(Notre Dame Journal of Formal Logic, vol. VIII (1967), pp. 191-194)

## C. G. McKAY

The treatment in the above paper is inadequate. For a correct and more powerful statement of results, the reader is referred to the author's article "The decidability of certain intermediate propositional logics", *The Journal of Symbolic Logic*, vol. 33 (1968), pp. 258-269.
