INDEX TO VOLUME 14

Akbulet, Selman, *Topology and real algebraic geometry*, 907.

Akima, Hiroshi, *On estimating partial derivatives for bivariate interpolation of scattered data*, 41.

Alfeld, Peter, *A discrete C^1 interpolant for tetrahedral data*, 5.

Alfeld, Peter, *A transfinite C^2 interpolant over triangles*, 17.

Alonso, Ma. Emilia, *Semi-integral extensions and proper morphisms*, 831.

Al-Salam, N. A., *The centralizer of the Laguerre polynomial set*, 713.

Al-Salam, W. A., see Al-Salam, N. A.

Amberg, Bernard, *Products of two abelian subgroups*, 541.

Andradas, Carlos, *Real places in function fields*, 859.

Andrus, Gary F., *Uniform approximation by random variables*, 373.

Arnon, Dennis S., *A Polynomial-time algorithm for the topological type of a real algebraic curve*, 847.

Atalla, Robert E., *On uniform ergodic theorems for Markov operators on $C(X)$*, 451.

Aull, C. E., *Embeddings extending various types of disjoint sets*, 319.

Barnard, Roger W., *Cambell's conjecture on a majorization-subordination result for convex functions*, 331.

Barnhill, Robert E., see Alfeld, Peter.

Barnhill, Robert E., *Surfaces*, 1.

Barnhill, Robert E., *Adaptive triangular cubature*, 53.

Barnhill, Robert E., *Three- and four-dimensional surfaces*, 77.

Barnhill, Robert E., *Multistage trivariate surfaces*, 103.

Basgoze, T., *Some subordinate relations*, 661.

Batty, C. J. K., *Irreducible representations of inseparable C^*-algebras*, 721.

Becker, Eberhard, *Extended Artin-Schrier theory of fields*, 881.

Benedetti, Riccardo, *Searching around $H_*(-)$*, 939.

Blair, D. E., *A characteristic of oriented Grassman manifolds*, 573.

Bochnak, Jacek, *Algebraicity versus analyticity*, 863.

Bragg, L. R., *Analogous function theories for certain singular partial differential equations*, 383.

Brocker, Ludwig, *Minimal generation of basic semialgebraic sets*, 935.

Brown, Leon, see Andrus, Gary F.

Brown, Ron, *Ordered fields satisfying Rolle's Theorem*, 819.

Brown, William C., *A note on higher derivations and ordinary points of curves*, 397.

Brumfiel, G. W., *Witt rings and K-theory*, 733.

Camillo, V. P., *Inducing lattice maps by semilinear isomorphisms*, 475.

Cline, A. K., *A storage-efficient method for construction of a Theissen triangulation*, 119.

Cline, A. K., *A triangle-based C^1 interpolation method*, 223.

Cosner, Chris, *Upper and lower solutions for systems of second order equations with nonnegative characteristic form and discontinuous nonlinearities*, 549.

Craven, Thomas C., see Brown, Ron.

Dedo, Maria, see Benedetti, Riccardo.

Delfs, Hans, *Basic homotopy theory of locally semialgebraic spaces*, 913.

Delfs, Hans, *An introduction to locally semialgebraic spaces*, 945.

Delfs, Hans, *Semialgebraic Borel-Moore homology*, 987.

Delzell, Charles N., *Piecewise-rational retractions onto closed, convex semi-algebraic sets with interior*, 941.

Dettman, J. W., see Bragg, L. R.
Dobbertin, H., *A note on order convergence in complete lattices*, 647.
Dubois, D. W., *Explanation, Appreciation, and Remembrance*, 729.
Efroymson, Gustave, *Research Announcement on extending Nash functions off singular curves*, 815.
Engler, Antonio J., *Real fields with small Galois groups*, 817.
Erne, M., see Dobbertin, H.
Fegen, H. D., *Differential equations on Lie groups and tori, the wave equations and Huygens' principle*, 699.
Fillmore, J. P., *Hermitean quadrics as contact manifolds*, 559.
Foley, Thomas A., *Three-stage interpolation to scattered data*, 141.
Francoise, J.-P., *Hilbert's problem 16 (B)*, 845.
Franke, Richard, *A method for construction of surfaces under tension*, 203.
Gamboa, J. M., *Extensions of semidefinite functions*, 931.
Gamboa, J. M., *A characterization of rational and elliptic real algebraic curves in terms of their space of orderings*, 499.
Gill, John, *A note on fixed-point continued fractions and Aitken's Δ^2-method*, 705.
Henderson, Johnny, *Existence and uniqueness of solutions of right focal point boundary value problems for third and fourth order equations*, 487.
Hoover, John C., *Degree theory and the uniqueness of solutions to nodal problems*, 457.
Ikawa, Toshihiko, *Morse functions and submanifolds of hyperbolic space*, 301.
Jenson, Thomas, *A representation for the constructive design of curved surfaces*, 151.
Kellog, Charles N., see Barnard, Roger W.
Kent, D. C., see Dobbertin, H.
Keogh, F. R., see Basgoze, T.
King, H., *Survey of the topology of real algebraic sets*, 821.
Knebusch, Manfred, see Delfs, Hans, 913.
Knebusch, Manfred, see Delfs, Hans, 945.
Kochevar, Peter, *An application of multivariate B-splines to computer-aided geometric design*, 159.
Kula, M., *Direct limits of finite spaces of orderings*, 929.
Lam, T. Y., *An introduction to real algebra*, 767.
Lambert, Alan, *Operator algebras related to measure preserving transformations of finite order*, 341.
Lawson, Charles L., *C^1 surface interpolation for scattered data on a sphere*, 177.
Ledger, A. J., see Blair, D. E.
Little, F. F., see Barnhill, R. E. 77
Little, F. F., see Barnhill, R. E. 53.
Mahe, Louis, *On the Pierce-Birkhoff conjecture*, 983.
Magid, Andy R., *On the imprivity theorem for algebraic groups*, 655.
Marinari, M. G., *On complete intersection real curves*, 919.
Marshall, M., see Kula, M.
McCallum, Scott, see Arnon, Dennis S.
Merzel, Jonathan Lee, *Separation hyperplanes for convex sets over ordered fields*, 991.
Moak, Daniel S., *The Q-analogue of Stirling's formula*, 403.
Montgomery S., *Outer Galois theory of prime rings*, 305.
Nielson, Gregory M., see Barnhill, R. E. 1.
Nielson, Gregory M., see Franke, Richard.
Passman, D. S., see Montgomery S.
