

THE ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 15

Fall 1985

Number 4

CONTENTS

On a theorem of Bernstein By M. A. MALIK	765
Boundary behavior and monotonicity estimates for solutions to nonlinear diffusion equations By PAUL DUCHATEAU	769
Interpolating sequences on curves By S.A. OBAID AND D.C. RUNG	787
Derivative and approximation theorems on local fields By ZHENG WEI-XING	801
Triple products in the category of spectra over a space By JAMES H. FIFE	817
Basic quasi-proximities, grills and compactifications By R.N. HAZRA AND K.C. CHATTOPADHYAY	835
p-Valent classes related to convex functions of complex order By M.K. AOUF	853
Index to Volume 15	865
