THE ANNALS
of
PROBABILITY

An Official Journal of the
Institute of Mathematical Statistics

Articles appearing in *The Annals of Probability* (volumes 1–17) are indexed in the *Cumulative Index to IMS Scientific Journals*, available from the Institute of Mathematical Statistics.

VOLUME 20

1992

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Probability.*

CONTENTS OF VOLUME 20

Special Invited Papers and Articles

ALEXANDER, KENNETH S. AND KALIKOW, STEVEN A. Random stationary processes 1174–1198

ALGOET, PAUL. Universal schemes for prediction, gambling and portfolio selection 901–941

ALSMEYER, GEROLD. On generalized renewal measures and certain first passage times 1229–1247

ARRATIA, RICHARD AND TAVARÉ, SIMON. The cycle structure of random permutations 1567–1591

ASMUSSEN, SØREN. Phase-type representations in random walk and queueing problems 772–789

ATHREYA, K. B. On a maximum sequence in a critical multitype branching process 746–752

AVRAM, FLORIN AND TAQQU, MURAD S. Weak convergence of sums of moving averages in the α-stable domain of attraction 483–503

BACCELLI, FRANÇOIS. Ergodic theory of stochastic Petri networks 375–396

BACCELLI, FRANÇOIS AND LIU, ZHEN. On a class of stochastic recursive sequences arising in queueing theory 350–374

BARBOUR, A. D. AND BROWN, TIMOTHY C. The Stein–Chen method, point processes and compensators 1504–1527

BARBOUR, A. D., CHEN, LOUIS H. Y. AND LOH, WEI-LIEM. Compound Poisson approximation for nonnegative random variables via Stein's method 1843–1866

BASAK, GOPAL K. AND BHATTACHARYA, RABI N. Stability in distribution for a class of singular diffusions 312–321

BERMAN, SIMEON M. A central limit theorem for the renormalized self-intersection local time of a stationary vector Gaussian process 61–81

BERTOIN, J. AND LE JAN, Y. Representation of measures by balayage from a regular recurrent point 538–548

BERTOIN, JEAN. An extension of Pitman's theorem for spectrally positive Lévy processes 1464–1483

BHATTACHARYA, RABI N. AND BASAK, GOPAL K. Stability in distribution for a class of singular diffusions 312–321

BIGGINS, J. D. Uniform convergence of martingales in the branching random walk 137–151

BISHOP, CHRISTOPHER J. Brownian motion in Denjoy domains . . 631–651

BOUGEROL, PHILIPPE AND PICARD, NICO. Strict stationarity of generalized autoregressive processes 1714–1730

BRAMSON, MAURY, GRIFFEATH, DAVID AND LAWLER, GREGORY F. Internal diffusion limited aggregation 2117–2140

BRASSESCO, STELLA. A note on planar Brownian motion 1498–1503

BROWN, TIMOTHY C. AND BARBOUR, A. D. The Stein–Chen method, point processes and compensators 1504–1527

BRYC, WŁODZIMIERZ. On the large deviation principle for stationary weakly dependent random fields 1004–1030
BRYDGES, DAVID, EVANS, STEVEN N. AND IMBRIE, JOHN Z. Self-avoiding walk on a hierarchical lattice in four dimensions ... 82–124
CATONI, OLIVIER. Rough large deviation estimates for simulated annealing. Application to exponential schedules 1109–1146
CHEN, DAYUE AND LIGGETT, THOMAS M. Finite reversible nearest particle systems in inhomogeneous and random environments 152–173
CHEN, HWA-NIEN. On the stability of a population growth model with sexual reproduction on $\mathbf{Z}^2$ 232–285
CHEN, LOUIS H. Y. AND CHOI, K. P. Some asymptotic and large deviation results in Poisson approximation 1867–1876
CHEN, LOUIS H. Y., LOH, WEI-LIEM AND BARBOUR, A. D. Compound Poisson approximation for nonnegative random variables via Stein's method 1843–1866
CHOI, K. P. AND CHEN, LOUIS H. Y. Some asymptotic and large deviation results in Poisson approximation 1867–1876
CSÁKI, ENDRE AND CSÖRGŐ, MIKLÓS. Inequalities for increments of stochastic processes and moduli of continuity 1031–1052
CSÖRGŐ, MIKLÓS AND CSÁKI, ENDRE. Inequalities for increments of stochastic processes and moduli of continuity 1031–1052
DALANG, ROBERT C. AND WALSH, JOHN B. The sharp Markov property of Lévy sheets 591–626
DAY, MARTIN V. Conditional exits for small noise diffusions with characteristic boundary 1385–1419
DEHEUVELS, PAUL AND MASON, DAVID M. Functional laws of the iterated logarithm for the increments of empirical and quantile processes 1248–1287
DE LA PEÑA, VICTOR. Decoupling and Khintchine's inequalities for U-statistics 1877–1892
DINWOODIE, I. H. AND ZABELL, S. L. Large deviations for exchangeable random vectors 1147–1166
DONNELLY, PETER AND JOYCE, PAUL. Weak convergence of population genealogical processes to the coalescent with ages 322–341
DUDLEY, R. M. Fréchet differentiability, p-variation and uniform Donsker classes 1968–1982
DYNKIN, E. B. Superdiffusions and parabolic nonlinear differential equations 942–962
EINMAHL, JOHN H. J. The a.s. behavior of the weighted empirical process and the LIL for the weighted tail empirical process 681–695
ELTON, J. AND HILL, T. P. Fusions of a probability distribution .. 421–454
EVANS, STEVEN N. Polar and nonpolar sets for a tree indexed process 579–590

EVANS, STEVEN N., IMBRIE, JOHN Z. AND BRYDGES, DAVID. Self-avoiding walk on a hierarchical lattice in four dimensions . . . 82–124
FERNIQUE, X. Sur la regularité des fonctions aléatoires d'Ornstein–Uhlenbeck à valeurs dans l_p, $p \in [1, \infty[$ 1441–1449
FINNER, HELMUT. A generalization of Hölder's inequality and some probability inequalities 1893–1901
FISCH, ROBERT. Clustering in the one-dimensional three-color cyclic cellular automaton 1528–1548
FISHER, EVAN. On the law of the iterated logarithm for martingales 675–680
FITZSIMMONS, P. J. AND GETOOR, R. K. On the distribution of the Hilbert transform of the local time of a symmetric Lévy process 1484–1497
FITZSIMMONS, P. J. AND KANDA, MAMORU. On Choquet's dichotomy of capacity for Markov processes 342–349
FLEISCHMANN, KLAUS AND GREVEN, ANDREAS. Localization and selection in a mean field branching random walk in a random environment 2141–2163
FLEMING, W. H. AND JAMES, M. R. Asymptotic series and exit time probabilities 1369–1384
FREIDLIN, MARK I. AND WENTZELL, ALEXANDER D. Reaction–diffusion equations with randomly perturbed boundary conditions 963–986
GETOOR, R. K. AND FITZSIMMONS, P. J. On the distribution of the Hilbert transform of the local time of a symmetric Lévy process 1484–1497
GILAT, DAVID AND HILL, T. P. One-sided refinements of the strong law of large numbers and the Glivenko–Cantelli theorem 1213–1221
GREVEN, ANDREAS AND FLEISCHMANN, KLAUS. Localization and selection in a mean field branching random walk in a random environment 2141–2163
GRIFFEATH, DAVID, LAWLER, GREGORY F. AND BRAMSON, MAURY. Internal diffusion limited aggregation 2117–2140
GRIFFIN, PHILIP S. AND MCCONNELL, TERRY R. On the position of a random walk at the time of first exit from a sphere 825–854
GRÜBEL, RUDOLF AND PITTS, SUSAN M. A functional approach to the stationary waiting time and idle period distributions of the GI/G/1 queue 1754–1778
HAHN, MARJORIE G. AND WEINER, DANIEL C. Asymptotic behavior of self-normalized trimmed sums: Nonnormal limits 455–482
HENZE, N. AND VOIGT, B. Almost sure convergence of certain slowly changing symmetric one- and multi-sample statistics . 1086–1098
HILDEBRAND, ADOLF. A note on the convergence of sums of independent random variables 1204–1212
HILL, T. P. AND ELTON, J. Fusions of a probability distribution . . 421–454

HILL, T. P. AND GILAT, DAVID. One-sided refinements of the strong law of large numbers and the Glivenko–Cantelli theorem 1213–1221
HOUDRÉ, CHRISTIAN. On the spectral SLLN and pointwise ergodic theorem in L^α 1731–1753
HUGHES, H. R. Brownian exit distributions from normal balls in $S^3 \times H^3$ 655–659
IMBRIE, JOHN Z., BRYDGES, DAVID AND EVANS, STEVEN N. Self-avoiding walk on a hierarchical lattice in four dimensions . . . 82–124
INGLOT, TADEUSZ, KALLENBERG, WILBERT C. M. AND LEDWINA, TERESA. Strong moderate deviation theorems 987–1003
JAMES, M. R. AND FLEMING, W. H. Asymptotic series and exit time probabilities 1369–1384
JOYCE, PAUL AND DONNELLY, PETER. Weak convergence of population genealogical processes to the coalescent with ages 322–341
JUREK, ZBIGNIEW J. Operator exponents of probability measures and Lie semigroups 1053–1062
KALIKOW, STEVEN AND WEISS, BENJAMIN. Explicit codes for some infinite entropy Bernoulli shifts 397–402
KALIKOW, STEVEN A. AND ALEXANDER, KENNETH S. Random stationary processes 1174–1198
KALLENBERG, WILBERT C. M., LEDWINA, TERESA AND INGLOT, TADEUSZ. Strong moderate deviation theorems 987–1003
KANDA, MAMORU AND FITZSIMMONS, P. J. On Choquet's dichotomy of capacity for Markov processes 342–349
KEENER, ROBERT W. Limit theorems for random walks conditioned to stay positive 801–824
KESTEN, HARRY AND LAWLER, GREGORY F. A necessary condition for making money from fair games 855–882
KESTEN, HARRY AND MALLER, R. A. Ratios of trimmed sums and order statistics 1805–1842
KHOSHNEVISAN, DAVAR. Moment inequalities for functionals of a Brownian convex hull 627–630
LALLEY, S. AND SELLKE, T. Limit theorems for the frontier of a one-dimensional branching diffusion 1310–1340
LALLEY, STEVEN P. Brownian motion and the equilibrium measure on the Julia set of a rational mapping 1932–1967
LANDIM, C. Occupation time large deviations for the symmetric simple exclusion process 206–231
LAWLER, GREGORY F., BRAMSON, MAURY AND GRIFFEATH, DAVID. Internal diffusion limited aggregation 2117–2140
LAWLER, GREGORY F. AND KESTEN, HARRY. A necessary condition for making money from fair games 855–882
LEDWINA, TERESA, INGLOT, TADEUSZ AND KALLENBERG, WILBERT C. M. Strong moderate deviation theorems 987–1003

LEE, TZONG-YOW. Some large-deviation theorems for branching diffusions 1288–1309
LE JAN, Y. AND BERTOIN, J. Representation of measures by balayage from a regular recurrent point 538–548
LI, DELI, RAO, M. BHASKARA AND WANG, XIANGCHEN. The law of the iterated logarithm for independent random variables with multidimensional indices 660–674
LIAO, MING. Symmetry groups of Markov processes 563–578
LIGGETT, THOMAS M. The survival of one-dimensional contact processes in random environments 696–723
LIGGETT, THOMAS M. AND CHEN, DAYUE. Finite reversible nearest particle systems in inhomogeneous and random environments 152–173
LIU, ZHEN AND BACCELLI, FRANÇOIS. On a class of stochastic recursive sequences arising in queueing theory 350–374
LOH, WEI-LIEM, BARBOUR, A. D. AND CHEN, LOUIS H. Y. Compound Poisson approximation for nonnegative random variables via Stein's method 1843–1866
LYONS, RUSSELL. Random walks, capacity and percolation on trees 2043–2088
LYONS, RUSSELL AND PEMANTLE, ROBIN. Random walk in a random environment and first-passage percolation on trees 125–136
MALLER, R. A. AND KESTEN, HARRY. Ratios of trimmed sums and order statistics 1805–1842
MARCUS, MICHAEL B. AND ROSEN, JAY. p-variation of the local times of symmetric stable processes and of Gaussian processes with stationary increments 1685–1713
MARCUS, MICHAEL B. AND ROSEN, JAY. Sample path properties of the local times of strongly symmetric Markov processes via Gaussian processes 1603–1684
MARQUES, MAURO S. DE F. AND SAN MARTIN, LUIZ. Quasi-invariance of product measures under Lie group perturbations: Fisher information and L^2-differentiability 1420–1435
MASON, DAVID M. AND DEHEUVELS, PAUL. Functional laws of the iterated logarithm for the increments of empirical and quantile processes 1248–1287
MASON, DAVID M. AND SHORACK, GALEN R. Necessary and sufficient conditions for asymptotic normality of L-statistics 1779–1804
MCCONNELL, TERRY R. AND GRIFFIN, PHILIP S. On the position of a random walk at the time of first exit from a sphere 825–854
MELFI, VINCENT F. Nonlinear Markov renewal theory with statistical applications 753–771
MILLET, A., NUALART, D. AND SANZ, M. Large deviations for a class of anticipating stochastic differential equations 1902–1931
MOUNTFORD, T. S. The critical value for the uniform nearest particle process 2031–2042

NOBLE, CHRIS. Equilibrium behavior of the sexual reproduction process with rapid diffusion 724–745
NUALART, D., SANZ, M. AND MILLET, A. Large deviations for a class of anticipating stochastic differential equations 1902–1931
NUALART, DAVID. Randomized stopping points and optimal stopping on the plane 883–900
PEMANTLE, ROBIN. Automorphism invariant measures on trees . 1549–1566
PEMANTLE, ROBIN. The contact process on trees 2089–2116
PEMANTLE, ROBIN AND LYONS, RUSSELL. Random walk in a random environment and first-passage percolation on trees 125–136
PENROSE, MATHEW D. Semi-min-stable processes 1450–1463
PICARD, NICO AND BOUGEROL, PHILIPPE. Strict stationarity of generalized autoregressive processes 1714–1730
PITTS, SUSAN M. AND GRÜBEL, RUDOLF. A functional approach to the stationary waiting time and idle period distributions of the GI/G/1 queue 1754–1778
RAO, M. BHASKARA, WANG, XIANGCHEN AND LI, DELI. The law of the iterated logarithm for independent random variables with multidimensional indices 660–674
RÖCKNER, MICHAEL. On the parabolic Martin boundary of the Ornstein–Uhlenbeck operator on Wiener space 1063–1085
ROSEN, JAY. The asymptotics of stable sausages in the plane 29–60
ROSEN, JAY. Renormalization and limit theorems for self-intersections of superprocesses 1341–1368
ROSEN, JAY AND MARCUS, MICHAEL B. p-variation of the local times of symmetric stable processes and of Gaussian processes with stationary increments 1685–1713
ROSEN, JAY AND MARCUS, MICHAEL B. Sample path properties of the local times of strongly symmetric Markov processes via Gaussian processes 1603–1684
SAMUEL-CAHN, ESTER. A difference prophet inequality for bounded i.i.d. variables, with cost for observations 1222–1228
SAN MARTIN, LUIZ AND MARQUES, MAURO S. DE F. Quasi-invariance of product measures under Lie group perturbations: Fisher information and L^2-differentiability 1420–1435
SANZ, M., MILLET, A. AND NUALART, D. Large deviations for a class of anticipating stochastic differential equations 1902–1931
SCHINAZI, RINALDO. Brownian fluctuations of the edge for critical reversible nearest-particle systems 194–205
SCHONMANN, ROBERTO H. On the behavior of some cellular automata related to bootstrap percolation 174–193
SELLKE, T. AND LALLEY, S. Limit theorems for the frontier of a one-dimensional branching diffusion 1310–1340
SHEEHY, ANNE AND WELLNER, JON A. Uniform Donsker classes of functions 1983–2030

SHEPP, LARRY A. AND ZEITOUNI, OFER. A note on conditonal exponential moments and Onsager-Machlup functionals 652–654
SHIEH, NARN-RUEIH. Multiple points of sample paths of Markov processes 553–562
SHIELDS, PAUL C. Entropy and prefixes 403–409
SHIELDS, PAUL C. String matching: The ergodic case 1199–1203
SHORACK, GALEN R. AND MASON, DAVID M. Necessary and sufficient conditions for asymptotic normality of L-statistics 1779–1804
SOWERS, RICHARD B. Large deviations for a reaction–diffusion equation with non-Gaussian perturbations 504–537
SZCZOTKA, WŁADYSŁAW. A distributional form of Little's law in heavy traffic 790–800
TALAGRAND, M. Necessary and sufficient conditions for sample continuity of random Fourier series and of harmonic infinitely divisible processes 1–28
TAQQU, MURAD S. AND AVRAM, FLORIN. Weak convergence of sums of moving averages in the α-stable domain of attraction 483–503
TAVARÉ, SIMON AND ARRATIA, RICHARD. The cycle structure of random permutations 1567–1591
THOMASSEN, CARSTEN. Isoperimetric inequalities and transient random walks on graphs 1592–1600
TRIBE, ROGER. The behavior of superprocesses near extinction .. 286–311
VOIGT, B. AND HENZE, N. Almost sure convergence of certain slowly changing symmetric one- and multi-sample statistics . 1086–1098
WALSH, JOHN B. AND DALANG, ROBERT C. The sharp Markov property of Lévy sheets 591–626
WANG, XIANGCHEN, LI, DELI AND RAO, M. BHASKARA. The law of the iterated logarithm for independent random variables with multidimensional indices 660–674
WEINER, DANIEL C. AND HAHN, MARJORIE G. Asymptotic behavior of self-normalized trimmed sums: Nonnormal limits 455–482
