ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 26 Spring 1996 Number 2

CONTENTS

Rings of Endomorphisms of Semigroup-Graded Modules
By Gene Abrams and Claudia Menini 375

A New Sufficient Condition for the Denseness of Norm Attaining Operators
By María D. Acosta, Francisco J. Aguirre and Rafael Payá ... 407

Decaying Solutions of Elliptic Systems in R^n
W. Allegretto and P.O. Odiobala 419

Factorization in Commutative Rings with Zero Divisors
By D.D. Anderson and Silvia Valdes-Leon 439

On Martindale's Theorem
By P.N. Ánh and L. Márki 481

Some Subclasses of BMOA and their Characterization in Terms of Carleson Measures
By R. Aulaskari, David A. Stegenga and Jie Xiao 485

Closed Geodesics on Ideal Polyhedra of Dimension 2
By C. Charitos 507

L_p Matrix Coefficients for Nilpotent Lie Groups
By Lawrence Corwin and Calvin C. Moore 523

Piecewise Monotonic Doubling Measures
By David Cruz-Uribe, SFO 545

On Convergence of Conditional Expectation Operators
By C. Bryan Dawson 585

The Baer-Kaplansky Theorem for a Class of Global Mixed Groups
By Steve T. Files and William J. Wickless 593

A Set of Polynomials Associated with the Higher Derivatives of $y = x^x$
By H.W. Gould 615

Cauchy Transforms of Measures and Weighted Shift Operators on the Disc Algebra
By R. Hibschweiler and E. Nordgren 627

The Penney-Fujiwara Plancherel Formula for Gelfand Pairs
By Ronald L. Lipsman 655

CONTENTS CONTINUED ON BACK PAGE

The Spectral Theory of Second Order Two-Point Differential Operators III. The Eigenvalues and Their Asymptotic Formulas
By John Locker 679

Ultrafilters over $\mathbf{N}$ and Operators on L^1
By Minos A. Petrakis 707

Zeta Regularized Products and Functional Determinants on Spheres
By J.R. Quine and J. Choi 719

The Asymptotic Behavior of a Reducible System of Nonlinear Integral Equations
By J. Radcliffe and L. Rass 731

On Solvable Quintics $X^5 + aX + b$ and $X^5 + aX^2 + b$
By Blair K. Spearman and Kenneth S. Williams 753

Quaternionic Bundles on Algebraic Spheres
By Richard G. Swan 773
