

## CONTENTS

---

	Page
Y. OGAWA, On 5-dimensional Sasaki-Einstein space with sectional curvature $\geq 1/3$ .....	103
S. SHERIF, A Tauberian constant for the $(S, \mu_{n+1})$ transformation .....	110
J. KATO, On the existence of $O$ -curves II .....	126
H. F. LAI, Weakened Bertrand curves .....	141
Y. OKUYAMA, On contraction of Walsh Fourier series .....	156
Y. TANNO, On a class of convolution transform II .....	168
K. YANO AND M. AKO, Notes on covariant almost analytic vector fields .....	187
S. TACHIBANA, On a decomposition of $C$ -harmonic forms in a compact Sasakian space .....	198
J. TOMIYAMA, Applications of Fubini type theorem to the tensor products of $C^*$ -algebras .....	213
M. TANI, On a conformally flat Riemannian space with positive Ricci curvature .....	227
D. BORWEIN AND B. L. R. SHAWYER, On Borel-type methods II .....	232
J. HAKEDA, On property $P$ of von Neumann algebras .....	238
R. L. IRWIN, Correction: Absolute summability factors I .....	243
D. BORWEIN AND B. L. R. SHAWYER, Correction: On Borel-type methods .....	244
