

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 17, Numbers 11-12

November/December 2012

François Alouges, Adeline Augier, Benjamin Graille, and Benoît Merlet, Homogenization of a coupled problem for sound propagation in porous media	1001
Tokuhiro Eto, Yoshikazu Giga, and Katsuyuki Ishii, An area minimizing scheme for anisotropic mean curvature flow	1031
Frédéric Charve and Boris Haspot, Existence of strong solutions in a larger space for the shallow-water system	1085
Yves van Gennip, Andrea L. Bertozzi, Γ -convergence of graph Ginzburg-Landau functionals	1115
S. Antontsev and S. Shmarev, Doubly degenerate parabolic equations with variable nonlinearity I: Existence of bounded strong solutions	1181
