

CONTENTS

Akira Iwatsuka and Hideo Tamura: Asymptotic distribution of negative eigenvalues for two dimensional Pauli operators with spherically symmetric magnetic fields.....	281
Kazuma Ikeda: Normal forms for derivations in Arai's $AI_{\bar{f}}$	305
Alberto Cavicchioli, Friedrich Hegenbarth and Dušan Repovš: On four-manifolds fibering over surfaces	333
Akira Suzuki: Non-existence of generic elementary embeddings into the ground model	343
Takafumi Satou: Conformal flatness of circle bundle metric	349
Koichi Kawada: A zero density estimate for Dedekind zeta functions of pure extension fields	357
Luis J. Alías, Angel Ferrández, Pascual Lucas and Miguel A. Meroño: On the Gauss map of B -scrolls	371
Norihito Shimane and Takemi Mizokami: On D -paracompact p - and Σ -spaces	379
Yūji Akaike: Proper n -shape and the Freudenthal compactification	393
Naoyuki Koike: Generalized helical immersions	407
Shigeo Fueki: Helices and isometric immersions	427
Mitio Takano: Sequent calculi for three-valued logics	447
J. Berndt, F. Prüfer and L. Vanhecke: Totally geodesic submanifolds of symmetric-like Riemannian manifolds	463
Yoshio Matsuyama: On totally real minimal submanifolds in $CP^n(c)$	477
Atsushi Doumeki: The Semiclassical Estimate of the Eigenvalue Splitting for the Kac Operator.....	483
Seiji Fukuma: Radial functions and maximal estimates for radial solutions to the Schrodinger equation	509
Kazutoshi Koike: On second socles of finitely cogenerated injective modules.....	519
Kazuo Tomoyasu: Singular compactifications of product spaces.....	525
Tatsushi Morioka: Une perturbation des opérateurs microhypoelliptiques	537
Kikyo Hirotaka: On the Groups with Homogeneous Theory.....	551
