**Journals.** The scientific journals of the Institute are *The Annals of Applied Probability*, *The Annals of Probability*, *The Annals of Statistics* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

**Individual and Organizational Memberships.** All *individual members* pay basic membership dues of \$50. Each regular member must elect to receive at least one scientific journal for an additional amount, as follows: *The Annals of Applied Probability* (\$10), *The Annals of Probability* (\$20), *The Annals of Statistics* (\$20) or *Statistical Science* (\$10). Of the total dues paid, \$24 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Reduced membership dues are available to full-time students, permanent residents of countries designated by the IMS Council and retired members. Retired members may elect to receive *The IMS Bulletin* only for \$20. *Organizational memberships* are available to nonprofit organizations at \$425 per year and to for-profit organizations at \$700 per year. Organizational memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

**Individual and General Subscriptions.** Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1993 are available to *The Annals of Applied Probability* (\$70), *The Annals of Probability* (\$80), *The Annals of Statistics* (\$80), *The IMS Bulletin* (\$45) and *Statistical Science* (\$70). *General subscriptions* are for libraries, institutions and any multiple-readership use. General subscriptions for 1993 are available for *The Annals of Applied Probability* (\$70), *The Annals of Probability* (\$130), *The Annals of Statistics* (\$130), *The IMS Bulletin* (\$50) and *Statistical Science* (\$75). Air mail rates for delivery outside North America are \$80 per title (excluding *The IMS Bulletin*).

**Permissions policy.** Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$7.50 per copy, plus \$.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0883-4237/93 \$7.50 + .00.

**Correspondence.** Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Production Editor, Patrick Kelly, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302.

## AXIOM: THE SCIENTIFIC COMPUTATION SYSTEM

*"I strongly recommend that statisticians acquaint themselves with AXIOM for at least two very good reasons. Its algebraic strength offers help with the combinatoric problems of design of experiments, while the tensor-calculus facilities can provide powerful tools for likelihood inference"*

## ITSM: AN INTERACTIVE TIME SERIES MODELLING PACKAGE FOR THE PC

Designed for the analysis of linear time series and the practical modelling and prediction of data collected sequentially in time. It provides the reader with a practical understanding of the six programs contained in the ITSM software (PEST, SPEC, SMOOTH, TRANS, ARVEC, and ARAR). This IBM compatible software contains an easy to use menu system and is accessible to those with little or no previous computational experience. Intended as a supplement to the second edition of Time Series: Theory and Methods, it can also be used in conjunction with most undergraduate and graduate texts on time series analysis.

## A GUIDE TO SPSS/PC+

SPSS (The Statistical Package for the Social Sciences) is a computer program which enables data from surveys and experiments to be analyzed fully and flexibly. This book teaches SPSS/PC+ (a PC version of the software) in a way that goes beyond the manuals. It provides an overview and in a progressive tutorial fashion brings the reader to the point where they can take full advantage of the system.
