

CORRECTION

**HYPER MARKOV LAWS IN THE STATISTICAL ANALYSIS OF
DECOMPOSABLE GRAPHICAL MODELS**

BY A. P. DAWID AND S. L. LAURITZEN

The Annals of Statistics (1993) **21** 1272–1317

We are grateful to H el ene Massam and Muriel Casalis for pointing out an inaccuracy in the statement of the proof of Theorem 2.6. In order to correct this, on the last line of page 1278 and the second line of page 1279, it is necessary to replace $\text{nd}(\nu)$ by $\text{pr}(\nu)$, the set of predecessors of ν in a well-numbering of V . The original second line of page 1279 then follows from the equivalence mentioned in the second paragraph of page 1277.
