

THE ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 11

Winter 1981

Number 1

CONTENTS

Constructions of weak inverse property loops By K.W. JOHNSON AND B.L. SHARMA	1
A differential characterization of multiplicity sequences over arbitrary fields By W.C. BROWN	9
The class number of $Q(\sqrt{-2p})$ modulo 8, for $p \equiv 5 \pmod{8}$ is prime By KENNETH S. WILLIAMS	19
Generators of principal left ideals in a noncommutative algebra By PIERRE A. VON KAENEL	27
Quotients of $C(X)$ by uniform algebras By S.J. SIDNEY	31
Diffusion in Fisher's population model By K.P. HADELER	39
On theorems of B.H. Neumann concerning FC-groups By M.J. TOMKINSON	47
A maximum principle for weakly coupled systems of second order partial differential equations with nonnegative characteristic form By CHRIS COSNER	59
A singular perturbation approach to nonlinear shell theory By GERHARD RUPPRECHT	75
On the initial boundary-value problem for nonhomogeneous incompressible heat conducting fluids By BUI AN TON	99
Wildness and flatness of codimension one spheres having double tangent balls By R.J. DAVERMAN AND L.D. LOVELAND	113
Pseudocompactness via graphs and projections By JAMES E. JOSEPH	123
On confluent mappings and essential mappings - A survey By J. GRISPOLAKIS AND E.D. TYMCHATYN	131
Corrections to Volume 9	154
