

PUBLICATIONS OF FRANK SPITZER

- [1] (1955). On a class of random variables. *Proc. Amer. Math. Soc.* **6** 494–505.
- [2] (1956). On interval recurrent sums of independent random variables. *Proc. Amer. Math. Soc.* **7** 164–171.
- [3] (1956). A combinatorial lemma and its application to probability theory. *Trans. Amer. Math. Soc.* **82** 323–339.
- [4] (1957). The Wiener–Hopf equation whose kernel is a probability density. *Duke Math. J.* **24** 327–343.
- [5] (1958). Some theorems concerning 2-dimensional Brownian motion. *Trans. Amer. Math. Soc.* **87** 187–197.
- [6] (with A. CALDERON and H. WIDOM) (1959). Inversion of Toeplitz matrices. *Illinois J. Math.* **3** 490–498.
- [7] (1959). Some probability limit theorems. *Bull. Amer. Math. Soc.* **65** 117–119.
- [8] (1960). A Tauberian theorem and its probability interpretation. *Trans. Amer. Math. Soc.* **94** 150–169.
- [9] (1960). The Wiener–Hopf equation whose kernel is a probability density, II. *Duke Math. J.* **27** 363–372.
- [10] (with C. STONE) (1960). A class of Toeplitz forms and their application to probability. *Illinois J. Math.* **4** 253–277.
- [11] (with P. SCHMIDT) (1960). The Toeplitz matrices of an arbitrary Laurent polynomial. *Math. Scand.* **8** 15–38.
- [12] (1961). Some properties of recurrent random walk. *Illinois J. Math.* **5** 234–245.
- [13] (with H. WIDOM) (1961). The circumference of a convex polygon. *Proc. Amer. Math. Soc.* **12** 506–509.
- [14] (1961). Recurrent random walk and logarithmic potential. *Proc. Fourth Berkeley Symp. Math. Statist. Probab.* **2** 515–534. Univ. California Press, Berkeley.
- [15] (with H. KESTEN and D. ORNSTEIN) (1962). A general property of random walk. *Bull. Amer. Math. Soc.* **68** 526–528.
- [16] (1962). Hitting probabilities. *J. Math. Mech.* **11** 593–614.
- [17] (with H. KESTEN) (1963). Ratio theorems for random walks, I. *J. Analyse Math.* **11** 285–322.
- [18] (1964). *Principles of Random Walk*. Van Nostrand, New York; 2nd ed., Springer, Berlin (1976). [Russian translation published by Mir, Moscow (1969), French translation by Dunod, Paris (1970).]
- [19] (1964). Electrostatic capacity, heat flow, and Brownian motion. *Z. Wahrsch. Verw. Gebiete* **3** 110–121.
- [20] (with H. KESTEN) (1965). Random walk on countably infinite abelian groups. *Acta Math.* **114** 237–265.
- [21] (with P. NEY) (1966). The Martin boundary for random walk. *Trans. Amer. Math. Soc.* **121** 116–132.
- [22] (with H. KESTEN and P. NEY) (1966). The Galton Watson process with mean one and finite variance. *Teor. Veroyatnost. i Primenen.* **11** 579–611.
- [23] (1966). Promenades aléatoires récurrentes sur les groupes discrets. Univ. Strasbourg.
- [24] (1967). Two explicit Martin boundary constructions. *Symp. Probab. Methods in Analysis. Lecture Notes in Math.* **31** 296–298. Springer, Berlin.
- [25] (1967). Renewal theorems for Markov chains. *Proc. Fifth Berkeley Symp. Math. Statist. Probab.* **2** (part 2) 311–320. Univ. California Press, Berkeley.
- [26] (with A. JOFFE) (1967). On multitype branching processes with $\rho \leq 1$. *J. Math. Anal. Appl.* **19** 409–430.
- [27] (1969). Uniform motion with elastic collision of an infinite particle system. *J. Math. Mech.* **18** 973–989.
- [28] (1969). Random processes defined through the interaction of an infinite particle system. *Probability and Information Theory. Lecture Notes in Math.* **89** 201–223.
- [29] (1970). Interaction of Markov processes. *Adv. in Math.* **5** 246–290.

- [30] (1971). Markov random fields and Gibbs ensembles. *Amer. Math. Monthly* **78** 142–154.
- [31] (1971). Random fields and interacting particle systems. Notes on lectures given at the 1971 MAA Summer Session, Williams College, Williamstown, MA. Math. Assoc. Amer., Washington, DC.
- [32] (1972). A variational characterization of finite Markov chains. *Ann. Math. Statist.* **43** 303–307.
- [33] (1973). Contribution to discussion of “Subadditive ergodic theory” by J. F. C. Kingman. *Ann. Probab.* **1** 883–909.
- [34] (1974). Recurrent random walk of an infinite particle system. *Trans. Amer. Math. Soc.* **198** 191–199.
- [35] (1974). Introduction aux processus de Markov à paramètre dans \mathbb{Z}_+ . *Ecole d’Été de Saint-Flour 1973. Lecture Notes in Math.* **390** 114–189. Springer, Berlin.
- [36] (1974). Random time evolution of infinite particle systems. *Proc. Internat. Cong. Math.* **2** 169–171.
- [37] (1975). Markov random fields on an infinite tree. *Ann. Probab.* **3** 387–398.
- [38] (with H. KESTEN) (1975). Controlled Markov chains. *Ann. Probab.* **3** 32–40.
- [39] (1975). Random time evolution of infinite particle systems. *Adv. in Math.* **16** 139–143. [Also appeared in *Surveys in Applied Mathematics* (N. Metropolis, S. Orszag and G.-C. Rota, eds.) Academic, New York (1976).]
- [40] (1975). Phase transition in one-dimensional nearest-neighbor systems. *J. Funct. Anal.* **20** 240–255.
- [41] (with H. KESTEN and M. V. KOZLOV) (1975). A limit law for random walk in a random environment. *Compositio Math.* **30** 145–168.
- [42] (with H. WAN, JR.) (1976). The characterization of optimal saving programs in a quadratic model. *J. Math. Econom.* **3** 43–79.
- [43] (1977). Stochastic time evolution of one dimensional infinite particle systems. *Bull. Amer. Math. Soc.* **83** 880–890.
- [44] (1978). Contribution to discussion of “Abhängige Verwschiebungen, III.” *Serdica* **4** 135–163.
- [45] (with H. KESTEN) (1979). A limit theorem related to a new class of self-similar processes. *Z. Wahrsch. Verw. Gebiete* **50** 5–25.
- [46] (1981). Infinite systems with locally interacting components. *Ann. Probab.* **9** 349–364.
- [47] (with T. M. LIGGETT) (1981). Ergodic theorems for coupled random walks and other systems with locally interacting components. *Z. Wahrsch. Verw. Gebiete* **56** 443–468.
- [48] (with H. KESTEN) (1984). Convergence in distribution of products of random matrices. *Z. Wahrsch. Verw. Gebiete* **67** 363–386.
- [49] (1986). A multidimensional renewal theorem. In *Probability, Statistical Mechanics, and Number Theory* (G.-C. Rota, ed.) 147–155. Academic, New York.
