The Institute of Mathematical Statistics
announces publication of the

CUMULATIVE INDEX TO IMS SCIENTIFIC JOURNALS 1960–1989

- Indexes the following journals:

  The Annals of Mathematical Statistics (Vols. 31-43, 1960-1972)
  The Annals of Statistics (Vols. 1-17, 1973-1989)
  The Annals of Probability (Vols. 1-17, 1973-1989)
  Statistical Science (Vols. 1-4, 1986-1989)
  Selected articles from *The IMS Bulletin* (Vols. 16-18, 1987-1989)

- Follows the same format as the *Current Index to Statistics,* including author and subject indexes:

  Author index lists each author of each article. Lists are chronological for each author.

  Subject index lists each article according to important words in its title and key words not appearing in the title.

Published by the Institute of Mathematical Statistics. Publication of the *Cumulative Index to IMS Scientific Journals* is expected in early 1991.

List price $50
IMS member price $15

Orders are now being accepted at the above prices, with shipping upon availability. Order prepaid from:

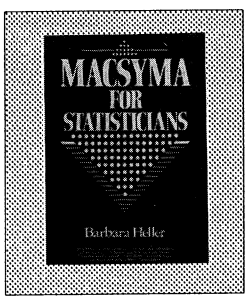
☐ Statistical Intervals: A Guide for Practitioners

Gerald J. Hahn and
William Q. Meeker

A comprehensive treatment combining tried and true methods with some published for the first time in book form, this guide explains how to use different types of statistical intervals to express and quantify uncertainty in data. Emphasizes practical considerations and illustrates these throughout with a wide variety of examples from industry.

*1-88769-2 Aug. 1991 320pp $44.95**

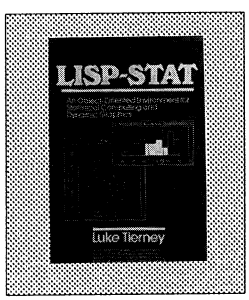


☐ Fundamentals of Exploratory Analysis of Variance

Edited by David C. Hoaglin,
Frederick Mosteller, and
John W. Tukey

Approaching analysis of variance (ANOVA) from an exploratory point of view while retaining customary least squares fitting methods, this book goes beyond the standard steps of the ANOVA table to emphasize both individual observations and the separate parts that the analysis produces. Intended as an introduction to ANOVA, the material is self-contained and thoroughly illustrated.

*1-52735-1 Aug. 1991 512pp $49.95**

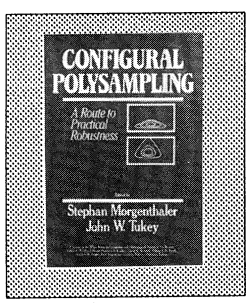


☐ Design and Inference in Finite Population Sampling

A. S. Hedayat and
B. K. Sinha

This new text not only covers classic sampling plans and procedures but also new developments, and topics such as superpopulation approach, randomized response, nonresponse and resampling techniques. Includes extensive sets of problems, and excellent references.

1-88073-6 July 1991 400pp $49.95



* indicates a tentative prepublication price

☐ Forecasting with Dynamic Regression Models

Alan Pankratz

Contains descriptions of the basic concepts and practice of building, using, and interpreting single equation dynamic regression models. Featuring recent time series advances that have become increasingly important in single equation regression forecasting, special attention is given to possible dynamic patterns. Practical rules for identifying rational form transfer functions are included along with detailed applications and case studies.

*1-61528-5 Oct. 1991 478 pp $49.95**

☐ Configural Polysampling: A Route to Practical Robustness

Edited by Stephen Morgenthaler
and J. W. Tukey

An introduction to the fundamentals of conditional inference and their applications to the robustness problem of statistical inference. Coverage focuses on confrontations of a small number of suitably disparate shapes and invariance, featuring models that contain at least two alternative distributions.

1-52372-0 April 1991 248pp $39.95

☐ Lisp-Stat: An Object-Oriented Environment for Statistical Computing and Dynamic Graphics

Luke Tierney

Describing a system for statistical computing and dynamic graphics, this book shows how to use functional and object-oriented programming styles in statistical computing. Lisp-Stat also allows statisticians without specialized training in graphics programming to use, experiment with and develop new techniques.

1-50916-7 Oct. 1990 496 pp $39.95

☐ Statistics for Spatial Data

Noel Cressie

An examination of the analysis of spatial data by way of statistical models, this reference offers a balanced blend of theory and applications. Presenting a unified treatment of many areas in consistent notation and delineating geostatistical data, lattice data, and point patterns—the three most rigorous areas of growth—it brings together material largely excluded from the statistical literature. In addition, the author proposes new methods and illustrates their applications.

*1-843376-9 Sept. 1991 848 pp $79.95**

☐ Statistical Inference for Branching Processes

Peter Guttorp

Using one of the simplest possible cases, this book illustrates the problem of statistical inference that can arise when the standard assumption of independent observations is relaxed. Contains observations on the generation sizes of a Bienayme-Galton-Watson process. In addition, problems of conditional inference and ancilliarity in stochastic processes are presented, both for estimation and testing problems.

1-82291-4 July 1991 224pp $44.95

☐ MACSYMA for Statisticians

Barbara Heller

Introduces statisticians and mathematicians to the basic principles and wide-ranging applications of this especially useful system. Tutorial format leads readers through performance of a wide variety of functions—including mathematical computations, algebraic manipulations and simplifications, differentiation, integration, numerical procedures, asymptotic expansions, and the taking of limits—faster, more accurately, and with less effort.

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.

OFFICERS AND EDITORS

President:
Willem R. van Zwet, Department of Mathematics, University of Leiden, P.O. Box 9512, 2300 RA Leiden, The Netherlands

President-Elect:
Lawrence D. Brown, Department of Mathematics, White Hall, Cornell University, Ithaca, New York 14853-7901

Past President:
David O. Siegmund, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305-4065

Executive Secretary:
Diane M. Lambert, AT&T Bell Laboratories, 600 Mountain Avenue, Room 2C-256, Murray Hill, New Jersey 07974

Treasurer:
Jessica Utts, Division of Statistics, University of California, Davis. *Please send correspondence to*: IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545

Program Secretary:
Robert E. Kass, Department of Statistics, Carnegie Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The Annals of Statistics*
Arthur Cohen, Department of Statistics, Busch Campus, Rutgers University, New Brunswick, New Jersey 08903

Editor: *The Annals of Probability*
Burgess Davis, Departments of Mathematics and Statistics, Purdue University, West Lafayette, Indiana 47907

Editor: *The Annals of Applied Probability*
J. Michael Steele, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302

Executive Editor: *Statistical Science*
Carl N. Morris, Department of Statistics, Science Center, Harvard University, 1 Oxford Street, Cambridge, Massachusetts 02138

Editor: *The IMS Bulletin*
George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6

Editor: *The IMS Lecture Notes—Monograph Series*
Robert J. Serfling, Department of Mathematical Sciences, Johns Hopkins University, Baltimore, Maryland 21218

Managing Editor:
Roger L. Berger, Department of Statistics, Box 8203, North Carolina State University, Raleigh, North Carolina 27695

Managing Editor:
Robert Smythe, Department of Statistics, George Washington University, 2201 G Street N.W., Washington, D.C. 20052

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, *The Annals of Applied Probability*, and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual and Organizational Memberships. All *individual members* receive *The IMS Bulletin* for basic membership dues of $40. Each regular member must elect to receive at least one scientific journal for an additional amount, as follows: *Statistical Science* ($10), *The Annals of Statistics* or *The Annals of Probability* ($20), *The Annals of Statistics* and *The Annals of Probability* ($30), or *The Annals of Applied Probability* ($10). Of the total dues paid, $24 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Reduced membership dues are available to full-time students, permanent residents of countries designated by the IMS Council, and retired members. Retired members may elect to receive the *Bulletin* only for $16. *Organizational memberships* are available to nonprofit organizations at $350 per year and to for-profit organizations at $650 per year. Organizational memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1991 are available to *The Annals of Statistics* and *The Annals of Probability* ($90), *The Annals of Statistics* or *The Annals of Probability* ($60), *Statistical Science* ($50), *The Annals of Applied Probability* ($50), and *The IMS Bulletin* ($30). *General subscriptions* are for libraries, institutions, and any multiple-readership use. General subscriptions for 1991 are available for *The Annals of Statistics* ($110), *The Annals of Probability* and *The Annals of Applied Probability* ($150), *Statistical Science* ($60), *The Annals of Applied Probability* only ($60), and *The IMS Bulletin* ($40). Multi-item subscriptions are discounted by 10% for two items and 15% for three or more items. Air mail rates for delivery outside of North America are $65 per title.

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of $7.50 per copy, plus $.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0883-4237/91 $7.50 + .00.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Production Editor, Patrick Kelly, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302.

Springer for Statistics

C.-E. Särndal, University of Montreal; **B. Swensson,** University of Örebro; and **J. Wretman,** University of Stockholm

Model Assisted Survey Sampling

Featuring the model assisted approach to estimation in surveys, this book stresses important general principles for estimation and analysis in surveys. This includes the use of modelling in sampling, stating the precision in survey estimates, use of supplementary information, e.g. from census or administrative files, nonresponse and missing data, regression and other types of statistical analysis of survey data, survey errors and error models, and estimation for subpopulations and small areas.

Intended for statistics students, survey methodologists and those engaged in survey research in a variety of disciplines.

1991/app. 600 pp., 8 illus./Hardcover/$59.00
ISBN 0-387-97528-4
Springer Series in Statistics

A. Buja and **P. Tukey,** Bell Communications Research, Morristown, NJ *(Eds.)*

Computing and Graphics in Statistics

Presents issues that arise in the development of integrated statistical software systems which have led to the adaptation of ideas from computer science, particularly programming environments, programming paradigms, and artificial intelligence. Examples are given that distinguish statistics from many physical sciences such as genuine high-dimensional objects, multivariate data or functions of many variables. Demonstrates automatic methods for finding reasonable domains and ranges for plotting univariate functions. Deals with computer intensive methodology including the bootstrap method, Bayesian inference and its associated integration problems.

1991/app. 255 pp., 98 illus./Hardcover/$35.00 (tent.)
ISBN 0-387-97633-7
The IMA Volumes in Mathematics and its Applications, Vol. 36

New Softcover Edition!

I. Karatzas, Columbia University, New York, NY; and **S. Shreve,** Carnegie Mellon University, Pittsburgh, PA

Brownian Motion and Stochastic Calculus

Contains a detailed discussion of weak and strong solutions of stochastic differential equations and a study of local time for semimartingales, with special emphasis on the theory of Brownian local time. Designed as a text for graduate courses in stochastic processes, the text is complemented by a large number of problems and exercises.

1991/470 pp., 10 illus./Softcover/$39.00
ISBN 0-387-97655-8
Graduate Texts in Mathematics, Vol. 113

D. Revuz and **M. Yor,** Université P. et M. Curie, Paris, France

Continuous Martingales and Brownian Motion

Provides a detailed study of Brownian motion, via Itô Stochastic calculus of continuous processes. It should facilitate the reading and understanding of research papers in this area and be of interest to both graduate students and to more advanced readers, either working with stochastic processes or conducting research in areas involving stochastic processes such as mathematical physics, economics, and engineering. Emphasis is placed on methods and a large number of exercises are included.

1990/576 pp., 8 illus./Hardcover/$89.00
ISBN 0-387-52167-4
Grundlehren der mathematischen Wissenschaften, Vol. 293

W. Härdle, Université Catholique de Louvain, Belgium

Smoothing Techniques

With Implementation in S

Provides a non-technical introduction into the area of non-parametric density and regression function estimation in terms of the S computing environment. The averaging of data points in a prescribed environment, a principal feature of smoothing, is not practical in dimensions greater than three if there are only one hundred data points. Additive models provide a way out of this dilemma but they require highly effective algorithms. Hence, the method of WARPing (Weighted Averaging using Rounded Points) is described in great detail. The book is addressed to both the theoretical and applied statistician and can be used as an undergraduate text.

1990/261 pp., 87 illus./Hardcover/$39.00
ISBN 0-387-97367-2
Springer Series in Statistics

M. West, Duke University, Durham, NC; and **J. Harrison,** University of Warwick, Coventry, UK

Bayesian Forecasting and Dynamic Models

From the reviews —

"An introductory chapter spells out the principles of modeling, learning and forecasting, using a classical Bayesian structure. These principles are then illustrated with a simple first-order polynomial model and a dynamic regression model...Chapters contain sets of exercises that either fill in the detail of mathematical calculations given in the text, or are practically oriented and illustrate applications of the theories discussed in the text...A very thorough treatment...For upper-division undergraduate students and above in statistics and mathematics." —CHOICE
