Acknowledgement of priority: On the result of Doney

Tibor K. Pogány[*]   Saralees Nadarajah [†]

We would like to acknowledge that a part of Theorem 2.1 in Pogány and Nadarajah [2] is the same as Proposition 1 in Patie [1]. The part of Theorem 2.1 in Pogány and Nadarajah [2] deriving an expression for the cdf still appears new. We would also like to acknowledge that Theorem 2.2 in Pogány and Nadarajah [2] is a particular case of Proposition 1 in Patie [1].

Electronic Journal of Probability
Electronic Communications in Probability

Advantages of publishing in EJP-ECP

- Very high standards

- Free for authors, free for readers

- Quick publication (no backlog)

- Secure publication (LOCKSS[1])

- Easy interface (EJMS[2])

Economical model of EJP-ECP

- Non profit, sponsored by IMS[3], BS[4] , ProjectEuclid[5]

- Purely electronic

Help keep the journal free and vigorous

- Donate to the IMS open access fund[6] (click here to donate!)

- Submit your best articles to EJP-ECP

- Choose EJP-ECP over for-profit journals
