

The Annual Index to the Statistical
Literature of the World

**CURRENT INDEX TO STATISTICS
APPLICATIONS, METHODS AND THEORY
VOLUME 13 (1987)–NOW AVAILABLE**

- Approximately 10,000 articles from "core" and "related" journals and books indexed for 1987.
- Complete coverage of over 80 journals in statistics and related fields.
- Statistics articles selected and indexed from many other journals.
- Subject index lists each article alphabetically according to each *important word* in its title.
- Subject index also lists articles alphabetically according to *key words* not appearing in the title.
- Author index lists each article under the name of each author.
- Reasonable prices:

Volumes 1-14

IMS/ASA Members	\$18
Other individuals	\$25
Other institutions	\$54

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association. Volumes 1-13 are available now at the above prices. Publication of Volume 14 (1988) is expected late in 1989. Orders for Volume 14 are now being accepted at the above prices, with shipping upon availability. Please specify applicable rate and volume number(s) desired. Order prepaid from:

Differential Geometry in Statistical Inference

*by S.-I. Amari, O. E. Barndorff-Nielsen, R. E. Kass, S. L. Lauritzen,
and C. R. Rao*

The papers collected here present, in a concise yet comprehensive form, several major developments of recent research on differential geometry in statistics.

Contents

Introduction by R. E. Kass

Differential Geometrical Theory of Statistics–Towards New Developments

by S.-I. Amari

Introduction; Geometrical Structure of Statistical Models; Higher-Order Asymptotic Theory of Statistical Inference in Curved Exponential Family; Information, Sufficiency and Ancillarity Higher Order Theory; Fibre-Bundle Theory of Statistical Models; Estimation of Structural Parameter in the Presence of Infinitely Many Nuisance Parameters; Parametric Models of Stationary Gaussian Time Series; References

Differential and Integral Geometry in Statistical Inference by O. E. Barndorff-Nielsen

Introduction; Review and Preliminaries; Transformation Models; Transformation Submodels; Maximum Estimation and Transformation Models; Observed Geometries; Expansion of $c_{jj}^{1/2}$; Exponential Transformation Models; Appendices and References

Statistical Manifolds by S. L. Lauritzen

Introduction; Some Differential Geometric Background; The Differential Geometry of Statistical Models; Statistical Manifolds; The Univariate Gaussian Manifold; The Inverse Gaussian Manifold; The Gamma Manifold; Two Special Manifolds; Discussion and Unsolved Problems; References

Differential Metrics in Probability Spaces by C. R. Rao

Introduction; Jensen Difference and Entropy Differential Metric; The Quadratic Entropy; Metrics Based on Divergence Measures; Other Divergence Measures; Geodesic Distances; References

List price \$25

IMS member price \$15

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.

OFFICERS AND EDITORS

President:

Ram Gnanadesikan, Morris Research and Engineering Center, Bell Communications Research, 435 South Street, Morristown, New Jersey 07960-1961

President-Elect:

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907.

Past President:

Bradley Efron, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

Executive Secretary:

Peter Purdue, Department of Operations Research, Code 55, Naval Postgraduate School, Monterey, California 93943

Treasurer:

Jessica Utts, Division of Statistics, University of California, Davis. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545

Program Secretary:

Lynne Billard, Department of Statistics, University of Georgia, Athens, Georgia 30602

Editor: *The Annals of Statistics*

Arthur Cohen, Department of Statistics, Busch Campus, Rutgers University, New Brunswick, New Jersey 08903

Editor: *The Annals of Probability*

Peter Ney, Department of Mathematics, Van Vleck Hall, University of Wisconsin, 480 Lincoln Drive, Madison, Wisconsin 53706

Executive Editor: *Statistical Science*

Carl N. Morris, Statistical Sciences Center, RLM 8.100, University of Texas, Austin, Texas 78712

Editor: *The IMS Bulletin*

George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6

Editor: *The IMS Lecture Notes—Monograph Series*

Robert J. Serfling, Department of Mathematical Sciences, Johns Hopkins University, Baltimore, Maryland 21218

Managing Editor:

Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual, Institutional, and Corporate Memberships. All *individual members* receive *The IMS Bulletin* for a basic annual dues rate of \$30. Each member must elect to receive at least one scientific journal for an additional amount, as follows: *Statistical Science* (\$5), one *Annals* (\$15) or both *Annals* (\$25). Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$12 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries, and retired members. Retired members may also elect to receive the *Bulletin* only for \$12. *Institutional memberships* are available to nonprofit organizations at \$270 per year and *corporate memberships* are available to other organizations at \$585 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by and mailed to an individual. Individual subscriptions for 1989 are available to both *Annals* and *Statistical Science* (\$96), one *Annals* and *Statistical Science* (\$60), both *Annals* (\$72), one *Annals* (\$45), *Statistical Science* (\$30) and *The IMS Bulletin* (\$20). *General subscriptions* are for libraries, institutions, and any multiple-readership use. For 1989, all general subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. General subscriptions for 1989 are available to both *Annals* and *Statistical Science* (\$180), one *Annals* and *Statistical Science* (\$105), *Statistical Science* only (\$45), and *The IMS Bulletin* (\$30). Air mail rates for overseas delivery of general subscriptions are \$50 per title.

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$7.50 per copy, plus \$.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0883-4237/89 \$7.50 + .00.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Managing Editor (production).

The Latest Publications for Statisticians From Springer-Verlag

H.T. Nguyen and G.S. Rogers, New Mexico State University,
Las Cruces, NM, USA

Fundamentals of Mathematical Statistics

Volume I: Probability for Statistics

Volume II: Statistical Inference

This two volume text is designed for a two semester course in mathematical statistics at the graduate level. The two main pedagogical aspects in these volumes are that the material is designed in lessons (each for a 50 minute class) with complimentary exercises and home work, and although the material is traditional, it is presented in a self-contained, rigorous and complete manner.

Volume I, Probability for Statistics, is designed for the first semester and contains the basic probability needed for statistics: from relative frequency to a central limit theorem.

Volume II, Statistical Inference, is designed for the second semester and contains a rigorous introduction to mathematical statistics: from random samples to asymptotic theory of statistical inference.

Volume I: 1989/432 pp., 23 illus./Hardcover \$39.80

ISBN 0-387-97014-2/Springer Texts in Statistics

Volume II: 1989/422 pp./Hardcover \$39.80

ISBN 0-387-97020-7/Springer Texts in Statistics

M. West, Duke University, Durham, NC, USA; and J. Harrison,
University of Warwick, Coventry, UK

Bayesian Forecasting and Dynamic Models

Describes and illustrates for the first time in book form, a relatively complete statistical and mathematical framework that presents the authors' view to this approach to modelling and forecasting.

The material covers mathematical and statistical features of Bayesian analysis of dynamic models, with illustrations, examples and exercises in each chapter. In order that the ideas and techniques of Bayesian forecasting be accessible to students, research workers and practitioners alike, the book includes a number of examples and case studies involving real data, generously illustrated using computer generated graphs. These examples provide issues of modelling, data analysis and forecasting.

1989/app. 720 pp., 108 illus./Hardcover \$56.00 (tent.)

Contributions to Probability and Statistics

Essays in Honor of Ingram Olkin

Published in honor of the sixty-fifth birthday of Professor Ingram Olkin of Stanford University. Part I contains a brief biography of Professor Olkin, and an interview with him discussing his career and his research interests. Part II contains 32 technical papers written in Professor Olkin's honor by his collaborators, colleagues, and Ph.D. students.

These original papers cover a wealth of topics in mathematical and applied statistics, including probability inequalities and characterizations, multivariate analysis and association, linear and nonlinear models, ranking and selection, experimental design, and approaches to statistical inference.

The volume reflects the wide range of Professor Olkin's interests in and contributions to research in statistics, and provides an overview of new developments in these areas of research.

1989/512 pp., 50 illus./Hardcover \$69.00

ISBN 0-387-97076-2

G. Grimmett, University of Bristol, Bristol, UK

Percolation

The importance of **Percolation** for modelling random media is appreciated by probabilists and mathematical physicists.

This concise re-working of the mathematical theory is self-contained and approachable by the non-specialist. It makes extensive use of recent proofs of the uniqueness of the critical point and of the infinite cluster, and includes an attempt to communicate to the mathematician the physical theory of scaling and the critical phenomenon, together with clear accounts of unsolved problems. The case of two dimensions receives special attention, with a modern proof that the critical probability of bond percolation on the square lattice equals $1/2$. The emphasis throughout is upon providing the most direct proofs.

1989/296 pp., 76 illus./Hardcover \$49.80

New Version of Diskette!

P.J. Brockwell and R.A. Davis, Colorado State University,
Fort Collins, CO, USA

Time Series: Theory and Methods

Version 2.0

Due to the increased demand for this highly-acclaimed software, a new version has been made available!

The diskette contains programs written for the IBM PC. It may be used to apply the methods described in the book by the same authors, **Time Series: Theory and Methods** (Springer Series in Statistics), to the data sets supplied in the appendix, to simulated data sets, or to data provided by the reader.
