 Harvey Rosen
Porosity in Spaces of Darboux-Like Functions
- 201 T. H. Steele
The Essential Point Set of a Continuous Function
- 217 A. Meskhi
Criteria for the Boundedness and Compactness of Generalized One-Sided Potentials
- 237 Zbigniew Duszyński
An Oscillation Functions on the Real Line
- 245 Grażyna Kwiecińska
On the Intermediate Value Property of Multivalued Functions
- 261 H. E. Brink and P. Maritz
On the Extension of Set-Valued Set Functions
- 277 Stoyu Barov and Jan J. Dijkstra
More on Compacta with Convex Projections
- 285 Alessandro Andretta and Alberto Marcone
Definability in Function Spaces
- 311 Alexander Krantsberg

- 325 A Representation of Martingale Differences and Orthogonal Systems of Unconditional Convergence Almost Everywhere
Martin Dindoš
- 345 An Interesting New Metric and Its Applications to Alternating Series
Jan Lang, Aleš Někveda and Jiří Rákosník
- 365 Continuous Norms and Absolutely Continuous Norms in Banach Function Spaces are not the Same
Jolanta Jaloča
- 371 Quotients of Darboux Functions
B. Bongiorno, L. Di Piazza and V. Skvortsov
- On the Perron Integral Defined by Ordinary Derivates

INROADS ARTICLES

- 381 Constantin Volintiru
A Proof of the Fundamental Theorem of Calculus Using Hausdorff Measures
- 391 Lech Bartłomiejczyk
Iterative Roots with Big Graph
- 401 David Preiss and Luděk Zajíček
On Dini and Approximate Dini Derivates of Typical Continuous Functions
- 413 Hussain Elalaoui-Talibi
On Marczewski-Burstin Like Characterizations of Certain σ -Algebras and σ -Ideals
- 417 Mariola Marciniak
Finitely Continuous, Darboux Functions
- 421 Hanxiang Chen
Adjoint Classes of Lebesgue-Stieltjes Integrable Functions
- 429 Zbigniew Grande
On Discrete Limits of Sequences of Bilaterally Quasicontinuous, Baire 1 Functions
- 437 Katarzyna Chmielewska
On Strong Product Measurability
- 445 Toby C. O'Neil
Graphs of Continuous Functions from \mathbb{R} to \mathbb{R} Are Not Purely Unrectifiable
- 449 Radu Miculescu
Approximation of Continuous Functions by Lipschitz Functions
- 453 Inder K. Rana
Existence of Measures with Dominated Translates
- 457 Katarína Janková
Points Generating the Principal Measure of Chaos
- 467 Guanzhen Zhou and Songping Zhou
On Series of Non-Negative Terms
- 471 Jean-Christophe Feauveau
Approximation Theorems for Generalized Riemann Integrals
- 485 Giovanni Alberti, Marianna Csörnyei, Miklós Laczkovich, David Preiss
Denjoy-Young-Saks Theorem for Approximate Derivatives Revisited
