

## TABLE OF CONTENTS

<b>Editorial</b> . . . . .	1
Terry Goodman	
<b>Shannon's Theorem and the Binomial Random Variable</b> . . . . .	2
Martin Erickson	
<b>On the Right-Hand Derivative of Integral Functions With a Discontinuous Integrand</b> . . . . .	4
Joseph Bennis	
<b>A Relationship Between the Metropolis Algorithm and the Two-Membered Evolution Strategy</b> . . . . .	8
L. Vincent Edmondson	
<b>There May be More Than One Way to Find the Derivative of a Function</b> . . . . .	13
Mohammad K. Azarian	
<b>A Note on a Counter Example in Finite Groups</b> . . . . .	16
Kandasamy Muthuvel	
<b>Evaluation of a Family of Summations</b> . . . . .	17
Russell Euler	
<b>Did You Do Anything in Class Today?</b> . . . . .	21
Richard L. Francis	
<b>Accelerated MSOR Method</b> . . . . .	24
Saadat Moussavi	
<b>Problems</b> . . . . .	39
<b>Solutions</b> . . . . .	41
<b>Announcements</b> . . . . .	49
