

CONTENTS

Mitsuhiro Itoh: A remark on nonnegatively curved homogeneous Kähler manifolds	1
Tadahiro Uesu: A system of graph grammars which generates all recursively enumerable sets of labelled graphs	11
Moto-o Takahashi: An alternative proof of Birman-Hilden-Viro's theorem	27
Masaru Takeuchi: On conjugate loci and cut loci of compact symmetric spaces I	35
Tsuyoshi Yukami: A note on a formalized arithmetic with function symbols ' and +	69
Ryōzō Yokoyama: On the Bahadur representation of sample quantiles for mixing processes	75
Seiichiro Wakabayashi: Propagation of singularities for hyperbolic operators with constant coefficient principal part	91
Minoru Nakaoka: Equivariant point theorems	109
Humio Suzuki: On the definition of the wave front set of a distribution	127
Koji Kuroda: Phase transitions in classical Heisenberg models	135
