The Journal of Physical Mathematics is a new journal of OMICS Group, an open-access online publishing company. The purpose of the journal is to publish high quality research in mathematics motivated by, originated in, relevant to, or merely related to physics in a broad sense.

This, inaugural under new publisher, issue of the journal presents a collection of papers on a wide range of topics of Physical Mathematics. The editors hope that this issue will set the tone and level for this new journal on this always active, exciting field of mathematics.
