# CORRECTION

# OPTIMAL DISCRIMINATION DESIGNS FOR MULTIFACTOR EXPERIMENTS

BY HOLGER DETTE AND INGO RÖDER

*The Annals of Statistics* (1997) **25** 1161–1175

In our recent paper, Dette and Röder (1997), we incorrectly stated on page 1163 (lines 7 and 8 from the top) that the canonical moments were introduced by Studden (1980). The theory of canonical moments was introduced by Skibinsky (1967). What we intended was the following statement: *Our argument is based on an application, as first employed by Studden (1980), of the theory of canonical moments.*
