### STATISTICS AT THE UNIVERSITY OF WISCONSIN

The Department of Statistics at the University of Wisconsin was set up as an autonomous unit in 1960. The faculty currently consists of George E. P. Box (Chairman), Norman R. Draper, John Gurland, Irwin Guttman, William G. Hunter, George C. Tiao, S. K. Banerjee (visitor—year), Gwilym M. Jenkins (visitor—year), Donald A. S. Fraser (visitor—second semester).

Advanced courses offered in such areas as statistical inference, decision theory, analysis of variance, experimental design, non-parametric statistics, and response surface methodology.

Some areas of current research are theory and application of Bayesian procedures, adaptive control and optimization, non-stationary time series and their applications to prediction and regulation, design and analysis for non-linear model building, theory of randomization.

A number of assistantships (teaching, research, or both) are available every year. Inquiries from prospective faculty members are encouraged.
