

THE ANNALS
of
PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles appearing in *The Annals of Probability* (volumes 1–17) are indexed in the *Cumulative Index to IMS Scientific Journals*, available from the Institute of Mathematical Statistics.

VOLUME 23

1995

CONTENTS OF VOLUME 23

Articles

ADLER, ROBERT J. AND SAMORODNITSKY, GENNADY. Super fractional Brownian motion, fractional super Brownian motion and related self-similar (super) processes	743–766
ALABERT, AURELI, FERRANTE, MARCO AND NUALART, DAVID. Markov field property of stochastic differential equations . . .	1262–1288
ALEXANDER, KENNETH S. Percolation and minimal spanning forests in infinite graphs	87–104
ANTAL, PETER. Enlargement of obstacles for the simple random walk	1061–1101
ARRATIA, RICHARD, STARK, DUDLEY AND TAVARÉ, SIMON. Total variation asymptotics for Poisson process approximations of logarithmic combinatorial assemblies	1347–1388
ASPANDIAROV, SANJAR AND LE GALL, JEAN-FRANÇOIS. Some new classes of exceptional times of linear Brownian motion	1605–1626
BALDI, PAOLO. Exact asymptotics for the probability of exit from a domain and applications to simulation	1644–1670
BALLY, VLAD, MILLET, ANNIE AND SANZ-SOLÉ, MARTA. Approximation and support theorem in Hölder norm for parabolic stochastic partial differential equations	178–222
BASS, RICHARD F. AND KHOSHNEVISAN, DAVAR. Laws of the iterated logarithm for local times of the empirical process	388–399
BELL, DENIS R. AND MOHAMMED, SALAH-ELDIN A. Smooth densities for degenerate stochastic delay equations with hereditary drift.	1875–1894
BENJAMINI, ITAI AND KESTEN, HARRY. Percolation of arbitrary words in $\{0, 1\}^{\mathbb{N}}$	1024–1060
BENJAMINI, ITAI, PEMANTLE, ROBIN AND PERES, YUVAL. Martin capacity for Markov chains	1332–1346
BHATT, ABHAY G., KALLIANPUR, G. AND KARANDIKAR, RAJEEVA L. Uniqueness and robustness of solution of measure-valued equations of nonlinear filtering	1895–1938
BOLTHAUSEN, ERWIN, DEUSCHEL, JEAN-DOMINIQUE AND TAMURA, YOZO. Laplace approximations for large deviations of non-reversible Markov processes. The nondegenerate case	236–267
BURDZY, KRZYSZTOF AND SAN MARTÍN, JAIME. Iterated law of iterated logarithm.	1627–1643
BURDZY, KRZYSZTOF AND TOBY, ELLEN. A Skorohod-type lemma and a decomposition of reflected Brownian motion	586–604
CAIROLI, R. AND DALANG, ROBERT C. Optimal switching between two random walks.	1982–2013
COHEN DE LARA, M. Geometric and symmetry properties of a nondegenerate diffusion process	1557–1604
COLLET, PIERRE, MARTÍNEZ, SERVET AND SAN MARTÍN, JAIME. Asymptotic laws for one-dimensional diffusions conditioned to nonabsorption	1300–1314

CUZICK, JACK, GINÉ, EVARIST AND ZINN, JOEL. Laws of large numbers for quadratic forms, maxima of products and truncated sums of i.i.d. random variables	292–333
DALANG, ROBERT C. AND CAIROLI, R. Optimal switching between two random walks	1982–2013
DARLING, R. W. R. Constructing gamma-martingales with prescribed limit, using backwards SDE	1234–1261
DAVIS, RICHARD A. AND HSING, TAIEN. Point process and partial sum convergence for weakly dependent random variables with infinite variance	879–917
DAWSON, D., LI, Y. AND MUELLER, C. The support of measure-valued branching processes in a random environment	1692–1718
DAWSON, DONALD A., FLEISCHMANN, KLAUS, LI, YI AND MUELLER, CARL. Singularity of super-Brownian local time at a point catalyst	37–55
DEHEUVELS, PAUL AND MASON, DAVID M. On the fractal nature of empirical increments	355–387
DE LA PEÑA, VICTOR H. AND MONTGOMERY-SMITH, S. J. Decoupling inequalities for the tail probabilities of multivariate U -statistics	806–816
DEUSCHEL, JEAN-DOMINIQUE, YAMURA, YOZO AND BOLTHAUSEN, ERWIN. Laplace approximations for large deviations of non-reversible Markov processes. The nondegenerate case	236–267
DEUSCHEL, JEAN-DOMINIQUE AND ZEITOUNI, OFER. Limiting curves for i.i.d. records	852–878
DJEHICHE, BOUALEM AND KAJ, INGEMAR. The rate function for some measure-valued jump processes	1414–1438
DOWN, D., MEYN, S. P. AND TWEEDIE, R. L. Exponential and uniform ergodicity of Markov processes	1671–1691
DURRETT, RICK AND SCHINAZI, RINALDO. Intermediate phase for the contact process on a tree	668–673
EINMAHL, UWE. On the cluster set problem for the generalized law of the iterated logarithm in Euclidean space	817–851
EVANS, STEVEN N. AND PERKINS, EDWIN A. Explicit stochastic integral representations for historical functionals	1772–1815
FERRANTE, MARCO, NUALART, DAVID AND ALABERT, AURELI. Markov field property of stochastic differential equations	1262–1288
FERRARI, P. A., KESTEN, H., MARTINEZ, S. AND PICCO, P. Existence of quasi-stationary distributions. A renewal dynamical approach	501–521
FLEISCHMANN, KLAUS, LI, YI, MUELLER, CARL AND DAWSON, DONALD A. Singularity of super-Brownian local time at a point catalyst	37–55
GINÉ, EVARIST, ZINN, JOEL AND CUZICK, JACK. Laws of large numbers for quadratic forms, maxima of products and truncated sums of i.i.d. random variables	292–333

GRIFFIN, PHILIP S. AND MCCONNELL, TERRY R. L^p -boundedness of the overshoot in multidimensional renewal theory	2022–2056
HÄGGSTRÖM, OLLE AND MEESTER, RONALD. Asymptotic shapes for stationary first passage percolation	1511–1522
HAHN, MARJORIE G. AND KLASS, MICHAEL J. Uniform local probability approximations: improvements on Berry–Esseen.	446–463
HAMMACK, WILLIAM. Sharp inequalities for the distribution of a stochastic integral in which the integrator is a bounded submartingale	223–235
HOUDRÉ, CHRISTIAN. On the almost sure convergence of series of stationary and related nonstationary variables	1204–1218
HOUDRÉ, CHRISTIAN. Reconstruction of band limited processes from irregular samples	674–696
HOUDRÉ, CHRISTIAN AND PÉREZ-ABREU, VÍCTOR. Covariance identities and inequalities for functionals on Wiener and Poisson spaces	400–419
HSING, TAIEN. A note on the asymptotic independence of the sum and maximum of strongly mixing stationary random variables.	938–947
HSING, TAIEN AND DAVIS, RICHARD A. Point process and partial sum convergence for weakly dependent random variables with infinite variance	879–917
KAJ, INGEMAR AND DJEHICHE, BOUALEM. The rate function for some measure-valued jump processes	1414–1438
KALLIANPUR, G., KARANDIKAR, RAJEEVA L. AND BHATT, ABHAY G. Uniqueness and robustness of solution of measure-valued equations of nonlinear filtering.	1895–1938
KALPAZIDOU, S. On the rotational dimension of stochastic matrices	966–975
KARANDIKAR, RAJEEVA L., BHATT, ABHAY G. AND KALLIANPUR, G. Uniqueness and robustness of solution of measure-valued equations of nonlinear filtering.	1895–1938
KENDALL, WILFRED S. The radial part of a Γ -martingale and a non-implosion theorem	479–500
KERSTING, G. AND KLEBANER, F. C. Sharp conditions for nonexplosions and explosions in Markov jump processes	268–272
KESTEN, HARRY AND BENJAMINI, ITAI. Percolation of arbitrary words in $\{0, 1\}^{\mathbb{N}}$	1024–1060
KESTEN, H., MARTINEZ, S., PICCO, P. AND FERRARI, P. A. Existence of quasi-stationary distributions. A renewal dynamical approach.	501–521
KHOSHNEVISAN, DAVAR. On the distribution of bubbles of the Brownian sheet.	786–805
KHOSHNEVISAN, DAVAR AND BASS, RICHARD F. Laws of the iterated logarithm for local times of the empirical process	388–399

KLASS, MICHAEL J. AND HAHN, MARJORIE G. Uniform local probability approximations: improvements on Berry–Esseen. . . .	446–463
KLEBANER, F. C. AND KERSTING, G. Sharp conditions for nonexplosions and explosions in Markov jump processes	268–272
LAWLER, GREGORY F. Subdiffusive fluctuations for internal diffusion limited aggregation	71–86
LEDRAPPIER, FRANÇOIS. Central limit theorem in negative curvature	1219–1233
LEE, TZONG-YOW. Large deviations for independent random walks on the line.	1315–1331
LEE, TZONG-YOW AND REMILLARD, BRUNO. Large deviations for the three-dimensional super-Brownian motion	1755–1771
LEFÈVRE, CLAUDE AND UTEV, SERGEY. Poisson approximation for the final state of a generalized epidemic process	1139–1162
LE GALL, JEAN-FRANÇOIS AND ASPANDIAROV, SANJAR. Some new classes of exceptional times of linear Brownian motion	1605–1626
LE GALL, JEAN-FRANÇOIS AND PERKINS, EDWIN A. The Hausdorff measure of the support of two-dimensional super-Brownian motion	1719–1747
LEURIDAN, CHRISTOPHE. Contrôle de la norme H^p d'une martingale par des maximums de temps locaux.	1289–1299
LI, Y., MUELLER, CARL AND DAWSON, D. The support of measure-valued branching processes in a random environment	1692–1718
LI, YI, MUELLER, C., DAWSON, DONALD A. AND FLEISCHMANN, KLAUS. Singularity of super-Brownian local time at a point catalyst.	37–55
LIAO, M. AND ZHENG, W. A. Radial part of Brownian motion on a Riemannian manifold.	173–177
LIGGETT, THOMAS M. Improved upper bounds for the contact process critical value.	697–723
LIMING, WU. Moderate deviations of dependent random variables related to CLT	420–445
LIU, XIJIAN. Symmetric two-particle exclusion-eating processes	1439–1455
LLOYD, PETER AND SUDBURY, AIDAN. Quantum operators in classical probability theory: II. The concept of duality in interacting particle systems	1816–1830
LU, SHENGLIN. Hydrodynamic scaling limits with deterministic initial configurations.	1831–1852
LYONS, RUSSELL, PEMANTLE, ROBIN AND PERES, YUVAL. Conceptual proofs of $L \log L$ criteria for mean behavior of branching processes.	1125–1138
MARTÍNEZ, SERVET, SAN MARTÍN, JAIME AND COLLET, PIERRE. Asymptotic laws for one-dimensional diffusions conditioned to nonabsorption.	1300–1314
MARTINEZ, S., PICCO, P., FERRARI, P. A. AND KESTEN, H. Existence of quasi-stationary distributions. A renewal dynamical approach.	501–521

MASON, DAVID M. AND DEHEUVELS, PAUL. On the fractal nature of empirical increments	355–387
MCCONNELL, TERRY R. AND GRIFFIN, PHILIP S. L^p -boundedness of the overshoot in multidimensional renewal theory	2022–2056
MEESTER, RONALD AND HÄGGSTRÖM, OLLE. Asymptotic shapes for stationary first passage percolation	1511–1522
MEYN, S. P., TWEEDIE, R. L. AND DOWN, D. Exponential and uniform ergodicity of Markov processes	1671–1691
MILLET, ANNIE, SANZ-SOLÉ, MARTA AND BALLY, VLAD. Approximation and support theorem in Hölder norm for parabolic stochastic partial differential equations	178–222
MOHAMMED, SALAH-ELDIN A. AND BELL, DENIS R. Smooth densities for degenerate stochastic delay equations with hereditary drift.	1875–1894
MONAT, PASCALE AND STRICKER, CHRISTOPHE. Föllmer–Schweizer decomposition and mean-variance hedging for general claims	605–628
MONTGOMERY-SMITH, S. J. AND DE LA PEÑA, VICTOR H. Decoupling inequalities for the tail probabilities of multivariate U -statistics	806–816
MUELLER, C., DAWSON, D. AND LI, Y. The support of measure-valued branching processes in a random environment	1692–1718
MUELLER, CARL, DAWSON, DONALD A., FLEISCHMANN, KLAUS AND LI, YI. Singularity of super-Brownian local time at a point catalyst.	37–55
NUALART, DAVID, ALABERT, AURELI AND FERRANTE, MARCO. Markov field property of stochastic differential equations	1262–1288
OVERBECK, LUDGER, RÖCKNER, MICHAEL AND SCHMULAND, BYRON. An analytic approach to Fleming–Viot processes with interactive selection	1–36
PEMANTLE, ROBIN AND PERES, YUVAL. Critical random walk in random environment on trees	105–140
PEMANTLE, ROBIN AND PERES, YUVAL. Galton–Watson trees with the same mean have the same polar sets	1102–1124
PEMANTLE, ROBIN, PERES, YUVAL AND BENJAMINI, ITAI. Martin capacity for Markov chains	1332–1346
PEMANTLE, ROBIN, PERES, YUVAL AND LYONS, RUSSELL. Conceptual proofs of $L \log L$ criteria for mean behavior of branching processes.	1125–1138
PERES, YUVAL, BENJAMINI, ITAI AND PEMANTLE, ROBIN. Martin capacity for Markov chains	1332–1346
PERES, YUVAL, LYONS, RUSSELL AND PEMANTLE, ROBIN. Conceptual proofs of $L \log L$ criteria for mean behavior of branching processes.	1125–1138
PERES, YUVAL AND PEMANTLE, ROBIN. Critical random walk in random environment on trees	105–140

PERES, YUVAL AND PEMANTLE, ROBIN. Galton–Watson trees with the same mean have the same polar sets	1102–1124
PÉREZ-ABREU, VÍCTOR AND HOUDRÉ, CHRISTIAN. Covariance identities and inequalities for functionals on Wiener and Poisson spaces	400–419
PERKINS, EDWIN A. AND EVANS, STEVEN N. Explicit stochastic integral representations for historical functionals.	1772–1815
PERKINS, EDWIN A. AND LE GALL, JEAN-FRANÇOIS. The Hausdorff measure of the support of two-dimensional super-Brownian motion	1719–1747
PESZAT, SZYMON AND ZABCZYK, JERZY. Strong Feller property and irreducibility for diffusions on Hilbert spaces	157–172
PICCO, P., FERRARI, P. A., KESTEN, H. AND MARTINEZ, S. Existence of quasi-stationary distributions. A renewal dynamical approach.	501–521
PINSKY, ROSS G. On the large time growth rate of the support of supercritical super-Brownian motion	1748–1754
PIZA, MARCELO S. T. AND NEWMAN, CHARLES M. Divergence of shape fluctuations in two dimensions	977–1005
QUASTEL, JEREMY. Large deviations from a hydrodynamic scaling limit for a nongradient system	724–742
REINERT, GESINE. A weak law of large numbers for empirical measures via Stein’s method.	334–354
REMILLARD, BRUNO AND LEE, TZONG-YOW. Large deviations for the three-dimensional super-Brownian motion	1755–1771
RIO, EMMANUEL. A maximal inequality and dependent Marcinkiewicz–Zygmund strong laws	918–937
RIO, EMMANUEL. The functional law of the iterated logarithm for stationary strongly mixing sequences	1188–1203
RÖCKNER, MICHAEL, SCHMULAND, BYRON AND OVERBECK, LUDGER. An analytic approach to Fleming–Viot processes with interactive selection	1–36
ROSIŃSKI, JAN. Remarks on strong exponential integrability of vector-valued random series and triangular arrays.	464–473
ROSINSKI, JAN. On the structure of stationary stable processes .	1163–1187
SAMORODNITSKY, GENNADY AND ADLER, ROBERT J. Super fractional Brownian motion, fractional super Brownian motion and related self-similar (super) processes	743–766
SAN MARTÍN, JAIME AND BURDZY, KRZYSZTOF. Iterated law of iterated logarithm.	1627–1643
SAN MARTÍN, JAIME, COLLET, PIERRE AND MARTÍNEZ, SERVET. Asymptotic laws for one-dimensional diffusions conditioned to nonabsorption.	1300–1314
SANZ-SOLÉ, MARTA, BALLY, VLAD AND MILLET, ANNIE. Approximation and support theorem in Hölder norm for parabolic stochastic partial differential equations	178–222

SCHINAZI, RINALDO AND DURRETT, RICK. Intermediate phase for the contact process on a tree	668–673
SCHMULAND, BYRON, OVERBECK, LUDGER AND RÖCKNER, MICHAEL. An analytic approach to Fleming–Viot processes with interactive selection	1–36
SHAO, QI-MAN. Maximal inequalities for partial sums of ρ -mixing sequences	948–965
SIMONELLI, ITALO. A limit theorem for a class of interacting particle systems	141–156
SOWERS, RICHARD B. Intermittency-type estimates for some nondegenerate SPDE's	1853–1874
STARK, DUDLEY, TAVARÉ, SIMON AND ARRATIA, RICHARD. Total variation asymptotics for Poisson process approximations of logarithmic combinatorial assemblies	1347–1388
STONG, RICHARD. Eigenvalues of random walks on groups	1961–1981
STONG, RICHARD. Eigenvalues of the natural random walk on the Burnside group $B(3, n)$	1950–1960
STONG, RICHARD. Random walks on the groups of upper triangular matrices	1939–1949
STRICKER, CHRISTOPHE AND MONAT, PASCALE. Föllmer-Schweizer decomposition and mean-variance hedging for general claims	605–628
SUDBURY, AIDAN AND LLOYD, PETER. Quantum operators in classical probability theory: II. The concept of duality in interacting particle systems	1816–1830
SZNITMAN, ALAIN-SOL. Crossing velocities and random lattice animals	1006–1023
TALAGRAND, MICHEL. A borderline random Fourier series	776–785
TALAGRAND, MICHEL. Hausdorff measure of trajectories of multiparameter fractional Brownian motion	767–775
TAMURA, YOZO, BOLTHAUSEN, ERWIN AND DEUSCHEL, JEAN-DOMINIQUE. Laplace approximations for large deviations of nonreversible Markov processes. The nondegenerate case	236–267
TAVARÉ, SIMON, ARRATIA, RICHARD AND STARK, DUDLEY. Total variation asymptotics for Poisson process approximations of logarithmic combinatorial assemblies	1347–1388
TOBY, ELLEN AND BURDZY, KRZYSZTOF. A Skorohod-type lemma and a decomposition of reflected Brownian motion	586–604
TÓTH, BÁLINT. The “true” self-avoiding walk with bond repulsion on \mathbb{Z} : limit theorems	1523–1556
TOWGHI, NASSER. Stochastic integration of processes with finite generalized variations. I	629–667
TWEEDIE, R. L., DOWN, D. AND MEYN, S. P. Exponential and uniform ergodicity of Markov processes	1671–1691
UTEV, SERGEY AND LEFÈVRE, CLAUDE. Poisson approximation for the final state of a generalized epidemic process	1139–1162

VANDERBEI, ROBERT J. A probabilistic formula for the concave hull of a function	2014–2021
VERZANI, JOHN. Slow points in the support of historical Brownian motion	56–70
WANG, GANG. Differential subordination and strong differential subordination for continuous-time Martingales and related sharp inequalities	522–551
WANG, JIA-GANG. The asymptotic behavior of locally square integrable martingales	552–585
XIAO, YIMIN. Dimension results for Gaussian vector fields and index- α stable fields	273–291
ZABCZYK, JERZY AND PESZAT, SZYMON. Strong Feller property and irreducibility for diffusions on Hilbert spaces	157–172
ZEITOUNI, OFER AND DEUSCHEL, JEAN-DOMINIQUE. Limiting curves for i.i.d. records	852–878
ZHENG, W. A. AND LIAO, M. Radial part of Brownian motion on a Riemannian manifold	173–177
ZHENG, WEIAN. Conditional propagation of chaos and a class of quasilinear PDE's	1389–1413
ZINN, JOEL, CUZICK, JACK AND GINÉ, EVARIST. Laws of large numbers for quadratic forms, maxima of products and truncated sums of i.i.d. random variables	292–333

Book Review

O'CONNELL, NEIL. Review of <i>Lectures on the Coupling Method</i> by Torgny Lindvall	1456–1460
