|--------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Tetsu MASUDA: Classical transcendental solutions of the Painlevé equations and their degeneration . . . . .                                      | 467  |
| Xueshan ZHANG: On the nonexistence of stable currents in submanifolds of a Euclidean Space . . . . .                                             | 491  |
| Shigeru KURODA: A generalization of Roberts' counterexample to the fourteenth problem of Hilbert . . . . .                                       | 501  |
| Shigeaki MIYOSHI: On representability of the smooth Euler class . . . . .                                                                        | 523  |
| Katsuhisa MIMACHI, Katsuyoshi OHARA and Masaaki YOSHIDA: Intersection numbers for loaded cycles associated with Selberg-type integrals . . . . . | 531  |
| Irina MARKINA: $p$ -module of vector measures in domains with intrinsic metric on Carnot groups . . . . .                                        | 553  |
| Kurt FALK and Bernd O. STRATMANN: Remarks on Hausdorff dimensions for transient limit sets of kleinian groups . . . . .                          | 571  |
| Alexandru I. BADULESCU: Un résultat d'irréductibilité en caractéristique non nulle . . . . .                                                     | 583  |
| Paolo ALUFFI: Shadows of blow-up algebras . . . . .                                                                                              | 593  |
