

THE ANNALS
of
APPLIED
PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

VOLUME 2

1992

CONTENTS OF VOLUME 2

Articles

AALEN, ODD O. Modelling heterogeneity in survival analysis by the compound Poisson distribution	951–972
ARRATIA, RICHARD, BARBOUR, A. D. AND TAVARÉ, SIMON. Poisson process approximations for the Ewens sampling formula	519–535
ASMUSSEN, SØREN. Light traffic equivalence in single-server queues	555–574
ASMUSSEN, SØREN. On coupling and weak convergence to stationarity	739–751
AVRAM, FLORIN AND BERTSIMAS, DIMITRIS. The minimum spanning tree constant in geometrical probability and under the independent model: A unified approach	113–130
BARBOUR, A. D., TAVARÉ, SIMON AND ARRATIA, RICHARD. Poisson process approximations for the Ewens sampling formula	519–535
BAYER, DAVE AND DIACONIS, PERSI. Trailing the dovetail shuffle to its lair	294–313
BENJAMINI, YOAV AND KRIEGER, ABBA M. Market share paradox and heterogeneous chains	1019–1023
BERMAN, SIMEON M. The tail of the convolution of densities and its application to a model of HIV-latency time	481–502
BERTSIMAS, DIMITRIS AND AVRAM, FLORIN. The minimum spanning tree constant in geometrical probability and under the independent model: A unified approach	113–130
BLOUNT, DOUGLAS. Law of large numbers in the supremum norm for a chemical reaction with diffusion	131–141
BOLLOBÁS, BÉLA AND BRIGHTWELL, GRAHAM. The height of a random partial order: Concentration of measure	1009–1018
BRAMSON, M., NEY, P. AND TAO, J. The population composition of a multitype branching random walk	575–596
BRIGHTWELL, GRAHAM AND BOLLOBÁS, BÉLA. The height of a random partial order: Concentration of measure	1009–1018
CHANG, JOSEPH T. On moments of the first ladder height of random walks with small drift	714–738
COMETS, FRANCIS AND GIDAS, BASILIS. Parameter estimation for Gibbs distributions from partially observed data	142–170
CVITANIĆ, JAKŠA AND KARATZAS, IOANNIS. Convex duality in constrained portfolio optimization	767–818
DAI, J. G. AND HARRISON, J. M. Reflected Brownian motion in an orthant: Numerical methods for steady-state analysis	65–86
DALAL, S. R. AND MALLOW, C. L. Buying with exact confidence . .	752–765
DALEY, D. J. AND ROLSKI, T. Finiteness of waiting-time moments in general stationary single-server queues	987–1008
DEMBO, AMIR AND KARLIN, SAMUEL. Poisson approximations for r -scan processes	329–357
DEVROYE, LUC. A study of trie-like structures under the density model	402–434

DEVROYE, LUC. A limit theory for random skip lists	597–609
DIACONIS, PERSI AND BAYER, DAVE. Trailing the dovetail shuffle to its lair	294–313
ETHIER, S. N. AND KURTZ, THOMAS G. On the stationary distri- bution of the neutral diffusion model in population genetics . .	24–35
FERRARI, P. A. AND RAVISHANKAR, K. Shocks in asymmetric ex- clusion automata	928–941
FRIGESSI, ARNOLDO, HWANG, CHII-RUEY AND YOUNES, LAURENT. Optimal spectral structure of reversible stochastic matrices, Monte Carlo methods and the simulation of Markov random fields	610–628
GIDAS, BASILIS AND COMETS, FRANCIS. Parameter estimation for Gibbs distributions from partially observed data	142–170
GLYNN, PETER W. AND WHITT, WARD. The asymptotic validity of sequential stopping rules for stochastic simulations	188–198
HARRISON, J. M. AND DAI, J. G. Reflected Brownian motion in an orthant: Numerical methods for steady-state analysis	65–86
HARRISON, J. M. AND WILLIAMS, R. J. Brownian models of feed- forward queueing networks: Quasireversibility and product form solutions	263–293
HILL, T. P. AND KENNEDY, D. P. Sharp inequalities for optimal stopping with rewards based on ranks	503–517
HOLLEY, RICHARD AND WAYMIRE, EDWARD C. Multifractal dimen- sions and scaling exponents for strongly bounded random cascades	819–845
HUANG, CHI-FU AND PAGÈS, HENRI. Optimal consumption and portfolio policies with an infinite horizon: Existence and convergence	36–64
HWANG, CHII-RUEY, YOUNES, LAURENT AND FRIGESSI, ARNOLDO. Optimal spectral structure of reversible stochastic matrices, Monte Carlo methods and the simulation of Markov random fields	610–628
JANSONS, KALVIS M. AND ROGERS, L. C. G. Decomposing the branching Brownian path	973–986
KARATZAS, IOANNIS AND CVITANIĆ, JAKŠA. Convex duality in con- strained portfolio optimization	767–818
KARATZAS, IOANNIS AND OCONE, DANIEL L. The resolvent of a degenerate diffusion on the plane, with application to par- tially observed stochastic control	629–668
KARLIN, SAMUEL AND DEMBO, AMIR. Poisson approximations for r -scan processes	329–357
KENNEDY, D. P. AND HILL, T. P. Sharp inequalities for optimal stopping with rewards based on ranks	503–517
KOTELENEZ, PETER. Fluctuations in a nonlinear reaction–diffu- sion model	669–694

KRIEGER, ABBA M. AND BENJAMINI, YOAV. Market share paradox and heterogeneous chains	1019–1023
KROESE, DIRK P. AND SCHMIDT, VOLKER. A continuous polling system with general service times	906–927
KURTZ, THOMAS G. AND ETHIER, S. N. On the stationary distribution of the neutral diffusion model in population genetics	24–35
LAGARIAS, J. C. AND WEISS, A. The $3x + 1$ problem: Two stochastic models	229–261
LOADER, CLIVE R. Boundary crossing probabilities for locally Poisson processes	199–228
LOH, WEI-LIEM. Stein's method and multinomial approximation.	536–554
MALLOWS, C. L. AND DALAL, S. R. Buying with exact confidence	752–765
MORROW, GREGORY J. Large deviation results for a class of Markov chains with application to an infinite alleles model of population genetics	857–905
MYNENI, RAVI. The pricing of the American option	1–23
NEY, P., TAO, J. AND BRAMSON, M. The population composition of a multitype branching random walk	575–596
OCONE, DANIEL L. AND KARATZAS, IOANNIS. The resolvent of a degenerate diffusion on the plane, with application to partially observed stochastic control	629–668
OU, JIHONG AND WEIN, LAWRENCE M. Performance bounds for scheduling queueing networks	460–480
PAGÈS, HENRI AND HUANG, CHI-FU. Optimal consumption and portfolio policies with an infinite horizon: Existence and convergence	36–64
PINSKY, MARK A. Extremal character of the Lyapunov exponent of the stochastic harmonic oscillator	942–950
PITTEL, BORIS. On likely solutions of a stable marriage problem	358–401
RAVISHANKAR, K. AND FERRARI, P. A. Shocks in asymmetric exclusion automata	928–941
RHEE, WANSOO T. AND TALAGRAND, MICHEL. Matching random subsets of the cube with a tight control on one coordinate	695–713
ROGERS, L. C. G. AND JANSONS, KALVIS M. Decomposing the branching Brownian path	973–986
ROLSKI, T. AND DALEY, D. J. Finiteness of waiting-time moments in general stationary single-server queues	987–1008
SCHMIDT, VOLKER AND KROESE, DIRK P. A continuous polling system with general service times	906–927
SCHWEIZER, MARTIN. Mean-variance hedging for general claims	171–187
SHREVE, STEVEN E. AND XU, GAN-LIN. A duality method for optimal consumption and investment under short-selling prohibition. I. General market coefficients	87–112

SHREVE, STEVEN E. AND XU, GAN-LIN. A duality method for optimal consumption and investment under short-selling prohibition. II. Constant market coefficients	314–328
TAKÁCS, LAJOS. Random walk processes and their applications in order statistics	435–459
TALAGRAND, MICHEL. Matching random samples in many dimensions	846–856
TALAGRAND, MICHEL AND RHEE, WANSOO T. Matching random subsets of the cube with a tight control on one coordinate . . .	695–713
TAO, J., BRAMSON, M. AND NEY, P. The population composition of a multitype branching random walk	575–596
TAVARÉ, SIMON, ARRATIA, RICHARD AND BARBOUR, A. D. Poisson process approximations for the Ewens sampling formula . . .	519–535
WAYMIRE, EDWARD C. AND HOLLEY, RICHARD. Multifractal dimensions and scaling exponents for strongly bounded random cascades	819–845
WEBER, RICHARD. On the Gittins index for multiarmed bandits . .	1024–1033
WEIN, LAWRENCE M. AND OU, JIHONG. Performance bounds for scheduling queueing networks	460–480
WEISS, A. AND LAGARIAS, J. C. The $3x + 1$ problem: Two stochastic models	229–261
WHITT, WARD AND GLYNN, PETER W. The asymptotic validity of sequential stopping rules for stochastic simulations	188–198
WILLIAMS, R. J. AND HARRISON, J. M. Brownian models of feed-forward queueing networks: Quasireversibility and product form solutions	263–293
XU, GAN-LIN AND SHREVE, STEVEN E. A duality method for optimal consumption and investment under short-selling prohibition. I. General market coefficients	87–112
XU, GAN-LIN AND SHREVE, STEVEN E. A duality method for optimal consumption and investment under short-selling prohibition. II. Constant market coefficients	314–328
YOUNES, LAURENT, FRIGESSI, ARNOLDO AND HWANG, CHII-RUEY. Optimal spectral structure of reversible stochastic matrices, Monte Carlo methods and the simulation of Markov random fields	610–628
