

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 17, Numbers 7-8

July/August 2012

Quoc Hung Phan, Liouville-type theorems and bounds of solutions for Hardy-Hénon elliptic systems	605
Adina Ciomaga, On the strong maximum principle for second order nonlinear parabolic integro-differential equations	635
Bernard Dacorogna, Paolo Marcellini, and Emanuele Paolini, The two well problem for piecewise affine maps	673
Nathan Pennington, Global Solutions to the Lagrangian Averaged Navier-Stokes equation in low regularity Besov spaces	697
Pablo Castañeda, Dan Marchesin, and Johannes Bruining, The dynamics of chemical reactors in porous media	725
Yury A. Alkhutov and Vitali Liskevich, Hölder continuity of solutions to parabolic equations uniformly degenerating on a part of the domain ..	747
Tobias Nau and Jürgen Saal, H^∞ -Calculus for cylindrical boundary value problems	767
