|                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Y. H. LEE: Polynomial growth harmonic functions on complete Riemannian manifolds . . . . .                                                           | 315 |
| V. N. KOLOKOL'TSOV, R. L. SCHILLING AND A. E. TYUKOV: Estimates for multiple stochastic integrals and stochastic Hamilton-Jacobi equations . . . . . | 333 |
| T. MITSIS: $(n, 2)$ -sets have full Hausdorff dimension . . . . .                                                                                    | 381 |
| A. AYACHE: Hausdorff dimension of the graph of the Fractional Brownian Sheet . . . . .                                                               | 395 |
| M. J. ALEJANDRE, A. BALLESTER, J. COSSEY AND M. C. PEDRAZA: On some permutable products of supersoluble groups . . . . .                             | 413 |
| A. CIANCHI: Optimal Orlicz-Sobolev embeddings . . . . .                                                                                              | 427 |
| A. ELDUQUE: The Magic Square and Symmetric Compositions . . . . .                                                                                    | 475 |
| V. KOKILASHVILI AND S. SAMKO: Maximal and Fractional Operators in Weighted $L^{p(x)}$ Spaces . . . . .                                               | 493 |
| K. E. HARE AND W. L. YEE: The Singularity of Orbital Measures on Compact Lie Groups . . . . .                                                        | 517 |
| A. NAGEL AND E. M. STEIN: On the product theory of singular integrals . . . . .                                                                      | 531 |
| D. SUÁREZ: Approximation and symbolic calculus for Toeplitz algebras on the Bergman space . . . . .                                                  | 563 |
| P. CALDIROLI AND R. MUSINA: Existence of H-bubbles in a perturbative setting . . . . .                                                               | 611 |
