

## INDEX TO VOLUME 4

- Applebaum, C. H. *Generalizations of the First Axiom of Countability*, 597.
- Baker, George A., Jr. *Certain invariance and convergence properties of the Padé Approximant*, 141.
- Barnsley, Michael. *The Bounding Properties of the Multipoint Padé Approximant to a Series of Stieltjes*, 331.
- Bessis, J. D. and Talman, J. D. *Variational Approach to the Theory of Operator Padé Approximants*, 151.
- Bohl, Erich. *Zur Theorie P-beschränkter Operatoren*, 31.
- Brezinski, Claude. *Some Results and Applications About the Vector  $\epsilon$ -Algorithm*, 335.
- Brown, Robert F. *On some old problems of fixed point theory*, 3.
- Campbell, Douglas Michael. *Applications and proof of a uniqueness theorem for linear invariant families of finite order*, 621.
- Ching, Chin-Hung and Chui, Charles K. *Uniqueness of solutions of an infinite system of equations*, 635.
- Chisholm, J. S. R. and Gammel, John L. *Applications of Padé Approximation to Numerical Integration*, 159.
- Chui, Charles K. *Approximation Induced by a Fourier Series*, 643.
- Chui, Charles K. See Ching, C-H.
- Critchfield, C. L. *Rational Approximants for Inverse Functions of Two Variables*, 339.
- Cronin, Jane. *Quasilinear equations and equations with large nonlinearities*, 41.
- Darst, R. B. *Remarks on Basic Classes of  $C^\infty$ -Functions*, 351.
- Donoghue, William F., Jr. *The Interpolation of Pick Functions*, 169.
- Dudley, R. M. *Recession of some Relativistic Markov Processes*, 401.
- Edrei, Albert. *The Padé table of meromorphic functions of small order with negative zeros and positive poles*, 175.
- Ellis, Homer G. *Continued Fraction Solutions of the General Riccati Differential Equation*, 353.
- Fadell, Edward. *A remark on simple path fields in polyhedra of characteristic zero*, 65.
- Fair, Wyman. *Continued Fraction Solution to Fredholm Integral Equations*, 357.
- Field, David A. *A Priori Truncation Error Estimates for Continued Fractions  $K(1/b_n)$* , 361.
- Fisher, Michael. *Critical point phenomena—The role of series expansions*, 181.
- Fleming, Wendell H. *Stochastically Perturbed Dynamical Systems*, 407.
- Gammel, John L. *Continuation of Functions Beyond Natural Boundaries*, 203.
- Gammel, John L. See Critchfield, C. L.
- Gatica, Juan A. and Kirk, W. A. *Fixed point theorems for contraction mappings applications to nonexpansive and pseudo-contractive mappings*, 69.
- Golden, J. E. See McGuire, J. H.
- Golub, Gene H. *Bounds for Matrix Moments*, 207.
- Graffi, S. and Grechi, V. *Stieltjes Type Continued Fractions in Quantum Electrodynamics*, 363.
- Gragg, William B. *Matrix Interpretations and Applications of the Continued Fraction Algorithm*, 213.

- Grecchi, V. See Graffi, S.
- Griego, Richard J. *Limit Theorems for a class of Multiplicative Operator Functionals of Brownian Motion*, 435.
- Gustafson, Sven-Åke. *On Computational Applications of the Theory of Moment Problems*, 227.
- Hayden, T. L. *Continued Fractions in Banach Spaces*, 367.
- Hersh, Reuben. *Introduction*, 399.
- Hersh, Reuben. *Random Evolutions: A Survey of Results and Problems*, 443.
- Holley, Richard. *Recent results on the Stochastic Ising Model*, 479.
- Jones, William B. *Introduction*, 135.
- Jones William B. *Analysis of Truncation Error of Approximations Based on the Padé Table and Continued Fractions*, 241.
- Kac, Mark. *A Stochastic Model Related to the Telegrapher's Equation*, 497.
- Kac, Mark. *Probabilistic Methods in some Problems of Scattering Theory*, 511.
- Kaufman, E. H. and Taylor, G. D. *An Application of Linear Programming to Rational Approximation*, 371.
- Kirk, W. A. See Gatica, J. A.
- Luke, Yudell L. *Rational Approximations with Applications to the Solution of Functional Equations*, 251.
- Magnus, Arne. *P-fractions and the Padé table*, 257.
- Masson, D. *Some Applications of Padé Approximants to Quantum Field Theory Models*, 261.
- McGuire, J. H., Golden, J. E. and Nuttall, J. *Solution of the Schrödinger Equation Padé Approximants to Sum Solution Asymptotic Series*, 375.
- McMinn, T. J. *A Formal Number-termed System based on Recursion*, 649.
- Moerbeke, Pierre van. *Optimal Stopping and Free Boundary Problems*, 537.
- Nuttall, J. *The Convergence of Certain Padé Approximants*, 269.
- Nuttall, J. See McGuire, J. H.
- Poreda, S. J. and Shapiro, G. S. *Lower Bounds for Polynomial Approximations to Rational Functions*, 377.
- Roach, F. A. *Diophantine Approximation in a Vector Space*, 379.
- Sawyer, Stanley. *The Skorokhod Representation*, 575.
- Scholz, U. Kurt. *The Nielson fixed point theory for noncompact spaces*, 81.
- Scofield, D. F. *A Note on the use of a continued Fraction for Perturbation Theory*, 383.
- Scott, Walter T. *Remarks on the life of Professor H. S. Wall*, 137.
- Shapiro, G. S. See Poreda, S. J.
- Sheng, Ping. *Application of Two-Point Padé Approximants to Some Solid State Problems*, 385.
- Shenton, L. R. *Sequences of Irrational Fraction Approximants to Some Hypergeometric Functions*, 387.
- Talman, J. D. See Bessis, J. D.
- Taylor, G. D. See Kaufman, E. H.
- Thomas, J. W. *Upper and lower bounds for the number of solutions of functional equations involving k-set contractions*, 89.
- Thompson, Richard B. *Introduction*, 1.
- Thompson, Richard B. *Fixed point theory via semicomplexes*, 15.
- Thron, W. J. *A Survey of Recent Convergence Results for Continued Fractions*, 273.
- Waadeland, Haakon. *T-Fractions From a Different Point of View*, 391.
- Walsh, J. L. *The Role of the Pole in Rational Approximation*, 283.

- Ward, L. E., Jr. *Monotone surjections having more than one fixed point*, 95.
- Wheeler, John C. *Modified Moments and Gaussian Quadratures*, 287.
- Wuytack, Luc. *Extrapolation to the Limit by Using continued fraction interpolation*, 395.
- Wynn, P. *Some Recent Developments in the Theories of Continued Fractions and the Padé Table*, 297.
- Zinn-Justin, J. *Convergence of Padé Approximants in the General Case*, 325.
- Bibliography of recent papers on fixed point theory*, 107.
- Erratum*, Volume 3, 674.
