CONTENTS OF VOLUME 14

Special Invited Papers, Invited Papers, Articles and Short Communications

AKMAN, V. E. AND RAFTERY, A. E. Asymptotic inference for a change-point Poisson process 1583–1590

AKRITAS, MICHAEL G. Empirical processes associated with V-statistics and a class of estimators under random censoring 619–637

ALVO, MAYER AND FEIGIN, PAUL D. Intergroup diversity and concordance for ranking data: An approach via metrics for permutations 691–707

ANDERSON, BLAIR M., ANDERSON, T. W. AND OLKIN, INGRAM. Maximum likelihood estimators and likelihood ratio criteria in multivariate components of variance 405–417

ANDERSON, T. W., OLKIN, INGRAM AND ANDERSON, BLAIR M. Maximum likelihood estimators and likelihood ratio criteria in multivariate components of variance 405–417

ARRATIA, RICHARD, GORDON, LOUIS AND WATERMAN, MICHAEL. An extreme value theory for sequence matching 971–993

BAILEY, R. A. AND SPEED, T. P. Rectangular lattice designs: Efficiency factors and analysis 874–895

BAR-LEV, SHAUL K. AND ENIS, PETER. Reproducibility and natural exponential families with power variance functions 1507–1522

BARNDORFF-NIELSEN, O. E. Likelihood and observed geometries 856–873

BARRON, ANDREW R. Discussion 26–30

BARRY, DANIEL. Nonparametric Bayesian regression 934–953

BERAN, R. AND MILLAR, P. W. Confidence sets for a multivariate distribution 431–443

BERAN, RUDOLF. Discussion 1295–1298

BERAN, RUDOLF. Simulated power functions 151–173

BERGER, JAMES. Discussion 30–37

BERGER, JAMES AND BERLINER, L. MARK. Robust Bayes and empirical Bayes analysis with ε-contaminated priors 461–486

BERLINER, L. MARK AND BERGER, JAMES. Robust Bayes and empirical Bayes analysis with ε-contaminated priors 461–486

BHANSALI, R. J. Asymptotically efficient selection of the order by the criterion autoregressive transfer function 315–325

BHATTACHARYYA, B. B. AND RICHARDSON, G. D. Consistent estimators in nonlinear regression for a noncompact parameter space 1591–1596

BICKEL, P. J., GÖTZE, F. AND VAN ZWET, W. R. The Edgeworth expansion for U-statistics of degree two 1463–1484

BRILLINGER, DAVID R. Discussion 819–822

CARLSTEIN, EDWARD. The use of subseries values for estimating the variance of a general statistic from a stationary sequence . 1171–1179

CARROLL, RAYMOND J. AND RUPPERT, DAVID. Discussion 1298–1301

CHANG, TED. Spherical regression 907–924
CHAUHAN, CHAND K. AND DEAN, A. M. Orthogonality of factorial effects 743–752
CHEN, JEESEN AND HWANG, JIUNN TZON. Improved confidence sets for the coefficients of a linear model with spherically symmetric errors 444–460
CHIU, SHEAN-TSONG. Statistical estimation of the parameters of a moving source from array data 559–578
CHRISTENSEN, RONALD. Finite stopping in sequential sampling without recall from a Dirichlet process 275–282
CLAYTON, MURRAY K. Discussion 37–40
COLLINS, JOHN R. Maximum asymptotic variances of trimmed means under asymmetric contamination 348–354
COOK, R. DENNIS AND GOLDBERG, MIRIAM L. Curvatures for parameter subsets in nonlinear regression 1399–1418
COX, D. R. AND MCCULLAGH, P. Invariants and likelihood ratio statistics 1419–1430
CROWLEY, JOHN, TSAI, WEI-YANN AND LEURGANS, SUE. Nonparametric estimation of a bivariate survival function in the presence of censoring 1351–1365
CSÖRGŐ, SÁNDOR. Testing for normality in arbitrary dimension . 708–723
DABROWSKA, DOROTA M. Rank tests for independence for bivariate censored data 250–264
DAS, RITA AND SINHA, BIMAL K. Detection of multivariate outliers with dispersion slippage in elliptically symmetric distributions 1619–1624
DAS GUPTA, ANIRBAN. Simultaneous estimation in the multiparameter gamma distribution under weighted quadratic losses 206–219
DAVIS, RICHARD AND RESNICK, SIDNEY. Limit theory for the sample covariance and correlation functions of moving averages 533–558
DAWID, A. P. Discussion 40–41
DEAN, A. M. AND CHAUHAN, CHAND K. Orthogonality of factorial effects 743–752
DIACONIS, P. AND FREEDMAN, D. On inconsistent Bayes estimates of location 68–87
DIACONIS, P. AND FREEDMAN, D. Rejoinder 63–67
DIACONIS, PERSI AND FREEDMAN, DAVID. On the consistency of Bayes estimates 1–26
DOKSUM, KJELL A. AND LO, ALBERT Y. Discussion 42–45
DOSS, HANI. Discussion 45–47
EFRON, B. Discussion 1301–1303
ENIS, PETER AND BAR-LEV, SHAUL K. Reproducibility and natural exponential families with power variance functions 1507–1522
ESTY, WARREN W. The efficiency of Good's nonparametric coverage estimator 1257–1260

FEIGIN, PAUL D. AND ALVO, MAYER. Intergroup diversity and concordance for ranking data: An approach via metrics for permutations 691–707
FELSENSTEIN, JOSEPH. Discussion 1304–1305
FLURY, BERNARD N. Asymptotic theory for common principal component analysis 418–430
FOTOPOULOS, S., LESLIE, J. R. AND STEPHENS, M. A. Asymptotic distribution of the Shapiro–Wilk W for testing for normality . 1497–1506
FOX, ROBERT AND TAQQU, MURAD S. Large-sample properties of parameter estimates for strongly dependent stationary Gaussian time series 517–532
FRANKE, J. AND HANNAN, E. J. Discussion 822–824
FREEDMAN, D. AND DIACONIS, P. On inconsistent Bayes estimates of location 68–87
FREEDMAN, D. AND DIACONIS, P. Rejoinder 63–67
FREEDMAN, D. A. Discussion 1305–1308
FREEDMAN, DAVID AND DIACONIS, PERSI. On the consistency of Bayes estimates 1–26
FREES, EDWARD W. Nonparametric renewal function estimation . 1366–1378
GAJEK, LESŁAW. On improving density estimators which are not bona fide functions 1612–1618
GARDINER, JOSEPH C., SUSARLA, V. AND VAN RYZIN, JOHN. Time sequential estimation of the exponential mean under random withdrawals 607–618
GENEST, CHRISTIAN, MCCONWAY, KEVIN J. AND SCHERVISH, MARK J. Characterization of externally Bayesian pooling operators 487–501
GEORGE, EDWARD I. Minimax multiple shrinkage estimation ... 188–205
GHOSH, MALAY. Discussion 1308–1310
GILL, RICHARD D. The total time on test plot and the cumulative total time on test statistic for a counting process 1234–1239
GLESER, LEON JAY. Minimax estimators of a normal mean vector for arbitrary quadratic loss and unknown covariance matrix .. 1625–1633
GÖTZE, F., VAN ZWET, W. R. AND BICKEL, P. J. The Edgeworth expansion for U-statistics of degree two 1463–1484
GOLDBERG, MIRIAM L. AND COOK, R. DENNIS. Curvatures for parameter subsets in nonlinear regression 1399–1418
GORDON, LOUIS, WATERMAN, MICHAEL AND ARRATIA, RICHARD. An extreme value theory for sequence matching 971–993
GUESS, FRANK, HOLLANDER, MYLES AND PROSCHAN, FRANK. Testing exponentiality versus a trend change in mean residual life 1388–1398
GUTTMAN, IRWIN, MENZEFRICKE, U. AND TYLER, DAVID. Magnitudinal effects in the normal multivariate model 1555–1571
HABIB, M. G. AND THOMAS, D. R. Chi-square goodness-of-fit tests for randomly censored data 759–765

HALL, PETER. Discussion 1311–1312
HALL, PETER. On the bootstrap and confidence intervals 1431–1452
HALL, PETER. On the number of bootstrap simulations required to construct a confidence interval 1453–1462
HANNAN, E. J. AND FRANKE, J. Discussion 822–824
HARTIGAN, J. A. Discussion 48
HINKLEY, DAVID. Discussion 1312–1316
HJORT, NILS L. Discussion 49–55
HOCHBERG, YOSEF AND POSNER, MARC E. On optimal decision rules for signs of parameters 733–742
HOLLAND, PAUL W. AND ROSENBAUM, PAUL R. Conditional association and unidimensionality in monotone latent variable models 1523–1543
HOLLANDER, MYLES, PROSCHAN, FRANK AND GUESS, FRANK. Testing exponentiality versus a trend change in mean residual life 1388–1398
HWANG, JIUNN TZON AND CHEN, JEESEN. Improved confidence sets for the coefficients of a linear model with spherically symmetric errors 444–460
JANSSEN, ARNOLD. Asymptotic properties of Neyman–Pearson tests for infinite Kullback–Leibler information 1068–1079
JENNISON, CHRISTOPHER AND KULKARNI, RADHIKA V. Optimal properties of the Bechhofer-Kulkarni Bernoulli selection procedure 298–314
JEWELL, NICHOLAS P., TSAI, WEI-YANN AND WANG, MEI-CHENG. Asymptotic properties of the product limit estimate under random truncation 1597–1605
JÖCKEL, KARL-HEINZ. Finite sample properties and asymptotic efficiency of Monte Carlo tests 336–347
KALLENBERG, W. C. M. AND KESTER, A. D. M. Large deviations of estimators 648–664
KARIYA, TAKEAKI AND TOYOOKA, YASUYUKI. An approach to upper bound problems for risks of generalized least squares estimators 679–690
KESTER, A. D. M. AND KALLENBERG, W. C. M. Large deviations of estimators 648–664
KIIVERI, H. T. AND SPEED, T. P. Gaussian Markov distributions over finite graphs 138–150
KOUL, HIRA L. Minimum distance estimation and goodness-of-fit tests in first-order autoregression 1194–1213
KRASKER, WILLIAM S. AND PRATT, JOHN W. Discussion 55–58
KREDLER, CHRISTIAN. Behaviour of third order terms in quadratic approximations of LR-statistics in multivariate generalized linear models 326–335
KÜNSCH, HANS R. Discussion 824–826

KULKARNI, RADHIKA V. AND JENNISON, CHRISTOPHER. Optimal properties of the Bechhofer-Kulkarni Bernoulli selection procedure 298–314
LE CAM, L. Discussion 59–60
LEE, JAE JUNE AND MILLER, ROBERT B. Discussion 827–829
LERCHE, HANS RUDOLF. The shape of Bayes tests of power one . 1030–1048
LESLIE, J. R., STEPHENS, M. A. AND FOTOPOULOS, S. Asymptotic distribution of the Shapiro–Wilk W for testing for normality . 1497–1506
LEURGANS, SUE, CROWLEY, JOHN AND TSAI, WEI-YANN. Nonparametric estimation of a bivariate survival function in the presence of censoring 1351–1365
LI, KER-CHAU. Asymptotic optimality of C_L and generalized cross-validation in ridge regression with application to spline smoothing 1101–1112
LINDLEY, DENNIS V. Discussion 60–63
LINDSAY, BRUCE G. Exponential family mixture models (with least-squares estimators) 124–137
LO, ALBERT Y. Bayesian statistical inference for sampling a finite population 1226–1233
LO, ALBERT Y. AND DOKSUM, KJELL A. Discussion 42–45
LO, SHAW-HWA. Estimation of a unimodal distribution function . 1132–1138
MACGILLIVRAY, H. L. Skewness and asymmetry: Measures and orderings 994–1011
MAMMEN, ENNO. The statistical information contained in additional observations 665–678
MARTIN, R. DOUGLAS AND YOHAI, VICTOR J. Influence functionals for time series 781–818
MARTIN, R. DOUGLAS AND YOHAI, VICTOR J. Rejoinder 840–855
MCCONWAY, KEVIN J., SCHERVISH, MARK J. AND GENEST, CHRISTIAN. Characterization of externally Bayesian pooling operators 487–501
MCCULLAGH, P. AND COX, D. R. Invariants and likelihood ratio statistics 1419–1430
MCKEAGUE, IAN W. Estimation for a semimartingale regression model using the method of sieves 579–589
MENZEFRICKE, U., TYLER, DAVID AND GUTTMAN, IRWIN. Magnitudinal effects in the normal multivariate model 1555–1571
MIELNICZUK, JAN. Some asymptotic properties of kernel estimators of a density function in case of censored data 766–773
MILLAR, P. W. AND BERAN, R. Confidence sets for a multivariate distribution 431–443
MILLER, ROBERT B. AND LEE, JAE JUNE. Discussion 827–829
MITCHELL-OLDS, THOMAS. Discussion 1316–1318
MORGENTHALER, STEPHAN. Asymptotics for configural location estimators 174–187

MOUSTAKIDES, GEORGE V. Optimal stopping times for detecting changes in distributions 1379–1387
MUKERJEE, HARI, ROBERTSON, TIM AND WRIGHT, F. T. A probability inequality for elliptically contoured densities with applications in order restricted inference 1544–1554
NAIMAN, DANIEL Q. Conservative confidence bands in curvilinear regression 896–906
OGBONMWAN, S. M. AND WYNN, H. P. Discussion 1340–1343
OLKIN, INGRAM, ANDERSON, BLAIR M., AND ANDERSON, T. W. Maximum likelihood estimators and likelihood ratio criteria in multivariate components of variance 405–417
OLSHEN, RICHARD A. Discussion 1318–1320
PARKE, WILLIAM R. Pseudo maximum likelihood estimation: the asymptotic distribution 355–357
POLLAK, MOSHE. On the asymptotic formula for the probability of a Type I error of mixture type power one tests 1012–1029
POOR, H. VINCENT. Discussion 829–831
PORTNOY, STEPHEN. Asymptotic behavior of the empiric distribution of M-estimated residuals from a regression model with many parameters 1152–1170
POSKITT, D. S. A Bayes procedure for the identification of univariate time series models 502–516
POSNER, MARC E. AND HOCHBERG, YOSEF. On optimal decision rules for signs of parameters 733–742
PRASAD, N. G. N. AND RAO, J. N. K. Discussion 1320–1322
PRATT, JOHN W. AND KRASKER, WILLIAM S. Discussion 55–58
PROSCHAN, FRANK, GUESS, FRANK AND HOLLANDER, MYLES. Testing exponentiality versus a trend change in mean residual life 1388–1398
RAFTERY, A. E. AND AKMAN, V. E. Asymptotic inference for a change-point Poisson process 1583–1590
RAO, J. N. K. AND PRASAD, N. G. N. Discussion 1320–1322
RESNICK, SIDNEY AND DAVIS, RICHARD. Limit theory for the sample covariance and correlation functions of moving averages 533–558
RICHARDSON, G. D. AND BHATTACHARYYA, B. B. Consistent estimators in nonlinear regression for a noncompact parameter space 1591–1596
RISSANEN, JORMA. Stochastic complexity and modeling 1080–1100
ROBERTSON, TIM, WRIGHT, F. T. AND MUKERJEE, HARI. A probability inequality for elliptically contoured densities with applications in order restricted inference 1544–1554
ROBINSON, P. M. Discussion 832–834
ROSENBAUM, PAUL R. AND HOLLAND, PAUL W. Conditional association and unidimensionality in monotone latent variable models 1523–1543

RUKHIN, ANDREW L. Admissibility and minimaxity results in the estimation problem of exponential quantiles 220–237
RUPPERT, DAVID AND CARROLL, RAYMOND J. Discussion 1298–1301
SADOOGHI-ALVANDI, S. M. Admissible estimation of the binomial parameter n 1634–1641
SCHÄFER, HELMUT. Local convergence of empirical measures in the random censorship situation with application to density and rate estimators 1240–1245
SCHERVISH, MARK J., GENEST, CHRISTIAN AND MCCONWAY, KEVIN J. Characterization of externally Bayesian pooling operators 487–501
SCHICK, ANTON. On asymptotically efficient estimation in semiparametric models 1139–1151
SHAO, JUN. Discussion 1322–1326
SIEGMUND, DAVID. The 1984 Wald Memorial Lectures: Boundary crossing probabilities and statistical applications 361–404
SIMONOFF, JEFFREY S. AND TSAI, CHIH-LING. Discussion 1326–1328
SIMONS, GORDON. Bayes rules for a clinical-trials model with dichotomous responses 954–970
SINGH, KESAR. Discussion 1328–1330
SINHA, BIMAL K. AND DAS, RITA. Detection of multivariate outliers with dispersion slippage in elliptically symmetric distributions 1619–1624
SMITH, R. L., WEI, L. J. AND SMYTHE, R. T. K-treatment comparisons with restricted randomization rules in clinical trials . . 265–274
SMYTHE, R. T., SMITH, R. L. AND WEI, L. J. K-treatment comparisons with restricted randomization rules in clinical trials . . 265–274
SPEED, T. P. AND BAILEY, R. A. Rectangular lattice designs: Efficiency factors and analysis 874–895
SPEED, T. P. AND KIIVERI, H. T. Gaussian Markov distributions over finite graphs 138–150
SRIVASTAVA, M. S. Discussion 1331–1335
STEELE, J. MICHAEL. An Efron–Stein inequality for nonsymmetric statistics 753–758
STEFANOV, VALERI T. Efficient sequential estimation in exponential-type processes 1606–1611
STEPHENS, M. A., FOTOPOULOS, S. AND LESLIE, J. R. Asymptotic distribution of the Shapiro–Wilk W for testing for normality . 1497–1506
STONE, CHARLES J. The dimensionality reduction principle for generalized additive models 590–606
STUTE, WINFRIED. Conditional empirical processes 638–647
SUSARLA, V., VAN RYZIN, JOHN AND GARDINER, JOSEPH C. Time sequential estimation of the exponential mean under random withdrawals 607–618
SWEETING, T. J. Asymptotic conditional inference for the offspring mean of a supercritical Galton–Watson process 925–933

SWEETING, T. J. Asymptotically independent scale-free spacings with applications to discordancy testing 1485–1496
SWEETING, T. J. On a converse to Scheffé's theorem 1252–1256
TAQQU, MURAD S. AND FOX, ROBERT. Large-sample properties of parameter estimates for strongly dependent stationary Gaussian time series 517–532
THOMAS, D. R. AND HABIB, M. G. Chi-square goodness-of-fit tests for randomly censored data 759–765
TIBSHIRANI, ROBERT. Discussion 1335–1339
TOYOOKA, YASUYUKI. Second-order risk structure of GLSE and MLE in a regression with a linear process 1214–1225
TOYOOKA, YASUYUKI AND KARIYA, TAKEAKI. An approach to upper bound problems for risks of generalized least squares estimators 679–690
TSAI, CHIH-LING AND SIMONOFF, JEFFREY S. Discussion 1326–1328
TSAI, WEI-YANN. Estimation of survival curves from dependent censorship models via a generalized self-consistent property with nonparametric Bayesian estimation application 238–249
TSAI, WEI-YANN, LEURGANS, SUE AND CROWLEY, JOHN. Nonparametric estimation of a bivariate survival function in the presence of censoring 1351–1365
TSAI, WEI-YANN, WANG, MEI-CHENG AND JEWELL, NICHOLAS P. Asymptotic properties of the product limit estimate under random truncation 1597–1605
TSAY, RUEY S. Discussion 835–836
TYLER, DAVID, GUTTMAN, IRWIN AND MENZEFRICKE, U. Magnitudinal effects in the normal multivariate model 1555–1571
VAN RYZIN, JOHN, GARDINER, JOSEPH C. AND SUSARLA, V. Time sequential estimation of the exponential mean under random withdrawals 607–618
and Gardiner, Joseph C
VAN ZWET, W. R., BICKEL, P. J. AND GÖTZE, F. The Edgeworth expansion for *U*-statistics of degree two 1463–1484
WANG, CHAMONT W. H. A minimum distance estimator for first-order autoregressive processes 1180–1193
WANG, JANE-LING. Asymptotically minimax estimators for distributions with increasing failure rate 1113–1131
WANG, MEI-CHENG, JEWELL, NICHOLAS P. AND TSAI, WEI-YANN. Asymptotic properties of the product limit estimate under random truncation 1597–1605
WATERMAN, MICHAEL, ARRATIA, RICHARD AND GORDON, LOUIS. An extreme value theory for sequence matching 971–993
WEBER, NEVILLE. Discussion 1339–1340
WEGMAN, EDWARD J. Discussion 836–837
WEI, L. J., SMYTHE, R. T. AND SMITH, R. L. *K*-treatment comparisons with restricted randomization rules in clinical trials .. 265–274
WELSH, A. H. Bahadur representations for robust scale estimators based on regression residuals 1246–1251

WEST, MIKE. Discussion 838–840
WESTFALL, PETER H. Asymptotic normality of the ANOVA estimates of components of variance in the nonnormal, unbalanced hierarchal mixed model 1572–1582
WIENS, DOUG. Minimax variance M-estimators of location in Kolmogorov neighbourhoods 724–732
WITMER, JEFFREY A. Bayesian multistage decision problems ... 283–297
WONG, WING HUNG. Theory of partial likelihood 88–123
WOODROOFE, MICHAEL. Very weak expansions for sequential confidence levels 1049–1067
WRIGHT, F. T., MUKERJEE, HARI AND ROBERTSON, TIM. A probability inequality for elliptically contoured densities with applications in order restricted inference 1544–1554
WU, C. F. J. Jackknife, bootstrap and other resampling methods in regression analysis 1261–1295
WU, C. F. J. Rejoinder 1343–1350
WU, TIEE-JIAN. A large deviation result for signed linear rank statistics under the symmetry hypothesis 774–780
WYNN, H. P. AND OGBONMWAN, S. M. Discussion 1340–1343
YOHAI, VICTOR J. AND MARTIN, R. DOUGLAS. Influence functionals for time series 781–818
YOHAI, VICTOR J. AND MARTIN, R. DOUGLAS. Rejoinder 840–855

Notes and Corrections

COHEN, ARTHUR, LO, SHAW-HWA AND SINGH, KESAR. Acknowledgment of priority to "Estimating a quantile of a symmetric distribution" 1642
FAHRMEIR, LUDWIG AND KAUFMANN, HEINZ. Correction to "Consistency and asymptotic normality of the maximum likelihood estimator in generalized linear models" 1643
HABERMAN, SHELBY J. Correction to "Adjustment by minimum discriminant information" 358
HUDSON, H. M. Correction to "Adaptive estimators for simultaneous estimation of Poisson means" 360
MARTINSEK, ADAM T. Correction to "Second order approximation to the risk of a sequential procedure" 359
