

PUBLICATION LIST OF G. J. BUTLER

1. G. J. Butler, L. H. Erbe and R. M. Mathsen, *On the non-existence of conjugate points*, *Canad. Math. Bull.* **13** (1970), 31–37.
2. G. J. Butler and T. Rogers, *A generalization of a lemma of Bihari and applications to pointwise estimates for integral equations*. *J. Math. Anal. Appl.* **33** (1971), 77–81.
3. ——— and ———, *Pointwise bounds on derivatives of solutions to ordinary differential equations*, *SIAM J. Math. Anal.* **2** (1971), 521–528.
4. G. J. Butler, *An extremal property of simplices*, *Proc. Amer. Math. Soc.* **30** (1971), 556–560.
5. ——— and F. B. Richards, *An L^p saturation theorem for splines*, *Canad. J. Math.* **24** (1972), 957–966.
6. G. J. Butler, *Simultaneous packing and covering in Euclidean space*, *Proc. Lond. Math. Soc.* **25** (1972), 721–735.
7. ——— and H. I. Freedman, *Further critical cases of the scalar implicit function theorem*, *Aequationes Math.* **8** (1972), 203–211.
8. ——— and J. W. Macki, *Oscillation and comparison theorems for second order linear differential equations with integrable coefficients*. *Canad. J. Math.* **26** (1974), 294–301.
- 8a. J. W. Macki and G. J. Butler, *Oscillation and comparison theorems for second order linear differential equations with integrable coefficients*, *The Greek Mathematical Society C. Caratheodory Symposium* (Sept. 3–7, 1973), 409–413.
- 8b. G. J. Butler and J. W. Macki, *Oscillation and comparison theorems for second order linear differential equations with integrable coefficients: corrigendum*, *Canad. J. Math.* **27** (1975), 736.
9. G. J. Butler, *The existence of periodic solutions of an autonomous second order nonlinear differential equation*, *Ann. Polon. Math.* **30** (1974), 166–174.
10. ——— and H. I. Freedman, *Periodic solutions of $x'' + g(x) + \mu h(x) = 0$* , *Trans. Amer. Math. Soc.* **197** (1974), 59–74.

11. G. J. Butler, *On the oscillatory behavior of a second order nonlinear differential equation*, Ann. Mat. Pura Appl. **105** (1975), 73–92.
12. —, *A note on the existence of periodic solutions of ???*, in *International Conference on Differential Equations* (H. A. Antosiewicz, ed.) Academic Press, New York, 1975, 803–804.
13. —, *Oscillation theorems for a nonlinear analogue of Hill's equation*. Quart. J. Math. **27** (1976), 159–171.
14. —, *Rapid oscillation, non-extendability and the existence of periodic solutions to second order nonlinear differential equations*, J. Differential Equations **22** (1976), 467–477.
15. —, *The oscillatory behavior of a second order nonlinear differential equation with damping*, J. Math. Anal. Appl. **57** (1977), 273–289.
16. —, *The existence of continuable solutions of a second order differential equation*, Canad. J. Math. **29** (1977), 472–479.
- 16a. —, *The existence of continuable solutions for a second order differential equation: erratum*, Canad. J. Math. **31** (1979), 448.
17. —, *Periodic solutions of sublinear second order differential equations*, J. Math. Anal. Appl. **62** (1978), 676–690.
18. —, *A note on nonoscillatory solutions of sublinear Hill's equation*, J. Math. Anal. Appl. **63** (1978), 43–49.
19. — and G. Pianigiani, *Periodic points and chaotic functions in the unit interval*, Bull. Austral. Math. Soc. **18** (1978), 255–265.
20. — and H. I. Freedman, *Periodic solutions of $x'' + f(\mu, x) = 0$* , Ann. Polon. Math. **36** (1979), 676–690.
21. —, *Almost all 1-set contractions have a fixed point*, Proc. Amer. Math. Soc. **74** (1979), 353–357.
22. —, *Hille-Wintner type comparison theorems for second-order ordinary differential equations*, Proc. Amer. Math. Soc. **76** (1979), 51–59.
23. —, *Oscillation criteria for second order nonlinear ordinary differential equations*, in *Qualitative Theory of Differential Equations*, Sezeged (Hungary), 1979, 93–109.

24. G. J. Butler, *The genericity of the convergence of successive approximations in Banach spaces*, Funkcial. Ekvac. **22** (1979), 231–240.
25. —, *Coexistence in predator-prey systems*, in Proceedings of NSF-CBMS conference on modelling and differential equations in biology (T. A. Burton, ed.) 1980, 199–207 Lecture Notes in Applied Mathematics, #58, Marcel Dekker, New York.
26. —, *Integral averages and the oscillation of second-order ordinary differential equations*. SIAM J. Math. Anal. **11** (1980) 190–200.
27. —, *The Poincare-Birkhoff “twist” theorem and periodic solutions of second-order nonlinear differential equations*, in Differential equations: Proceedings of fall conference on differential equations, Academic Press, New York, 1980, 135–147.
28. — and H. I. Freedman, *Periodic solutions of a predator-prey system with periodic coefficients*, Math. Biosci. **55** (1981), 27–38.
29. — and P. Waltman, *Bifurcation from a limit cycle in a two predator-one prey ecosystem modeled on a chemostat*, J. Math. Biol. **12** (1981), 295–310.
30. — I. Freedman and P. Waltman, *Global dynamics for the growth of a population with genotypic fertility differences*, J. Math. Biol. **14** (1982), 25–35.
31. G. J. Butler, *An integral criterion for the oscillation of a second order sublinear ordinary differential equation*, J. Indian Math. Soc. **24** (1982), 1–7.
32. — and L. H. Erbe, *Integral comparison theorems and extremal points for linear differential equations*, J. Differential Equations **47** (1983), 214–226.
33. — and —, *Nonlinear integral Riccati systems and comparison theorems for linear differential equations*, SIAM J. Math. Anal. **14** (1983), 463–473.
34. G. J. Butler, *Competitive predator-prey systems and coexistence*, in Population biology proceedings (Edmonton, 1982), H. I. Freedman and C. Strobeck, eds., Springer-Verlag Lecture Notes in Biomathematics **52**, 1983, 210–217.
35. —, S. B. Hsu and P. Waltman, *Coexistence of competing predators in a chemostat*, J. Math. Biol. **17** (1983), 133–151.

- 36.** G. J. Butler and G. S. K. Wolkowicz, *A mathematical model of the chemostat with a general class of functions describing nutrient uptake*, in *Mathematical Models of Renewable Resources* Vol. II (R. Lamberson, ed.), Humboldt State University, 1983, 185–191.
- 37.** G. J. Butler and L. H. Erbe, *Comparison theorems for second order operator-valued linear differential equations*, *Pacific J. Math.* **112** (1984), 21–34.
- 38.** G. J. Butler and V. S. H. Rao, *Some properties of second order linear differential equations and perturbations that preserve them*, *SIAM J. Math. Anal.* **15** (1984), 912–921.
- 39.** G. J. Butler, C. R. Johnson and H. Wolkowicz, *Nonnegative solutions of a quadratic matrix equation arising from comparison theorems in ordinary differential equations*, *SIAM J. Algebraic Discrete Methods* **6** (1985), 47–53.
- 40.** G. J. Butler and L. H. Erbe, *Oscillation theory for second order differential systems with functionally commutative matrix coefficients*, *Funkcial Ekvac.* **28** (1985), 47–55.
- 41.** G. J. Butler, S. B. Hsu and P. Waltman, *A mathematical model of the chemostat with periodic washout rate*, *SIAM J. Appl. Math.* **45** (1985), 435–449.
- 42.** G. J. Butler and G. S. K. Wolkowicz, *A mathematical model of the chemostat with a general class of functions describing nutrient uptake*, *SIAM J. Appl. Math.* **45** (1985), 138–151.
- 43.** G. J. Butler and L. H. Erbe, *Oscillation results for selfadjoint differential systems*, *J. Math. Anal. Appl.* **115** (1986), 470–481.
- 44.** G. J. Butler, H. I. Freedman and P. Waltman, *Uniformly persistent systems*, *Proc. Amer. Math. Soc.* **96** (1986), 425–430.
- 45.** G. J. Butler and P. Waltman, *Persistence in dynamical systems*, *J. Differential Equations* **63** (1986), 255–263.
